Forward-looking statements

Novo Nordisk's statutory Annual Report 2025, Form 20-F, any quarterly financial reports, the materials displayed and other information provided (orally or in writing) at this Capital Markes Day as well as written information released, shown, or oral statements made, to the public in the future by or on behalf of Novo Nordisk, may contain certain forward-looking statements relating to the operating, research & development, financial and sustainability performance and results of Novo Nordisk and/or the industry in which it operates.

Forward-looking statements can be identified by the fact that they do not relate to historical or current facts and include guidance. Words such as 'believe', 'expect', 'may', 'will', 'plan', 'strategy', 'transition plan', 'prospect', 'aspiration', 'ambition', 'upcoming', 'become', 'foresee', 'estimate', 'project', 'anticipate', 'can', 'intend', 'target' and other words and terms of similar meaning, as they relate to Novo Nordisk or our management, are intended to identify forward-looking statements. Examples of such forward-looking statements include, but are not limited to:

- Statements of targets, future guidance, (transition) plans, objectives, ambitions, aspirations or goals for future operations, including those related to operating, financial and sustainability matters, Novo Nordisk's products, product research, product development, product introductions and product approvals as well as cooperation in relation thereto;
- Statements containing projections of or targets for revenues, costs, income (or loss), earnings per share, capital expenditures, dividends, capital structure, net financials and other financial measures;
- Statements regarding future economic performance, future actions and outcome of contingencies, such as legal proceedings; and
- Statements regarding the assumptions underlying or relating to such statements.

By their very nature, forward-looking statements involve risks, uncertainties and assumptions, both general and specific, and actual results may differ materially from those contemplated, expressed or implied by any forward-looking statement.

Factors that may affect future results include, but are not limited to, global as well as local political, economic and environmental conditions, such as interest rate and currency exchange rate fluctuations or climate change, delay or stoppage or failure of projects related to clinical trial conduct or research and/or development, unplanned loss of patents, interruptions of supplies and production, including as a result of interruptions or delays affecting supply chains on which Novo Nordisk relies, shortages of supplies, including energy supplies, product recalls, unexpected contract breaches or terminations, government-mandated or market-driven price decreases for Novo Nordisk's products, introduction of competing products, reliance on information technology including the risk of cybersecurity breaches (Novo Nordisk has experienced events of IT security breaches in the past), Novo Nordisk's ability to successfully market current and new products, exposure to product liability and legal proceedings and investigations, changes in governmental laws and related interpretation thereof, including on reimbursement, intellectual property protection and regulatory controls on testing, approval, manufacturing and marketing, and taxation changes, including changes in tariffs and duties, perceived or actual failure to adhere to ethical marketing practices, investments in and divestitures of domestic and foreign companies, unexpected growth in costs and expenses, strikes and other labour market disputes, failure to recruit and retain the right employees, failure to maintain a culture of compliance, epidemics, pandemics or other public health crises, effects of domestic or international crises, civil unrest, war or other conflict and factors related to the foregoing matters and other factors not specifically identified herein.

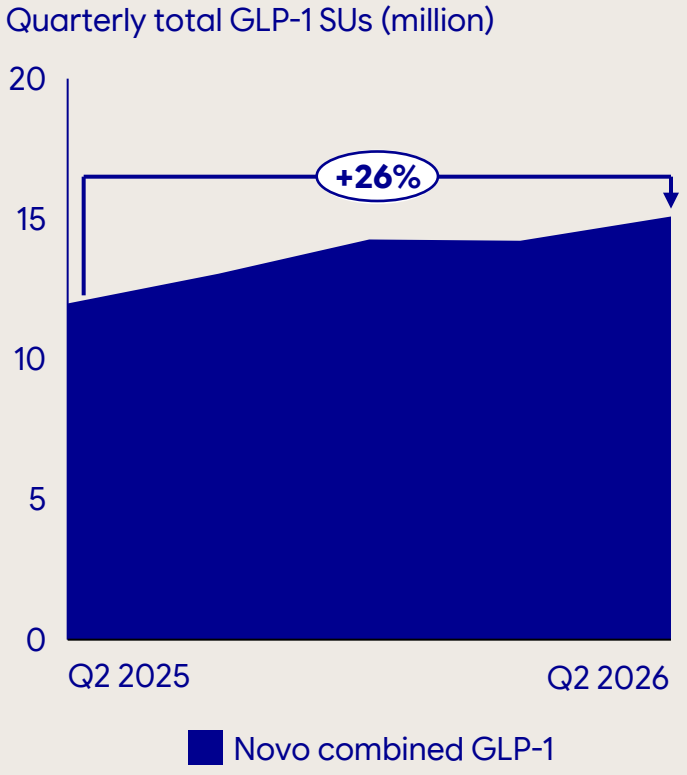

For an overview of certain risks that could adversely affect Novo Nordisk's results or the accuracy of its forward-looking statements , reference is made to 'Risks management' in the Annual Report 2025.

None of Novo Nordisk or its officers or employees accept any responsibility for the future accuracy of its forward-looking statements.

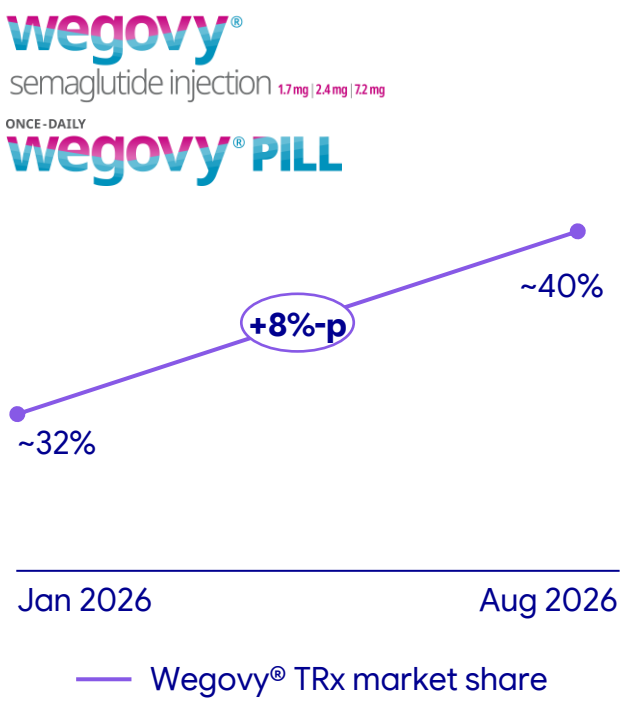

Unless required by law, Novo Nordisk has no duty and undertakes no obligation to update or revise any forward-looking statement, whether as a result of new information, future events, or otherwise.

US Operations continues to drive GLP-1 volume growth and gain market share in obesity, in a year of pricing headwinds

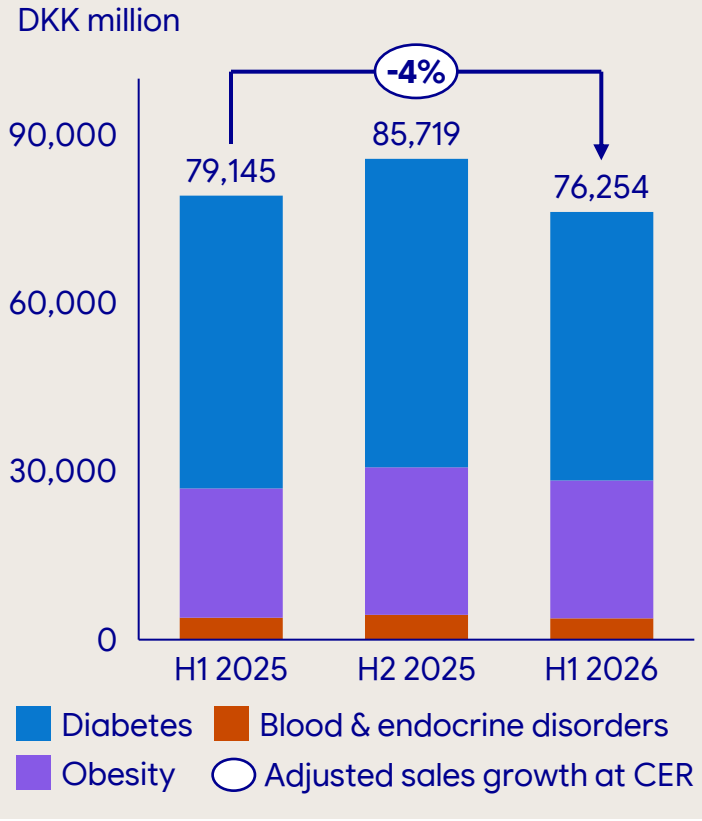

Uptake of Novo GLP-1s in the US continues to increase

Novo has gained market share within branded obesity medications

US Operations sales are impacted by 2026 pricing headwinds

CER: Constant exchange rate; GLP-1: Glucagon-like peptide-1; SU: Sold units; TRx: Total prescriptions; US: United States
Note: Sales are reported in DKK using DKK/USD exchange rate of 6.4, excluding the 340B provision release in H1 2025 and H1 2026
Source: IQVIA Xponent, week ending 6/26/2026 and week ending 8/28/2026

Clear strategy is in place to support sales growth in US Operations over the mid- to long term

Key strategic priorities across the corporate strategy in US Operations

Diabetes
- Drive Ozempic® uptake by reinforcing differentiated outcomes
- Leverage Ozempic® pill

Obesity
- Expand Wegovy® franchise, win the oral segment
- Successfully launch CagriSema, first GLP-1+amylin combination
- Drive uptake in Medicare Part D Bridge programme

Blood & endocrine disorders
- Successfully launch denecimig
- Establish etavopivat as preferred therapy in sickle cell disease

Liver diseases
- Drive uptake of Wegovy® for MASH
- Prepare for efruxifermin launch

Cardiovascular diseases
- Leverage CVOT data and experience
- Prepare for coramitug launch

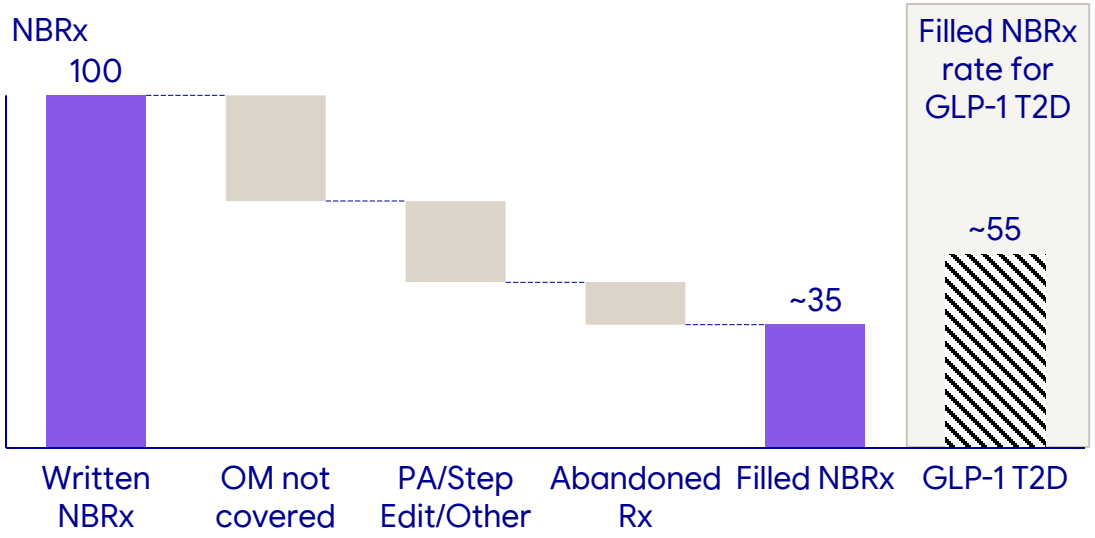

Operational priorities to deliver on the strategy

CVOT: Cardiovascular outcome trial; GLP-1: Glucagon-like peptide-1; MASH: Metabolic dysfunction-associated steatohepatitis; US: United States
Note: 'Medicare Part D Bridge' refers to a short-term demonstration run by Centers for Medicare & Medicaid Services that will provide eligible Medicare Part D beneficiaries with access to certain GLP-1 drugs between July 1, 2026, and December 31, 2027

Novo continues efforts to improve reimbursed access in obesity

Commercial obesity medication coverage is inferior to other chronic disease areas, with access being cumbersome for many

Obesity medication cost trend remains the challenge for payers

Cost = Price x Volume

Novo continues to work on securing long-term durable access and reimbursement in both private and public channels

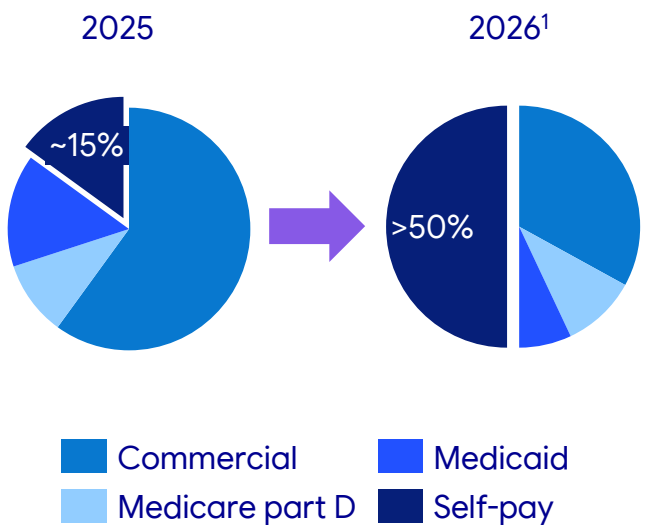

Address unit economics	Ensure competitive and sustainable net pricing
Predictability on volume	Gradual reimbursement of select populations
Demonstrate value	Continue to provide clinical and real-world evidence

- Explore alternative access models
- Secure long-term obesity medication access in Medicare Part D

GLP-1: Glucagon-like peptide-1; NBRx: New-to-brand prescription; OM: Obesity medication; PA: Prior authorization; Rx: Prescription; T2D: Type 2 diabetes

Consumer dynamics are driving obesity market growth, as direct-to-patient models expand access

Wegovy® franchise channel mix has changed significantly since 2025

Direct-to-patient models are redefining obesity care and driving growth for Novo

Strategy is built on a multi-channel ecosystem designed to **reach patients where they are**

Retail

- Convenient retail access
- Affordability at point of sale
- Partners support broad network

Telehealth

- Convenient online access
- Integrated and always accessible digital support
- Partnership with 9+ telehealth entities

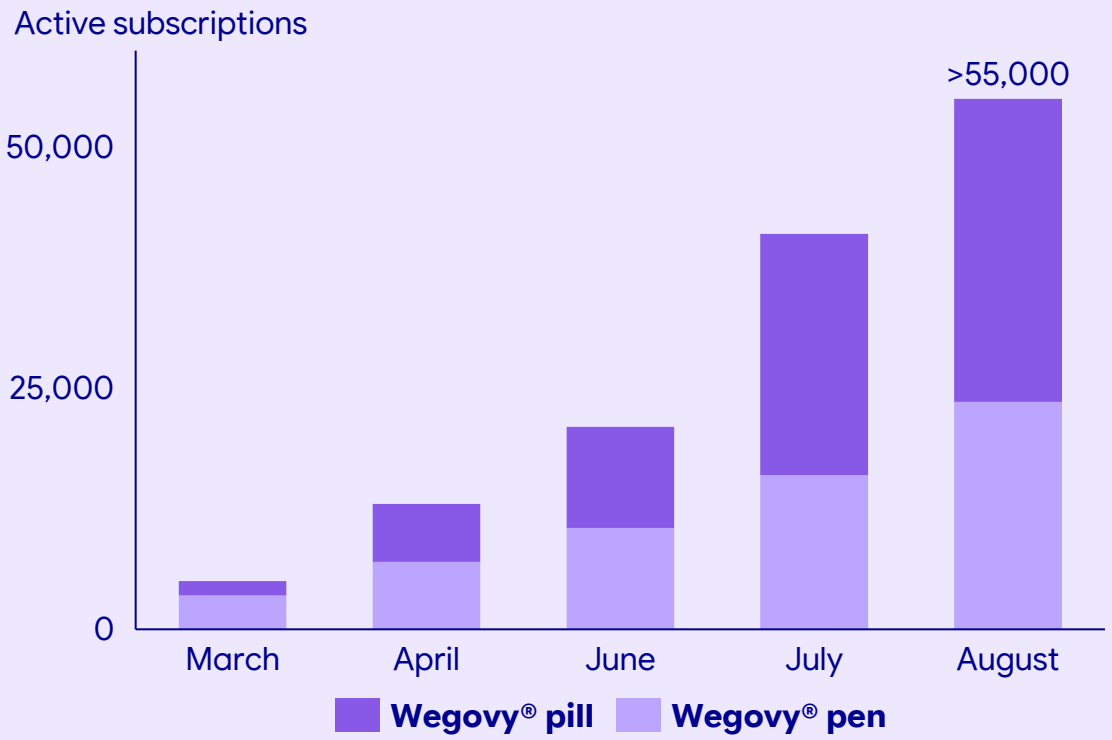

novocare®

- Direct-to-patient pharmacy channel
- Convenience, direct access and support options
- Integrated ecosystem

[1]Year-to-date channel mix

The recently launched Wegovy® subscription model is gaining traction on the Ro® platform

Adoption of Wegovy® subscription model on the Ro® platform

Wegovy® subscription model drives greater patient adherence and titration

- Consumers on subscription plans on average fill one more prescription vs those on monthly plan, based on early data
- Consumers are increasingly opting for longer duration plans on the Ro® platform
- By their 4th fill, >50% of Wegovy® pill users with Ro® are on 9 mg or 25 mg dose[1]

"Novo's subscription model is incredibly innovative - patients want to start and stay with Wegovy® for a long time"

- Zachariah Reitano, CEO of Ro®

[1]When following a cohort of people starting treatment
Note: Ro is a direct-to-patient telehealth company. Wegovy® subscription model is available at multiple providers
Source: Ro® data on file

Novocare® 2.0 is evolving into an integrated ecosystem to strengthen consumer engagement

Novocare® to become a cross-brand ecosystem connecting access, support and engagement

Support and retention

Access and Rx fill

Connected membership

Coverage and affordability

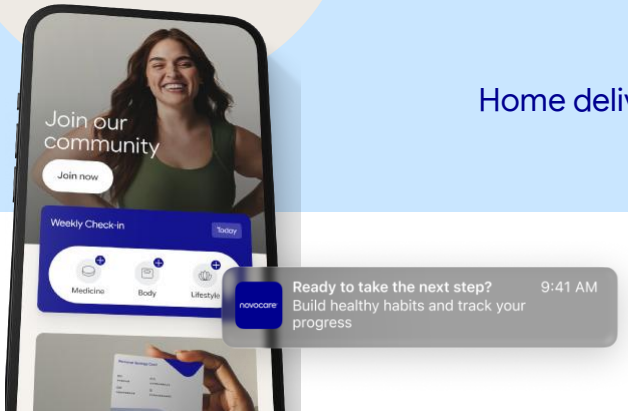

Adherence by design

novocare®

Seamless access

Partner ecosystem

Home delivery

Rx: Prescription

The ambition with Novocare® is to create a best-in-class, unified end-to-end consumer experience

Novocare® ecosystem

- Simplified path to treatment
- Connected end-to-end journey
- Personalised engagement at scale
- Stronger treatment persistence
- Cross-brand platform

Business

- Scale platform for growth
- Reduce operational costs

Wegovy® pill launch momentum builds on competitive clinical profile and commercial readiness across US Operations

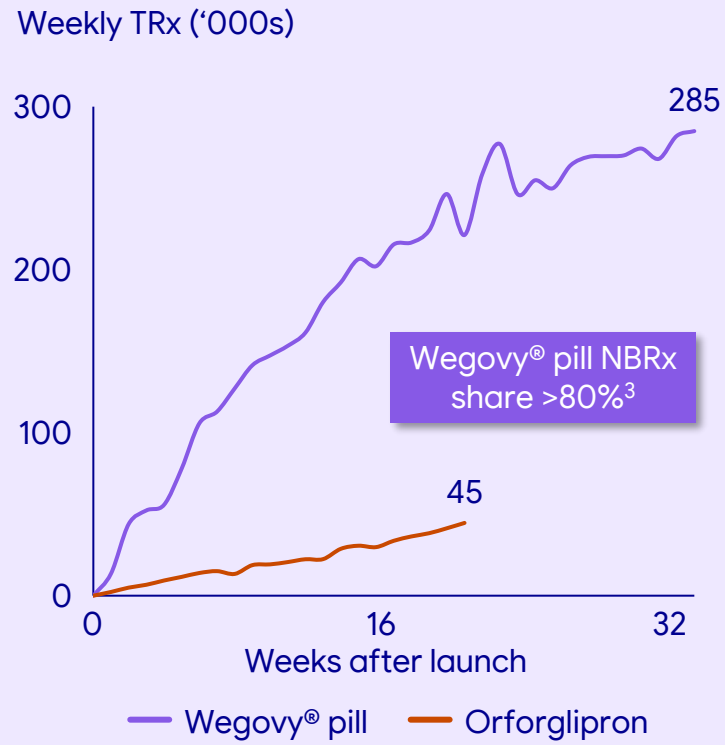

Competitive clinical profile of Wegovy® pill

- **17%** - best-in-class weight loss[1]
- **20%** - MACE reduction
- **50 million** - patient-years of real-world exposure
- **No drug-drug interaction** restrictions, including none for oral contraceptives[2]

Commercial execution enabled rapid launch and uptake momentum

- **Rapid execution** - 14 days from approval to launch
- **Full-channel reach** - activating all healthcare channels from day one
- **Direct-to-patient focus** - leveraging Novocare® and partners
- **Direct marketing investments** - supported by partner investments

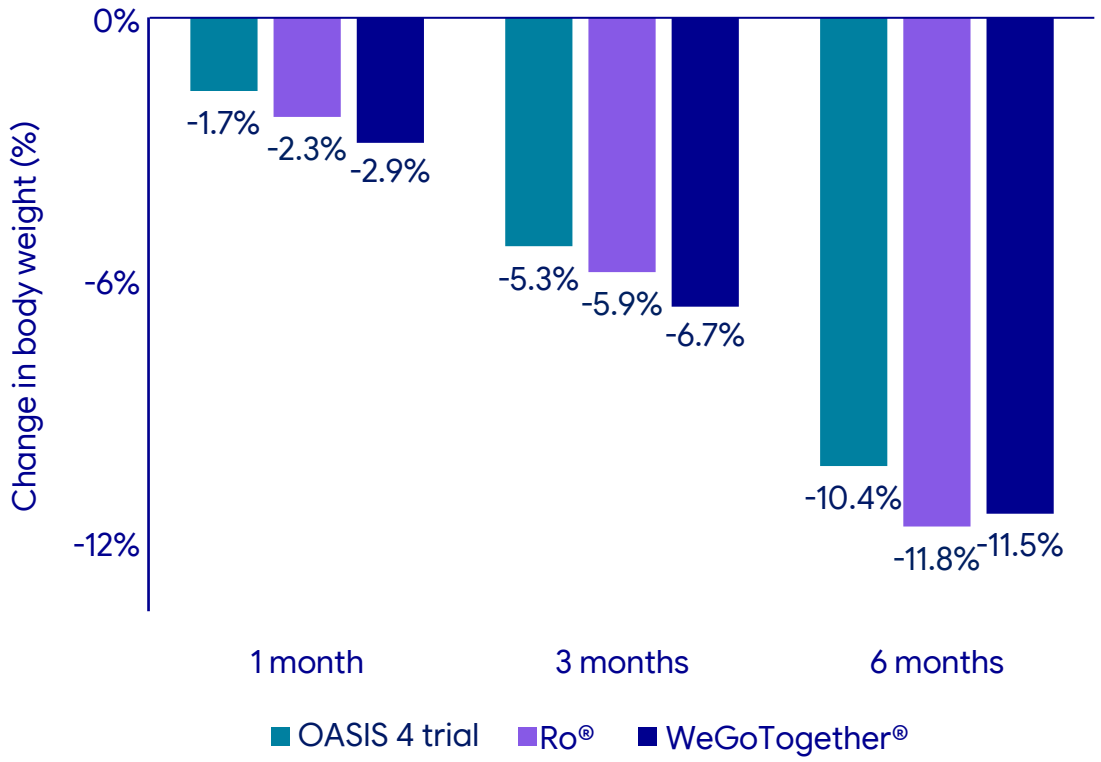

Uptake continues to outpace oral competitor

[1]Efficacy estimand; [2]Per FDA label [3]Based on internal Novo self-pay data, IQVIA Xponent and Supplemental GLP-1 Report as of week ending 8/21/2026
MACE: Major adverse cardiovascular event; NBRx: New-to-brand prescription; TRx: Total prescriptions; US: United States
Source: Wharton S, et al. N Engl J Med. 2025; CV death, non-fatal MI, or non-fatal stroke - Supported with data from the STEP trial programme and the PIONEER PLUS trial; Novo data on file; Weekly TRx data for Wegovy pill is an estimate based on internal self-pay data and IQVIA Xponent reporting, as of week ending 8/28/2026; TRx data for orforglipron is based on IQVIA Supplemental GLP-1 Report data as of week ending 8/28/2026

Wegovy® pill drives market expansion, supported by real-world evidence of sustained weight loss after six months

Insights from WeGoTogether® and Ro® show real-world weight loss with Wegovy® pill is higher than the clinical evidence

Wegovy® pill uptake continues to be primarily driven by market expansion

- ~80% are naïve to GLP-1 obesity medications

Rx

- >7 million prescriptions year-to-date
- ~90% of prescriptions are self-pay

User

- ~70% female
- Average age of ~50 years
- Average BMI of ~35

- ~30% of TRx for the 9 and 25 mg dose

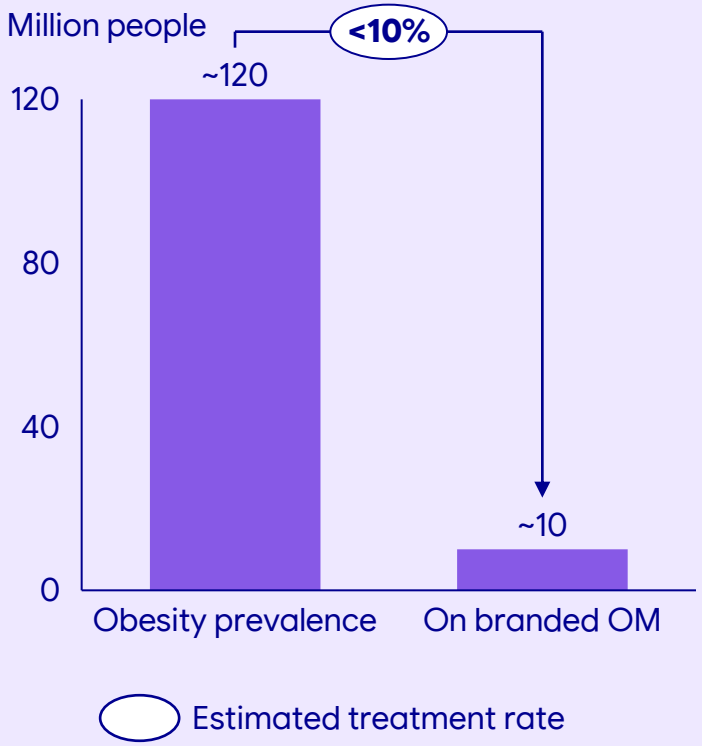

MS

- Oral obesity medications now capture ~30% MS[1] of the total market

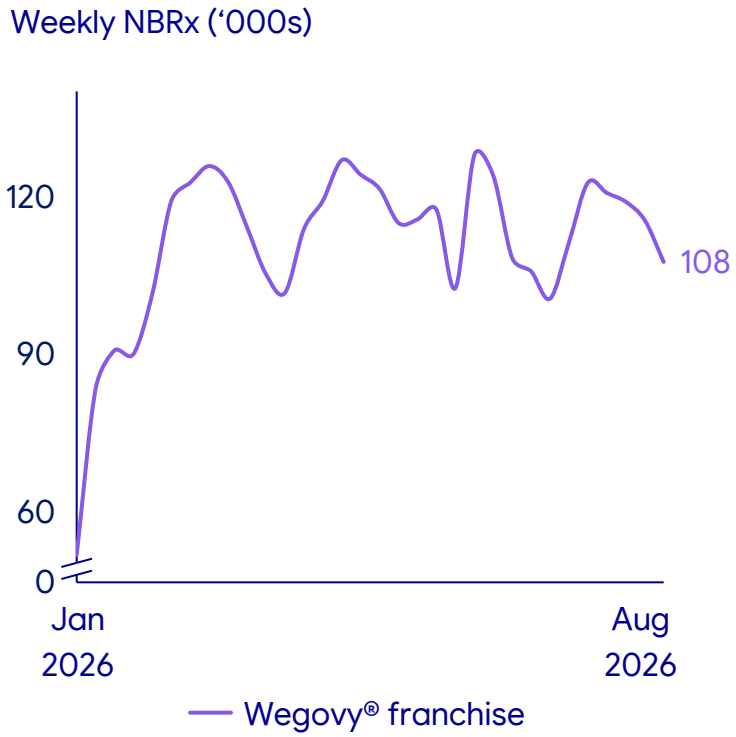

[1]Based on last 12 weeks, as of week ending 8/28/2026
BMI: Body mass index; GLP-1: Glucagon-like peptide-1; MS: Market share; TRx: Total prescriptions
Note: WeGoTogether® is Novo's patient support app for Wegovy® users; Ro® is a direct-to-patient telehealth company
Source: Real-world weight loss data from WeGoTogether® and Ro®; Wharton et al, N Engl J Med. 2025 Sep 18;393(11):1077-1087; Wegovy® pill user data based on internal Novo data; Total Rx based on internal self-pay data and IQVIA Xponent reporting

Wegovy® pill and HD launches are unlocking growth in a market with low treatment rate

Less than 10% are treated for obesity in the US today

The Wegovy® franchise is NBRx leader in the OM category with 55% market share

USO will continue to drive uptake for the Wegovy® franchise

Drive HCP preference for Wegovy®

- Leverage Wegovy® HD and pill weight loss of 21% and 17%[1]
- Differentiate with Wegovy® indications

Expand Wegovy® reach

- Drive consumer demand for Wegovy®
- Reach new prescribers

Build on commercial progress

- Continue competitive investments
- Improve patient engagement via optimised Novocare®
- Broaden subscription model usage
- Expand partnerships

[1]As per FDA label, efficacy estimand

CagriSema is expected to expand the Novo obesity portfolio and introduce the GLP-1 and amylin biology as potential first in class

CagriSema introduces next-generation of weight loss medication, powered by the GLP-1 + amylin biology

- Substantial weight loss of ~23%
  1 in 5 patients reaching ≥30% (+31 kgs / +70 lbs)
- Mean weight loss of ~25% in women with obesity
- 2x improved physical function
  Preserved muscle strength during weight-loss
- Building on proven semaglutide benefits

Raising awareness of CagriSema ahead of the launch

Drive HCP conversations on benefits of amylin	Raise awareness of amylin with consumers	Share new REDEFINE data at upcoming conferences

Commercial readiness to secure a successful launch of CagriSema early next year

Prepare for fast turnaround from approval to launch

Launch across all healthcare channels

novocare®

Drive consumer efforts via Novocare® and with partners

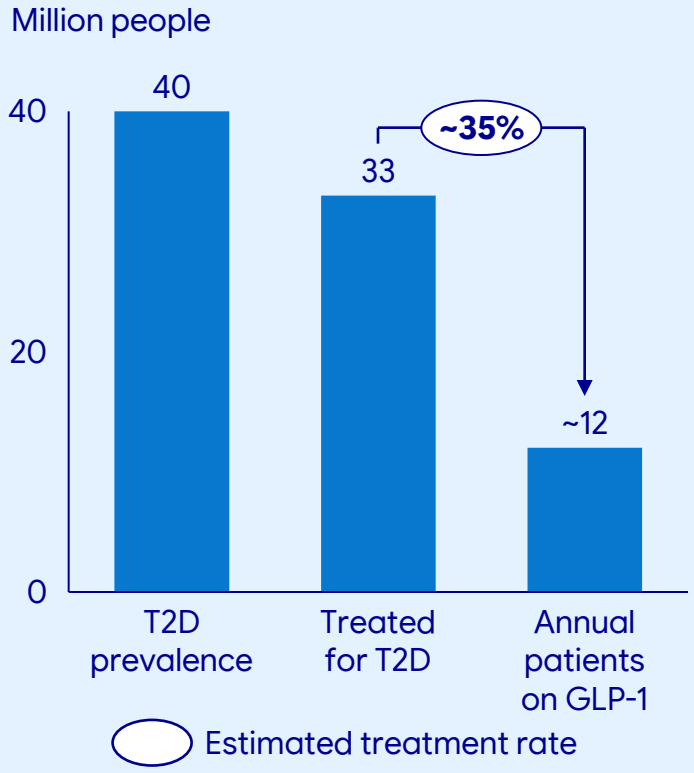

Deliver superior customer experience

- FDA regulatory decision expected in Q4 2026
- Pending decision, full launch expected during start of 2027
- REDEFINE 11 and CagriSema HD planned readouts in H1 2027 and H1 2028

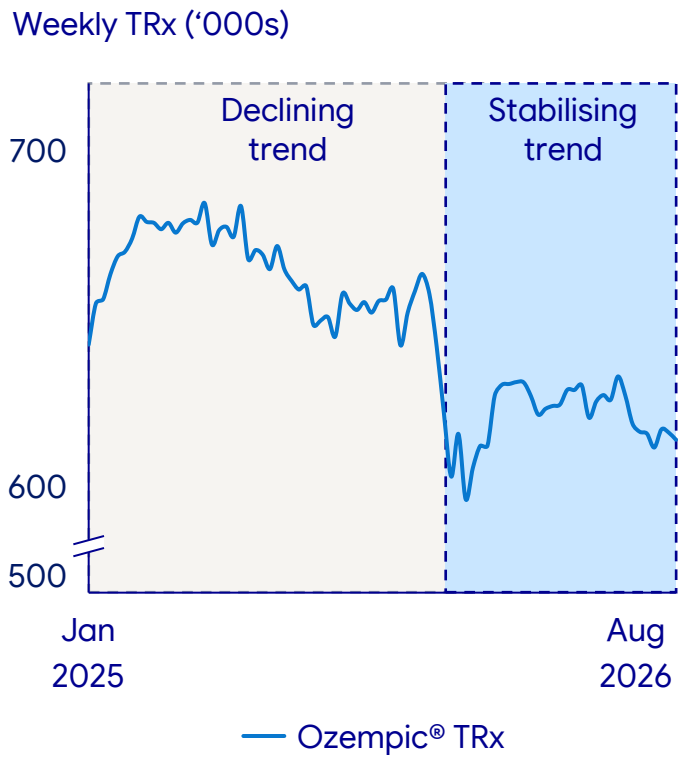

FDA: Food & Drug Administration; GLP-1: Glucagon-like peptide-1; HCP: Health care professional; HD: High dose
Note: Weight loss and weight loss proportions based on efficacy estimand; REDEFINE refers to the CagriSema development programmes

US GLP-1 diabetes market remains attractive, with commercial focus on driving Ozempic® preference

The US GLP-1 diabetes market offers runway for growth

Ozempic® injectable TRx trend has stabilised in 2026

Commercial focus on Ozempic® preference and leveraging pill launch

Renewed focus on the Ozempic® franchise

- Ozempic® pill launch as a key market event
- Continue market investments in the combined franchise

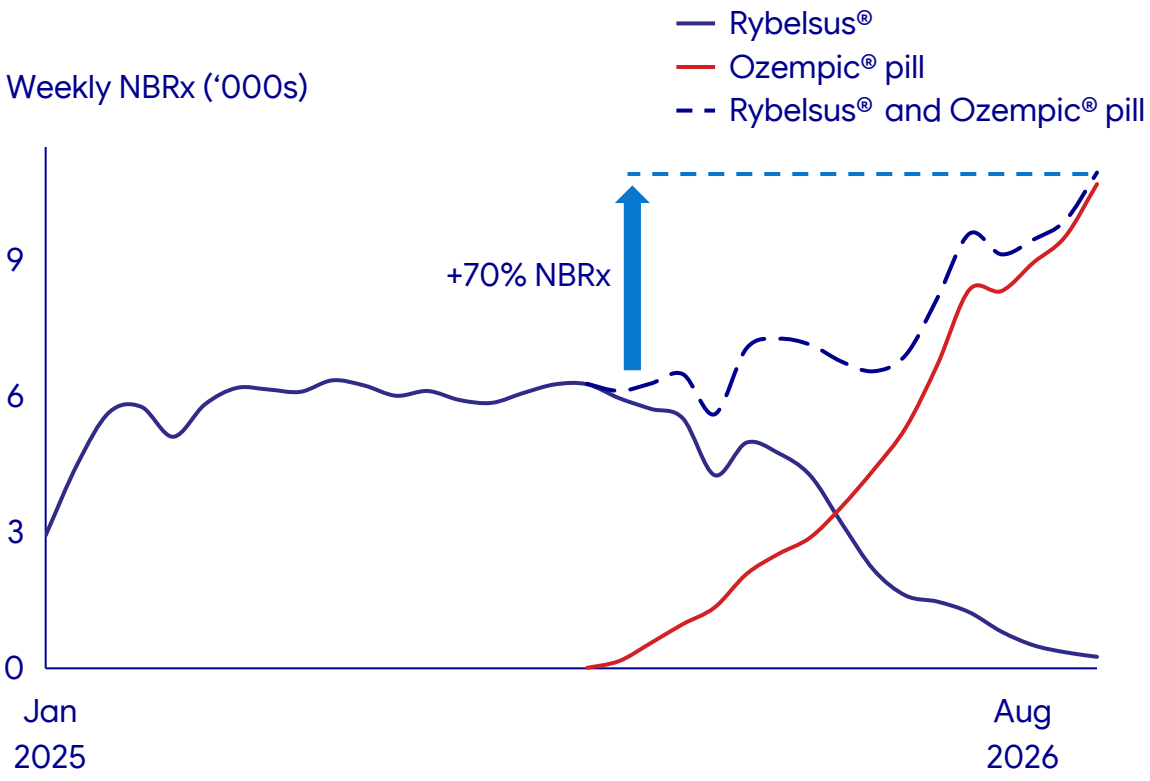

Drive increased HCP and patient preference for Ozempic®

- Build on Ozempic® brand recognition
- Differentiate Ozempic® through proven outcomes
- Capitalise on the Ozempic® pill launch and potential 25 mg dose approval

GLP-1: Glucagon-like peptide-1; HCP: Healthcare professional; TRx: Total prescriptions; T2D: Type 2 diabetes; US: United States
Source: CDC National Diabetes Statistics Report 2023; IQVIA LAAD Jun'26; IQVIA Xponent TRx rolling 4-Week Average, week ending 08/21/2026

Ozempic® pill launch is driving new patients to the franchise, with the potential to expand the oral GLP-1 type 2 diabetes market

Ozempic® pill transition is progressing, with all new patients now starting directly on the brand

Launch of Ozempic® pill creates opportunity to expand the oral GLP-1 type 2 diabetes market

- Ozempic®'s well-known brand improves patient awareness
- Commercial activities now for combined Ozempic® franchise
- Potential 25 mg Ozempic® pill approval to put oral and injectable efficacy on par

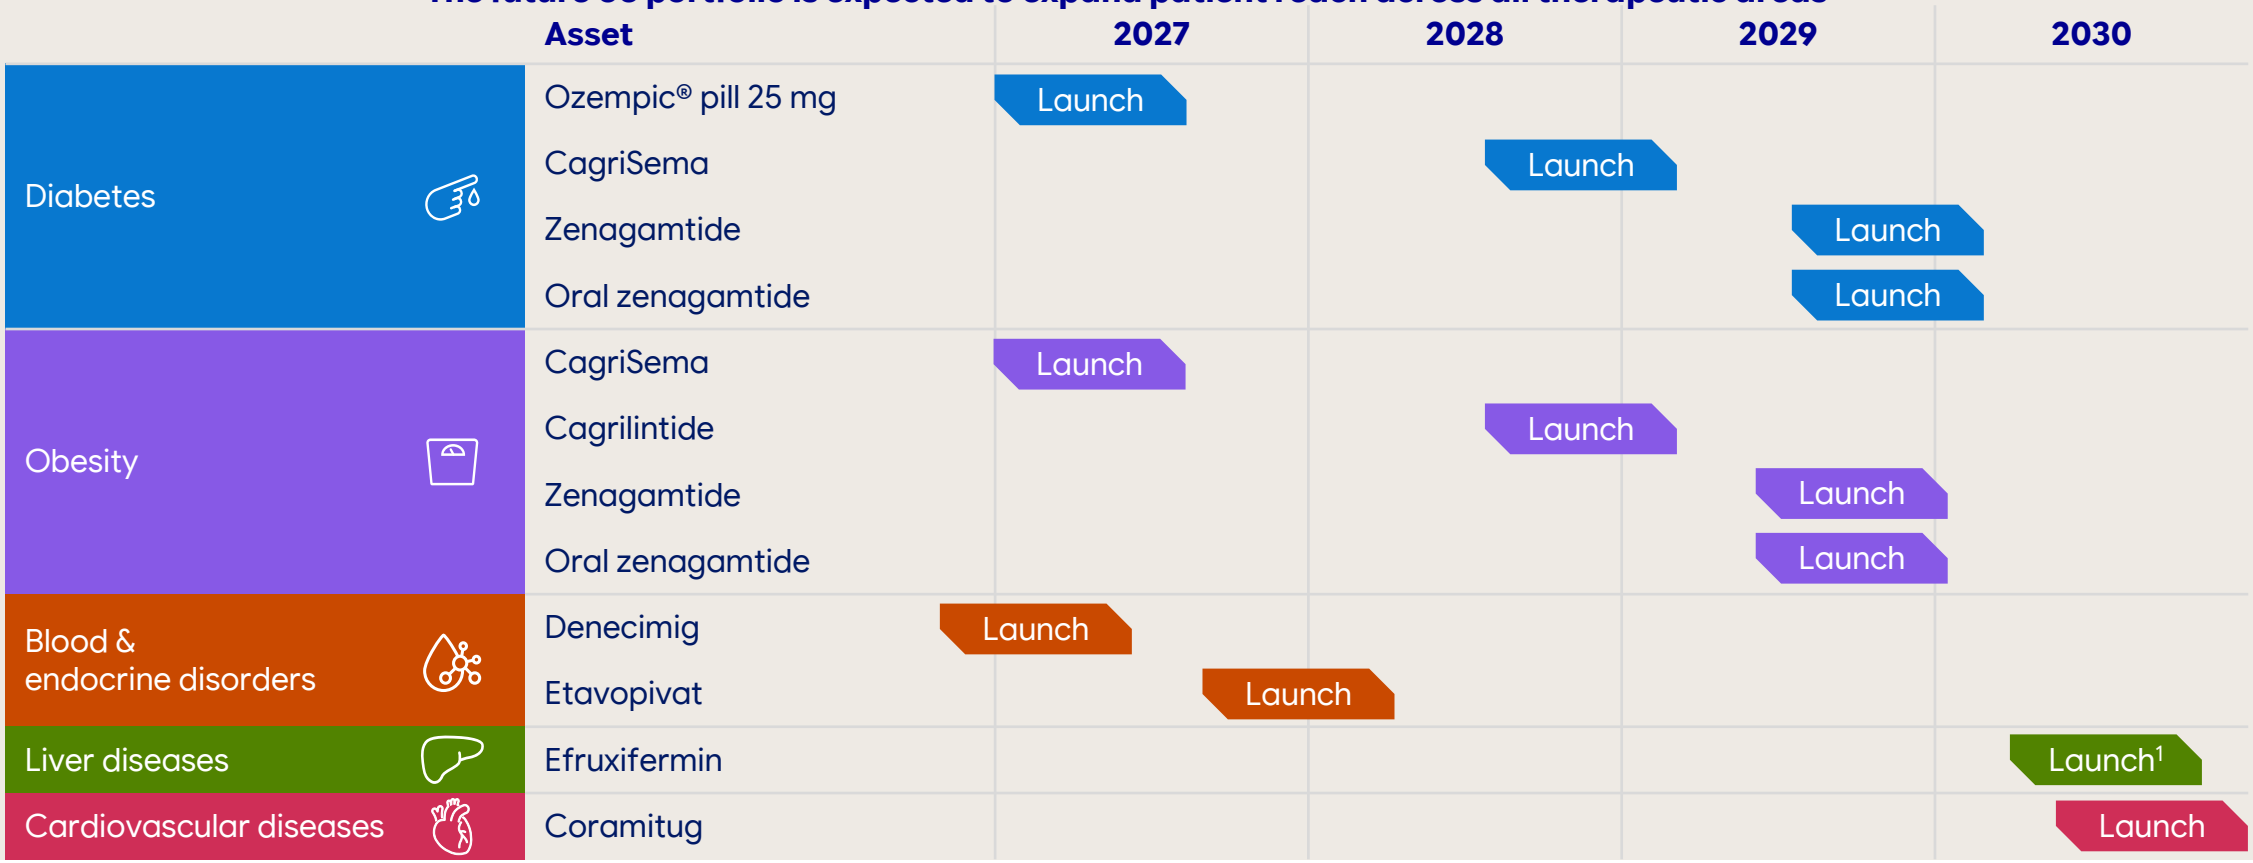

>60% of Ozempic® pill NBRx are naïve to GLP-1s

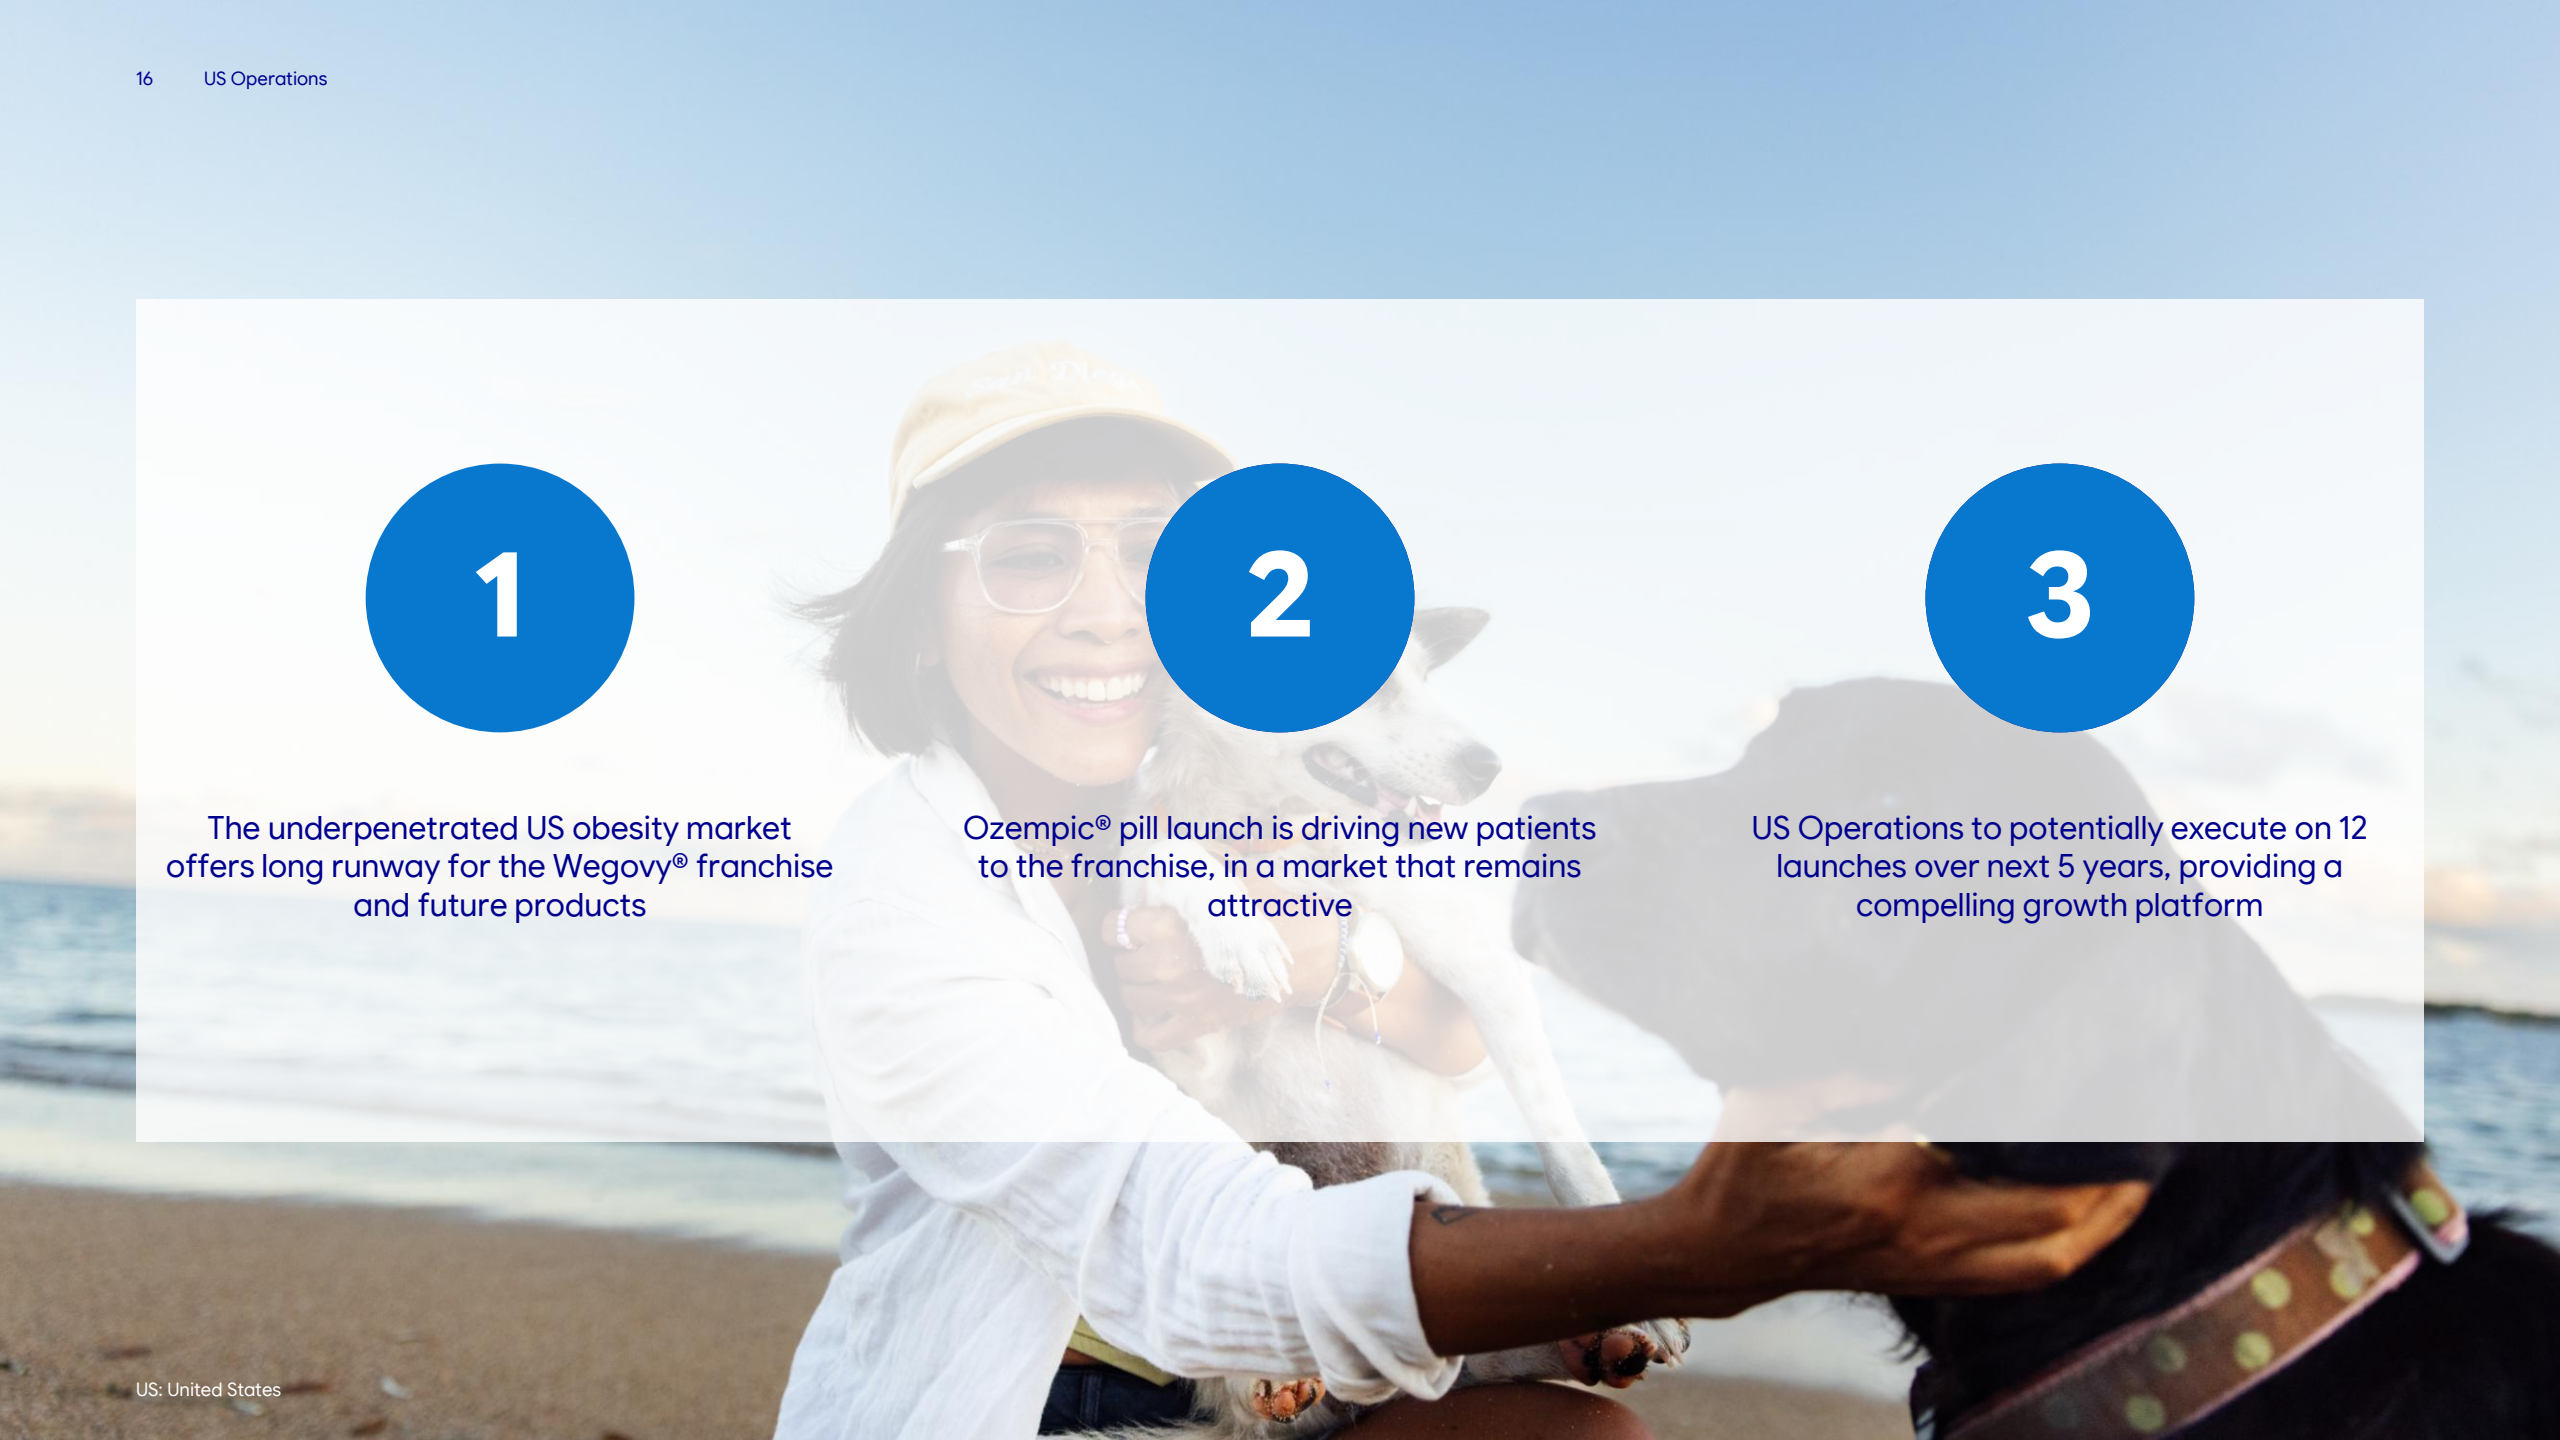

GLP-1: Glucagon-like peptide-1; NBRx: New-to-brand prescription
Note: Patients transitioning from Rybelsus® to Ozempic® pill are not counted as an NBRx
Source: IQVIA Xponent, week ending 8/21/2026; IQVIA LRx NBRx, data from launch through week ending 8/21/2026

US Operations is set to execute on up to 12 potential launches over the next 5 years

The future US portfolio is expected to expand patient reach across all therapeutic areas

[1]Expected launch of Fibrosis stage 4 indication
US: United States
Note: Expected timing and qualification of R&D, commercial and regulatory milestones for inclusion in this table are based on current assessment, which are subject to change

1

The underpenetrated US obesity market offers long runway for the Wegovy® franchise and future products

2

Ozempic® pill launch is driving new patients to the franchise, in a market that remains attractive

3

US Operations to potentially execute on 12 launches over next 5 years, providing a compelling growth platform

US: United States
