Global Manufacturing & Supply

CMD26

Capital Markets Day

21 September

Kasper Bødker Mejlvang
EVP, Global Manufacturing & Supply

Forward-looking statements

Novo Nordisk's statutory Annual Report 2025, Form 20-F, any quarterly financial reports, the materials displayed and other information provided (orally or in writing) at this Capital Markes Day as well as written information released, shown, or oral statements made, to the public in the future by or on behalf of Novo Nordisk, may contain certain forward-looking statements relating to the operating, research & development, financial and sustainability performance and results of Novo Nordisk and/or the industry in which it operates.

Forward-looking statements can be identified by the fact that they do not relate to historical or current facts and include guidance. Words such as 'believe', 'expect', 'may', 'will', 'plan', 'strategy', 'transition plan', 'prospect', 'aspiration', 'ambition', 'upcoming', 'become', 'foresee', 'estimate', 'project', 'anticipate', 'can', 'intend', 'target' and other words and terms of similar meaning, as they relate to Novo Nordisk or our management, are intended to identify forward-looking statements. Examples of such forward-looking statements include, but are not limited to:

- Statements of targets, future guidance, (transition) plans, objectives, ambitions, aspirations or goals for future operations, including those related to operating, financial and sustainability matters, Novo Nordisk's products, product research, product development, product introductions and product approvals as well as cooperation in relation thereto;
- Statements containing projections of or targets for revenues, costs, income (or loss), earnings per share, capital expenditures, dividends, capital structure, net financials and other financial measures;
- Statements regarding future economic performance, future actions and outcome of contingencies, such as legal proceedings; and
- Statements regarding the assumptions underlying or relating to such statements.

By their very nature, forward-looking statements involve risks, uncertainties and assumptions, both general and specific, and actual results may differ materially from those contemplated, expressed or implied by any forward-looking statement.

Factors that may affect future results include, but are not limited to, global as well as local political, economic and environmental conditions, such as interest rate and currency exchange rate fluctuations or climate change, delay or stoppage or failure of projects related to clinical trial conduct or research and/or development, unplanned loss of patents, interruptions of supplies and production, including as a result of interruptions or delays affecting supply chains on which Novo Nordisk relies, shortages of supplies, including energy supplies, product recalls, unexpected contract breaches or terminations, government-mandated or market-driven price decreases for Novo Nordisk's products, introduction of competing products, reliance on information technology including the risk of cybersecurity breaches (Novo Nordisk has experienced events of IT security breaches in the past), Novo Nordisk's ability to successfully market current and new products, exposure to product liability and legal proceedings and investigations, changes in governmental laws and related interpretation thereof, including on reimbursement, intellectual property protection and regulatory controls on testing, approval, manufacturing and marketing, and taxation changes, including changes in tariffs and duties, perceived or actual failure to adhere to ethical marketing practices, investments in and divestitures of domestic and foreign companies, unexpected growth in costs and expenses, strikes and other labour market disputes, failure to recruit and retain the right employees, failure to maintain a culture of compliance, epidemics, pandemics or other public health crises, effects of domestic or international crises, civil unrest, war or other conflict and factors related to the foregoing matters and other factors not specifically identified herein.

For an overview of certain risks that could adversely affect Novo Nordisk's results or the accuracy of its forward-looking statements , reference is made to 'Risks management' in the Annual Report 2025.

None of Novo Nordisk or its officers or employees accept any responsibility for the future accuracy of its forward-looking statements.

Unless required by law, Novo Nordisk has no duty and undertakes no obligation to update or revise any forward-looking statement, whether as a result of new information, future events, or otherwise.

Significant expansion of production footprint will deliver on commercial opportunities and pipeline acceleration

Top 5 CAPEX investments

Kalundborg, DK

59 bDKK
(~9 bUSD)
invested since 2021

Clayton, US

40 bDKK
(~6 bUSD)
invested since 2016

Hillerød, DK

19 bDKK
(~3 bUSD)
invested since 2023

Chartres, FR

17 bDKK
(~3 bUSD)
invested since 2023

Montes Claros, BR

8 bDKK
(~1 bUSD)
invested since 2025

Operational timing

BR: Brazil; CAPEX: Capital expenditure; DK: Denmark; FR: France; US: United States
Note: Operational timing (when first product is produced and validated following the expansion). Expected timing and qualification of infrastructural, commercial and regulatory milestones for inclusion in this table are based on current assessment, which is subject to change

Manufacturing strategy focuses on flexible, scalable, and cost competitive production

Fierce competition

Shorter lead times and launch readiness

Consumer-like expectations

More variants, channels and delivery options

Complex pipeline

More modalities, devices and dose forms

Supply resilience

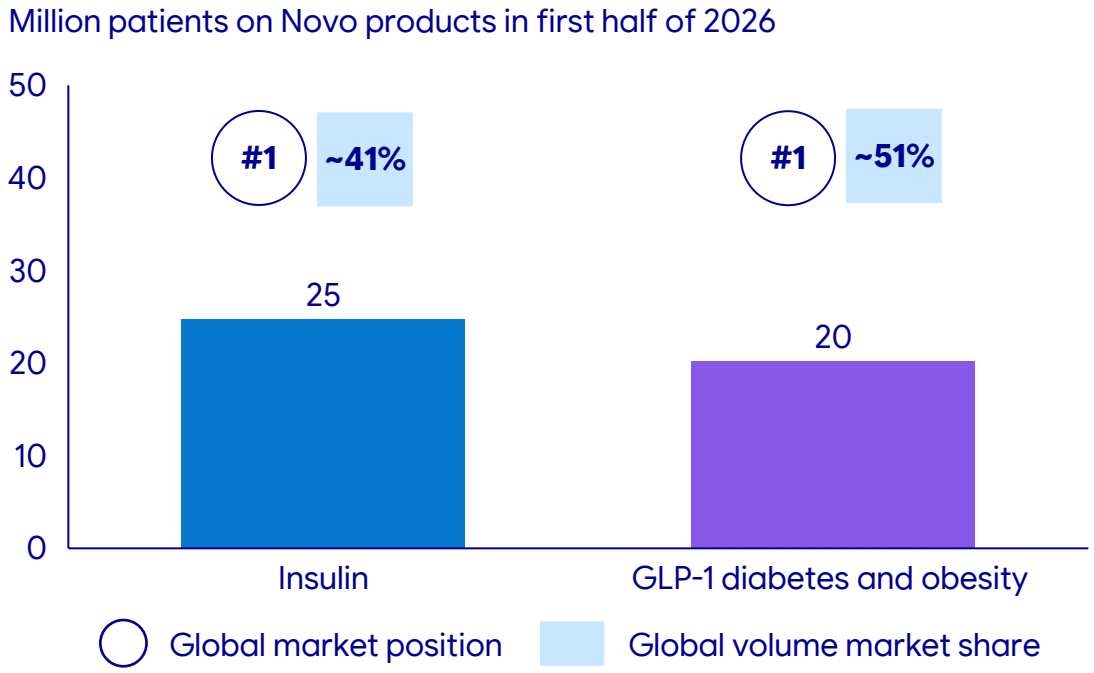

Flexible capacity across markets and products

Novo's manufacturing capabilities provide a competitive advantage

Decades of expertise in large-scale manufacturing

- Large yeast-based production network with significant scale advantages built on 100+ years of experience
- In-house engineering, process expertise and continuous yield optimisation accelerated by AI
- Industry leading product quality and manufacturing reliability
- Building new capabilities within synthetic manufacturing through acquisition

World-leading scale in insulin and GLP-1 manufacturing

Across Novo's API sites globally, average capacity has increased more than 3x compared to original design capacity

API: Active pharmaceutical ingredient; GLP-1: Glucagon-like peptide-1; MAT: Moving annual total
Source: Insulin and GLP-1 diabetes patient reach is based on MAT ex-factory Novo volumes and WHO's Defined Daily Dose; Obesity patient reach based on MAT ex-factory Novo volumes and internal daily doses; Global volume market share based on IQVIA, MAT Jun 26

Manufacturing setup enables faster development decisions and shorter time to market

Accelerating innovation

R&D sets the target › Faster development › Manufacturing delivers

CMC enabling 2030 pipeline targets

≥ 15
annual phase first human doses

≤5 years[1]
first human dose → submission

How manufacturing makes it possible

- Early involvement
- Flexibility through partnerships
- Streamlined external partner collaboration

Enabling commercial success

Wegovy® pill US launch fastest ever
14 days from approval to launch

Accelerated timelines of Awiqli® launches
expected to launch in >40 countries by 2027

Uptake of Wegovy® pill in US
surpassed 7 million prescriptions in 34 weeks after launch

AI-enabled process acceleration across GMS
to drive faster response times

GMS supports patient access by ensuring reliable supply, launch readiness and fast execution

[1]For peptides in obesity and diabetes therapy areas
CMC: Chemistry, manufacturing and controls; GMS: Global Manufacturing & Supply; US: United States
Source: Prescription data for Wegovy® pill is an estimate based on internal self-pay data and IQVIA Xponent reporting, as of 08/28/2026

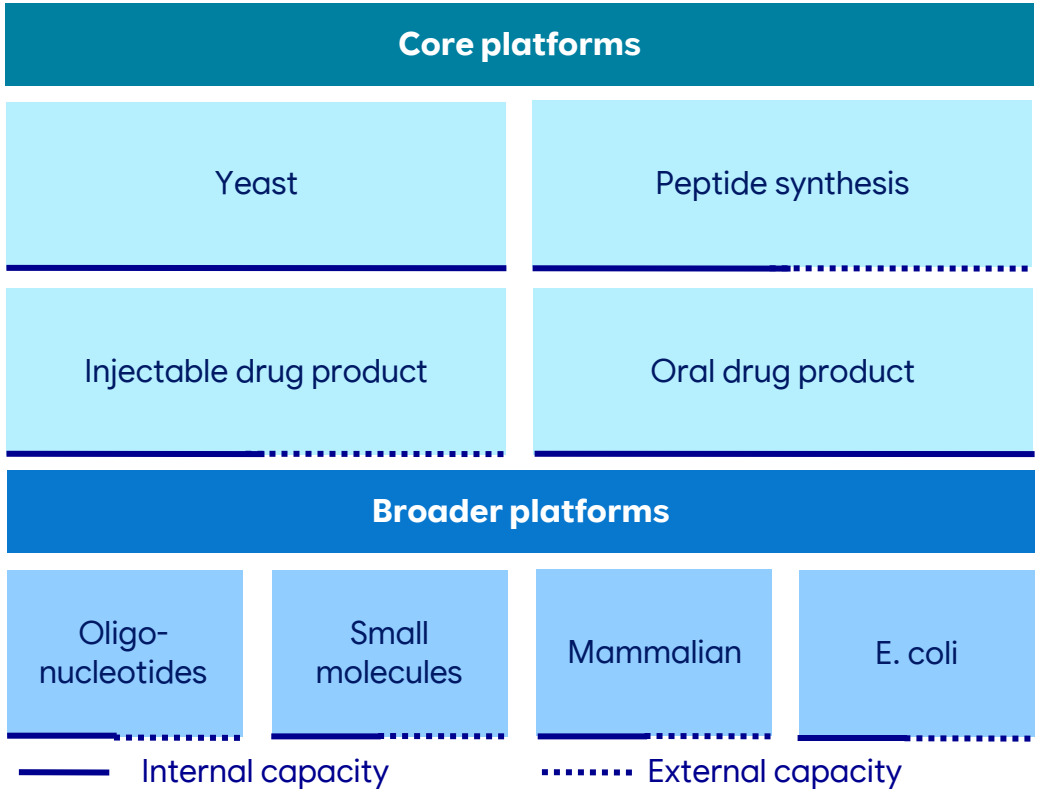

High-volume platforms provide flexibility and ample capacity to meet future demand

Flexible device and presentation platforms support a more consumer-driven market

Oral tablets	Vial & syringe	Cartridge Reusable	Cartridge Prefilled
			

	2021	2025	Future
Oral tablets produced	Index 100	Index ~500	↗
Sema FlexTouch® produced	Index 100	Index ~350	↗

Multiple manufacturing platforms to support R&D and enable commercial launches across therapeutic areas

Sema: semaglutide
Source: Novo data on file

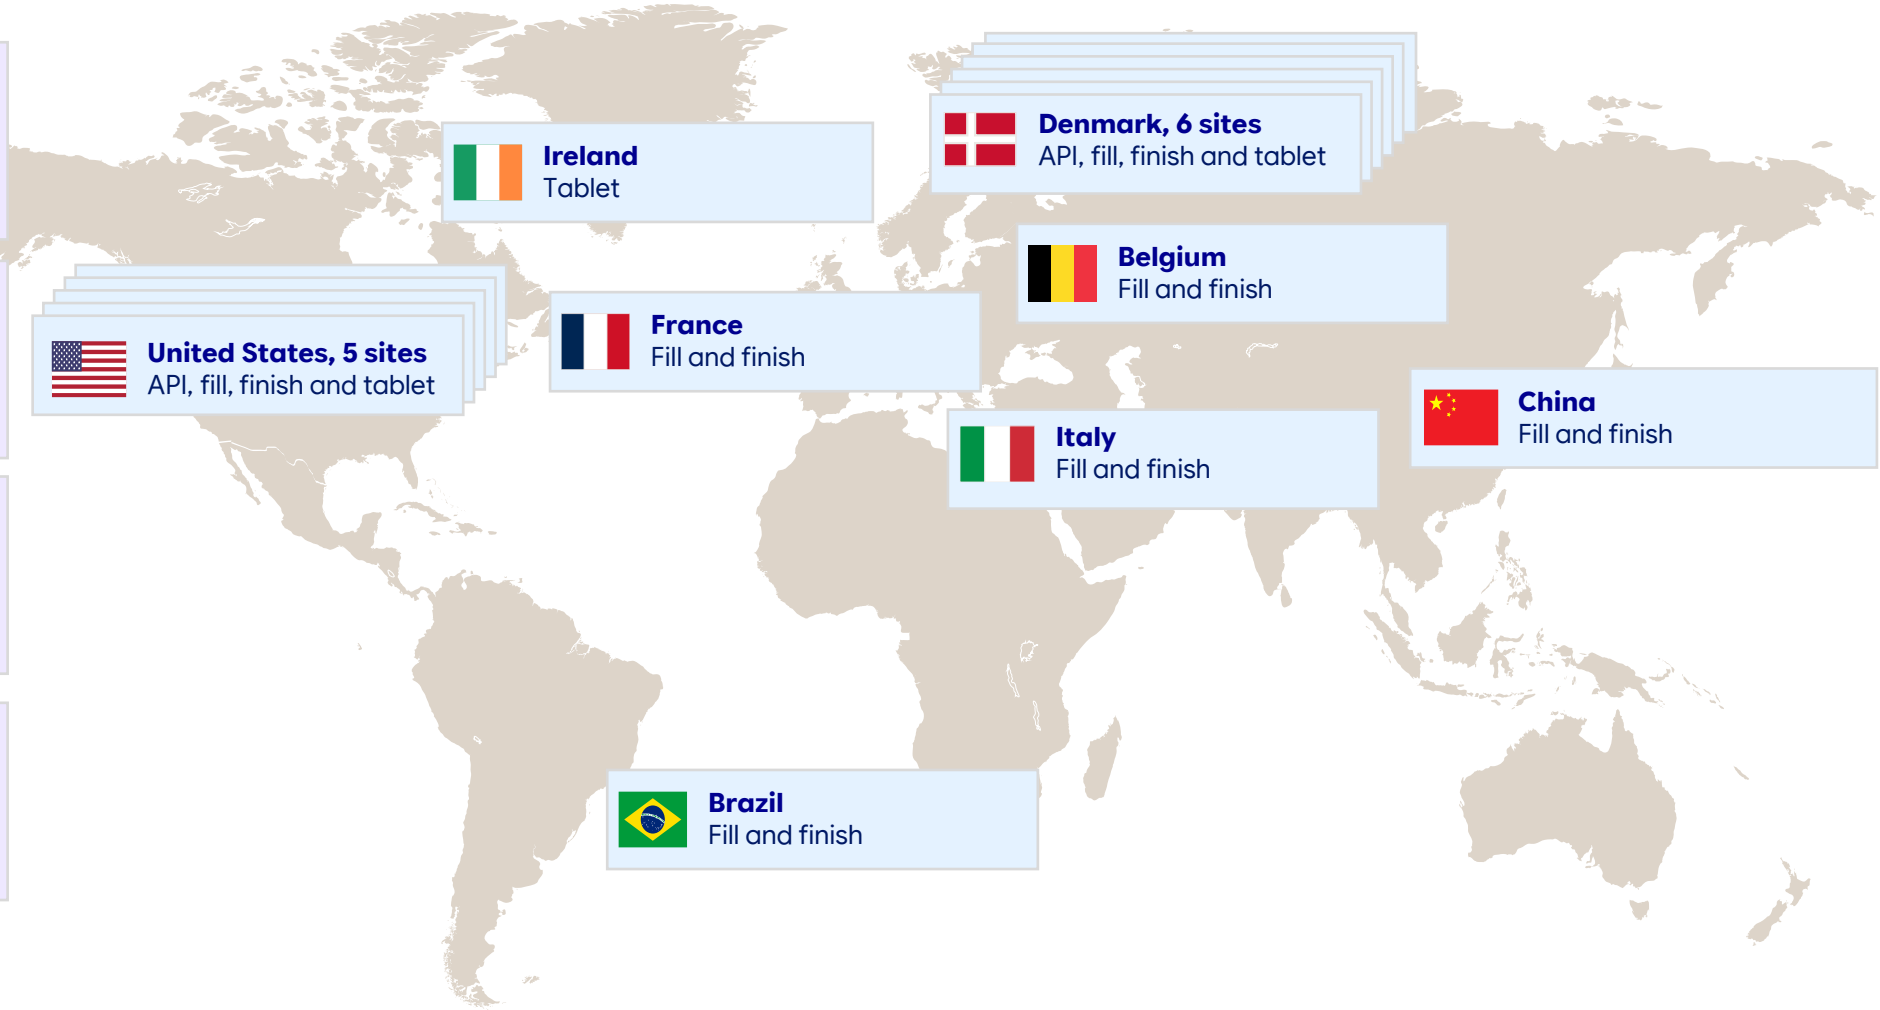

Manufacturing network is fit for future demand

7
API sites

11
Fill and finish sites

3
Tablet sites

>25
partnerships

API: Active pharmaceutical ingredient
Note: Overview reflecting strategic sites only

A significant commitment to US patients, people and the future

Novo US manufacturing

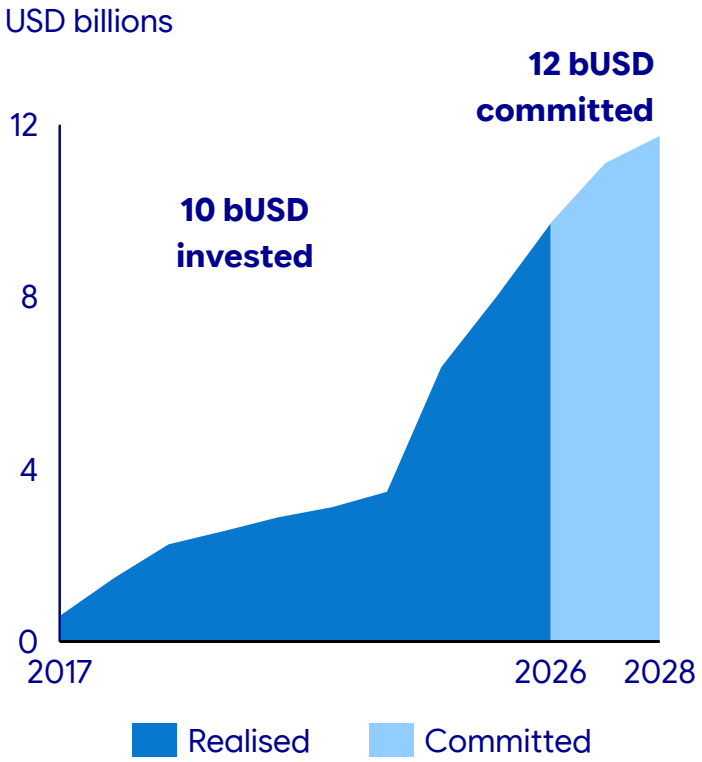

5 manufacturing sites

6 partnerships

>400,000 m² manufacturing footprint (facilities)

>10 bUSD CAPEX in manufacturing expansions from 2017-2026

Strong commitment to the US

Five manufacturing sites across the US

Building capacity for the future

- ✓ Expanding capacity to serve more patients
- ✓ End-to-end US supply chain for Wegovy® pill
- ✓ Strategically located sites enabling supply security and operational resilience

CAPEX: Capital expenditure; US: United States
Source: Novo data on file

Clear roadmap to scale oral capacity to meet market demand

Roadmap to scale oral capacity

1. Scaling API production	2. Scaling tabletting	3. Cost competitiveness
✓ CAPEX invested	✓ Experience in Måløv since 2019	✓ New oral formulations to improve bioavailability
✓ PPV[1] validated	✓ Athlone build-out	✓ Downstream yield optimisation
✓ CMO optionality	✓ Durham expansion	

From marketed products to future oral pipeline scale

Wegovy® PILL

Oral zenagamtide

ACSL5i

RYBELSUS® semaglutide tablets

OZEMPIC® PILL

Oral amylin 355

Oral high-yield GLP-1

Significant scaling towards 2030 expected

TODAY

~1.5 million people on Novo oral obesity medications

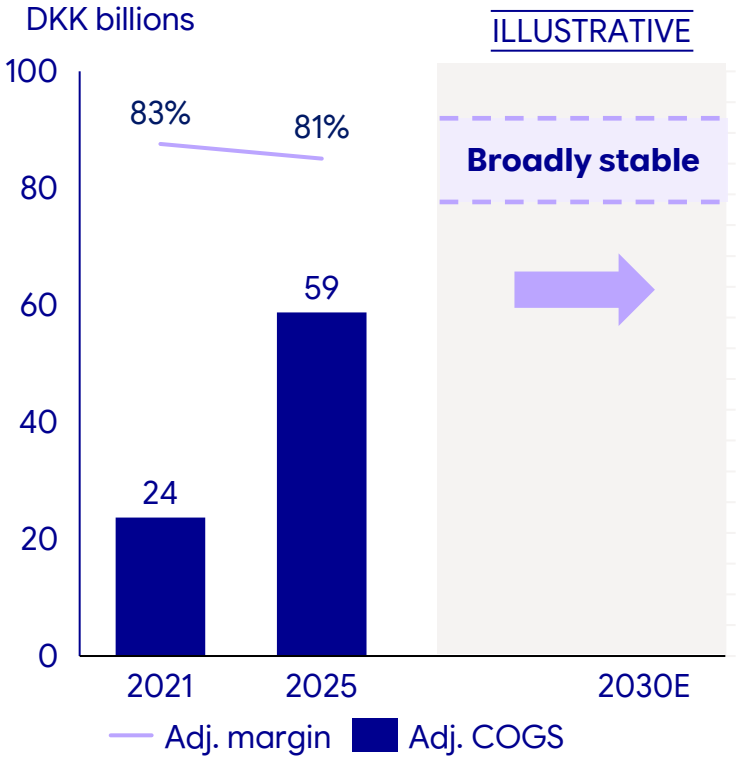

2030E

Scale capacity to be able to serve **10x** more people with obesity on oral GLP-1

[1] PPV: Purification plant five, latest semaglutide purification plant located in Kalundborg
ACSL5i: Acyl-CoA synthetase 5 inhibitor; API: Active pharmaceutical ingredient; CMO: Contract manufacturing organization; E: Estimate; CAPEX: Capital expenditure; GLP-1: Glucagon-like peptide-1
Note: Måløv, Athlone and Durham refers to Novo sites
Source: IQVIA Xponent as of Aug 2026, IQVIA MIDAS as of Jul 2026

Renewed focus on productivity to sustain cost competitiveness

Ambition to keep adjusted gross margin broadly stable

Continuous focus on lowering unit cost and improving productivity

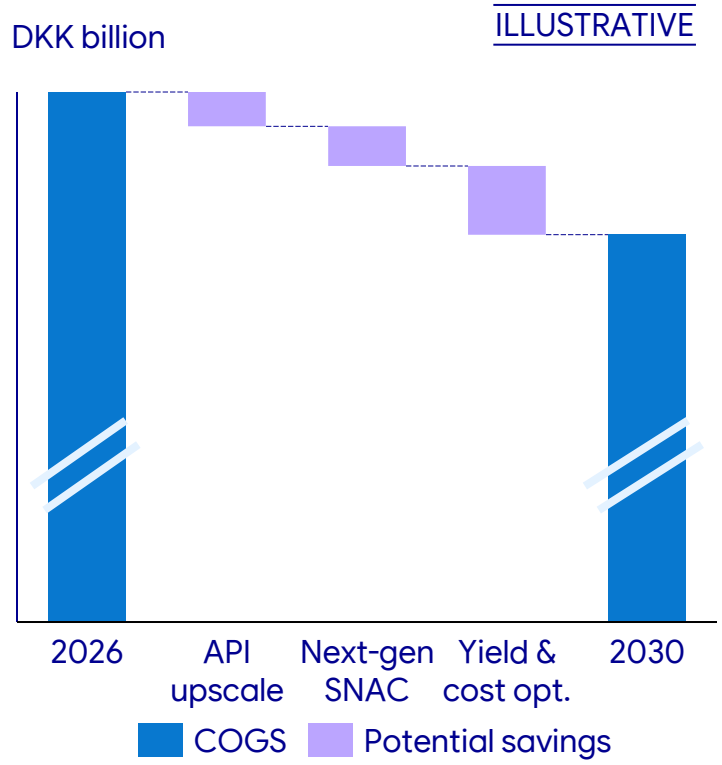

API optimisation
Economies of scale and optimisations across facilities

Formulation
New oral pill formulations with improved efficiency

Supply network optimisation
Right sizing

Increasing efficiency
eg deploying AI to accelerate automation and reduce scrap

Optimised Wegovy® pill COGS

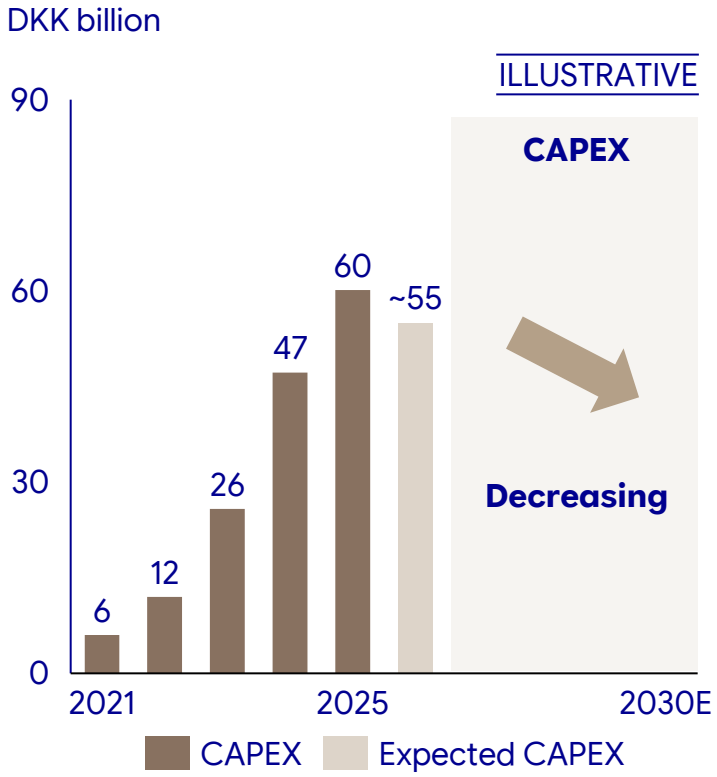

API: Active pharmaceutical ingredient; COGS: Cost of goods sold; E: Expected; opt.: Optimisation; SNAC: salcaprozate sodium (absorption enhancer)
Note: The estimates do not constitute Novo's financial outlook or guidance on growth or performance; Next-gen SNAC refers to bioavailability improvements with next generation(s) of the technology
Source: Novo data on file

Strong foundation for future growth and value creation

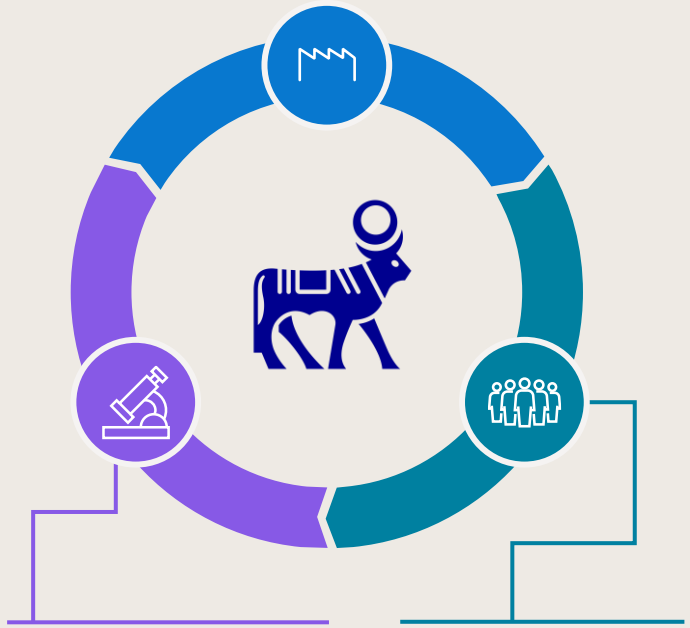

From capacity build-out to network optimisation and value creation

Build	Capacity expansion
Ramp	Bring assets online
Optimise	Productivity and network optimisation

CAPEX-to-sales ratio expected to decline towards industry average

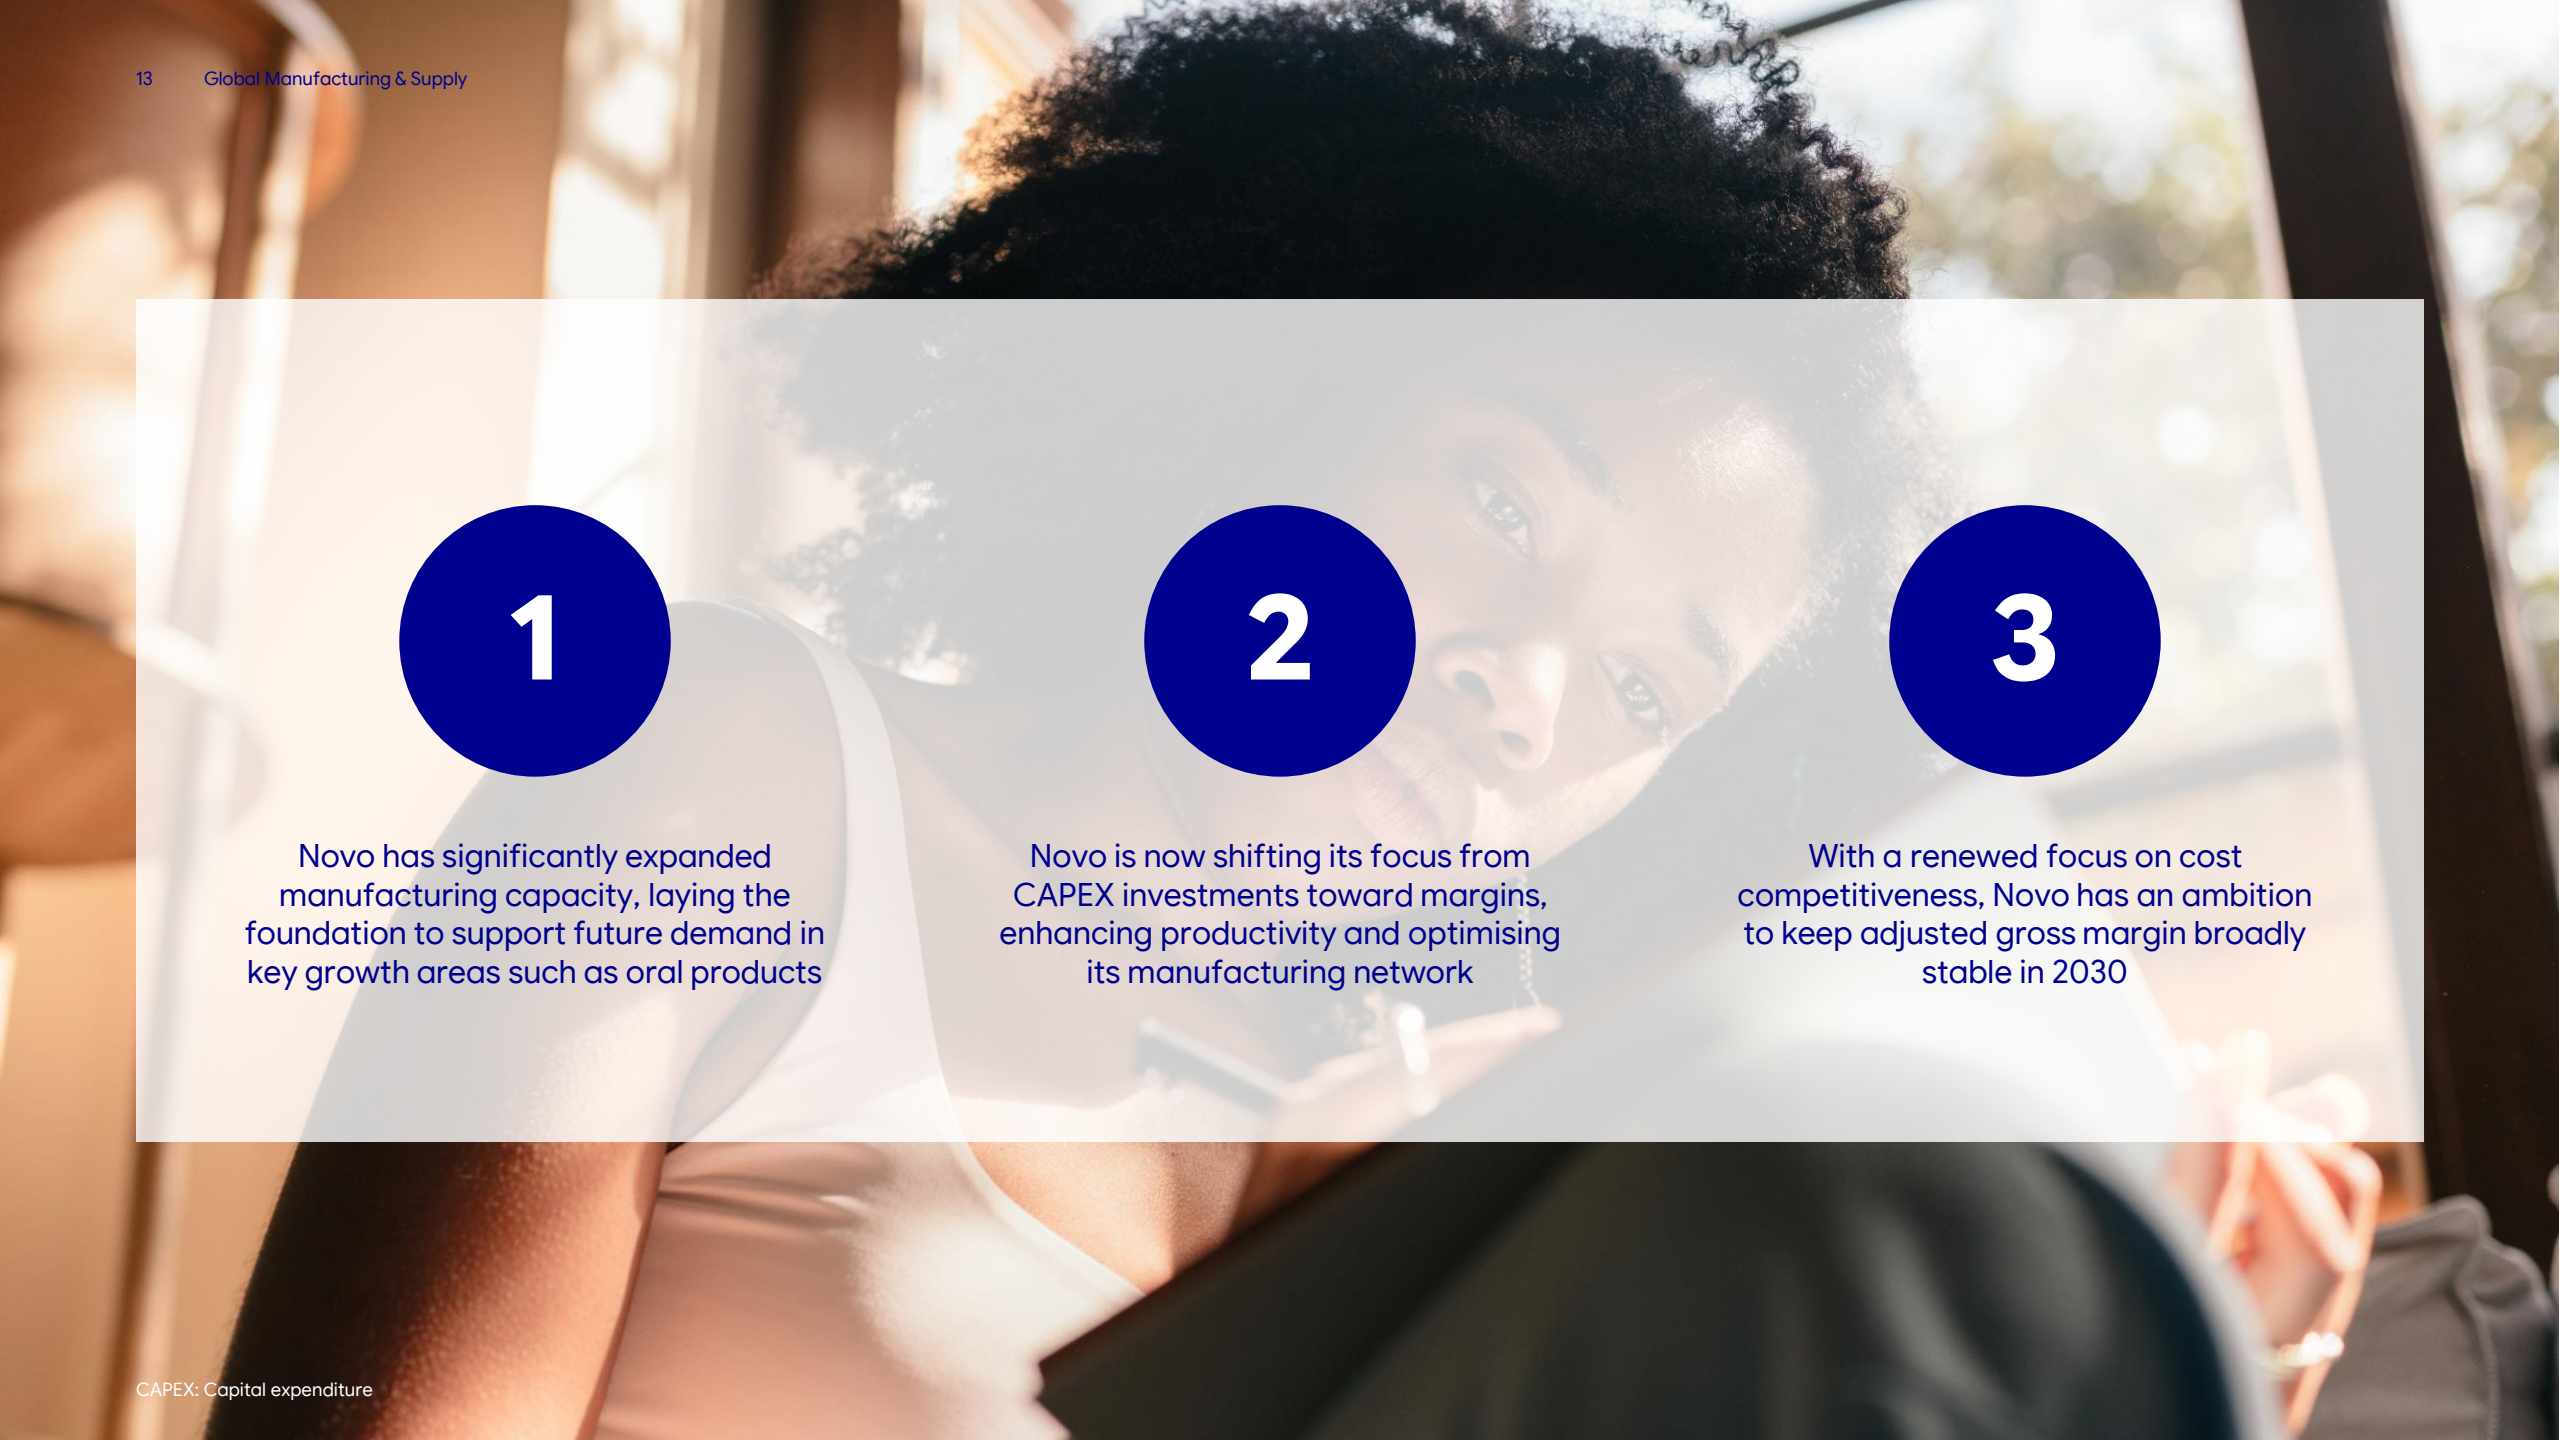

GMS supports both Novo's R&D and commercial efforts

R&D
Clinical trial supply and launch readiness

Commercial
Reliable supply and competitive costs

CAPEX: Capital expenditure; E: Expected; GMS: Global Manufacturing & Supply
Source: Novo data on file

1

Novo has significantly expanded manufacturing capacity, laying the foundation to support future demand in key growth areas such as oral products

2

Novo is now shifting its focus from CAPEX investments toward margins, enhancing productivity and optimising its manufacturing network

3

With a renewed focus on cost competitiveness, Novo has an ambition to keep adjusted gross margin broadly stable in 2030

CAPEX: Capital expenditure
