	30 June 2026 (CHF m)	31 December 2025 (CHF m)	% change (CHF)	% change (CER)
Net debt	(22,071)	(16,160)	+37	+33
Capitalisation	68,521	69,516	–1	–2
– Debt	31,805	31,636	+1	–1
– Equity	36,716	37,880	–3	–3

CER (constant exchange rates): The percentage changes at constant exchange rates are calculated using simulations by reconsolidating both the 2026 and 2025 results at constant exchange rates (the average rates for the year ended 31 December 2025). For the definition of CER see page 84.

Core results and Core EPS (earnings per share): These exclude non-core items such as global restructuring plans and amortisation and impairment of goodwill and intangible assets. This allows an assessment of both the actual results and the underlying performance of the business. A full income statement for the Group and the operating results of the divisions are shown on both an IFRS and core basis. The core concept is fully described on pages 77–80 and reconciliations between the IFRS and core results are given there.

Free cash flow is used to assess the Group's ability to generate the cash required to conduct and maintain its operations. It also indicates the Group's ability to generate cash to finance dividend payments, repay debt and to undertake merger and acquisition activities. The free cash flow concept is used in the internal management of the business. The free cash flow concept is fully described on pages 80–82 and reconciliations between the IFRS cash flow and free cash flow are given there.

Financial Review

Roche Group results

In the first half of 2026 the Roche Group reported sales growth of 6% at CER (decline of 2% in CHF, increase of 8% in USD), driven by demand for innovative medicines and diagnostics. Core operating profit grew by 10% at CER (decrease of 1% in CHF) and Core EPS increased by 9% at CER (decrease of 2% in CHF) due to the increased sales and other revenue, coupled with cost management. IFRS operating profit was 6% lower in CHF and IFRS EPS (diluted) decreased by 8% in CHF due to the additional effects of the appreciation of the Swiss franc and intangible asset impairment.

The appreciation of the Swiss franc against many currencies, notably the US dollar, compared to the first half of 2025, had an adverse net impact on the results expressed in Swiss francs of 8 percentage points on sales and 11 percentage points on core operating profit and Core EPS. The IFRS results were additionally impacted by intangible asset impairment due to decisions to stop the development of the respective compounds.

Sales in the Pharmaceuticals Division were CHF 23.6 billion (2025: CHF 24.0 billion), an increase of 6% at CER (decrease of 1% in CHF, increase of 8% in USD). Xolair was the major growth driver, with Hemlibra, Ocrevus and Phesgo also significantly contributing to the growth. Sales of Vabysmo, Evrysdi and Polivy also continued to increase. This growth was partially offset by lower Perjeta sales due to the ongoing conversion of patients to Phesgo as well as the impact of biosimilar competition for Actemra/RoActemra.

Sales in the Diagnostics Division were CHF 6.7 billion (2025: CHF 7.0 billion), an increase of 3% at CER (decrease of 3% in CHF, increase of 6% in USD), driven by growth in demand for immunodiagnostic and clinical chemistry products as well as pathology and molecular solutions.

Divisional operating results for the six months ended 30 June 2026 in millions of CHF

	Pharmaceuticals	Diagnostics	Corporate	Group
Sales	23,629	6,735	–	30,364
Core operating profit	12,532	1,180	(1,856)	11,856
– Margin, % of sales	53.0	17.5	–	39.0
Operating profit	10,838	870	(2,037)	9,671
– Margin, % of sales	45.9	12.9	–	31.9
Operating free cash flow	8,428	14	(2,178)	6,264
– Margin, % of sales	35.7	0.2	–	20.6

Divisional operating results – Development of results compared to the six months ended 30 June 2025

	Pharmaceuticals	Diagnostics	Corporate	Group
Sales				
– % change at CER	+6	+3	–	+6
Core operating profit				
– % change at CER	+10	+6	+8	+10
– Margin: percentage point change	+2.0	+0.6	–	+1.7
Operating profit				
– % change at CER	+3	+43	+4	+6
– Margin: percentage point change	–1.3	+3.7	–	0
Operating free cash flow				
– % change at CER	+11	–	+2	+21
– Margin: percentage point change	+1.6	+4.8	–	+2.7

The Pharmaceuticals Division's core operating profit increased by 10% at CER, while remaining stable in CHF. Other revenue was 20% higher, due to milestone income at Chugai. Cost of sales increased by 5%, growing at a lower rate than sales, reflecting stable manufacturing costs. Expenses for collaboration and profit-sharing agreements were higher based on sales of Xolair. Royalty expenses also increased related to the sales of Ocrevus and Evrysdi. Research and development costs were 1% higher than in the first half of 2025. The Oncology therapeutic area remained the primary focus of spending, notably for giredestrant, divarasib and cevostamab. Increased spending for the development of recently acquired assets was offset by savings from resource optimisation initiatives and a reduction in costs based on portfolio prioritisation. Selling, general and administration costs were stable compared to the prior year, as increased marketing and distribution spending was offset by lower administrative expenses following the transfer of certain legal functions from the Pharmaceuticals Division to Corporate.

In the Diagnostics Division, core operating profit increased by 6% at CER (decrease of 6% in CHF). The sales growth and the increase in other revenue resulting from a cross-licensing agreement were partially offset by the increase of 5% in cost of sales, which was related to the growth of the installed instrument base, new launches and US tariffs.

The Group's core operating profit was 10% higher at CER (decrease of 1% in CHF), reflecting the growth in CER of sales and other revenue, as well as the costs for research and development, and selling, general and administration expenses increasing at a lower rate than the sales increase at a Group level.

The core basis excludes non-core items such as global restructuring costs, amortisation and impairment of goodwill and intangible assets, legal and environmental cases, mergers and acquisitions and alliance transactions. The IFRS operating profit decreased by 7% in CHF in the Pharmaceuticals Division largely due to the higher intangible asset impairments compared to the first half of 2025. In the Diagnostics Division, IFRS operating profit increased by 21% in CHF due to lower global restructuring plan charges and the increase in other revenue. The results for the Group included CHF 1.0 billion for goodwill and intangible asset impairment, CHF 0.8 billion charges for restructuring costs and CHF 0.4 billion for intangible asset amortisation. In total the Group's IFRS operating profit was 6% lower in CHF compared to the first half of 2025 due to the lower level of impairment in the first half of 2025 and, in CHF terms, also to the appreciation of the Swiss franc. Impairment of goodwill and intangible assets was CHF 1.0 billion (2025: CHF 0.2 billion) following decisions to stop the development of the respective compounds.

Financing costs remained stable (CER) at CHF 0.6 billion. The Group's effective core tax rate was 17.5% compared to 17.4% in the first half of 2025.

Net income on a core basis increased by 11% at CER (decrease of 1% in CHF) to CHF 9.2 billion and Core EPS increased by 9% at CER (decrease of 2% in CHF) to CHF 10.85, due to the increased sales and other revenue as well as cost management. Net income on an IFRS basis decreased by 6% in CHF to CHF 7.3 billion and IFRS EPS (diluted) decreased by 8% in CHF to CHF 8.52, with both measures being additionally impacted by the appreciation of the Swiss franc and the impairment of goodwill and intangible assets.

Operating free cash flow was CHF 6.3 billion, an increase of 21% at CER (increase of 2% in CHF). For the Pharmaceuticals Division the higher underlying cash generation of the business was partly impacted by a decrease in payables. For the Diagnostics Division the improved cash flow was mainly due to a lower increase in net working capital than in the first half of 2025. The free cash flow was CHF 4.2 billion, an increase of 58% at CER (increase of 26% in CHF), being additionally impacted by lower taxes paid due to US tax legislation changes and the timing of tax payments.

a) See pages 77–80 for the definition of core results and Core EPS.

Competition from biosimilar and generic medicines

The introduction of a generic, biosimilar or non-comparable biologic version of the same or a similar medicine usually results in a significant reduction in net sales for the relevant product, as other manufacturers typically offer their versions at lower prices.

Avastin, Herceptin and MabThera/Rituxan. The Group's basic, primary patents for these three products have expired worldwide. Interim sales, including regional breakdowns, for Avastin, Herceptin and MabThera/Rituxan are disclosed in the Pharmaceuticals Division's operating results and are summarised in the table below. The year-on-year movements were also driven by regular price and volume changes. Biosimilar competition is only one factor in the overall picture.

Total interim Avastin, Herceptin and MabThera/Rituxan sales

	2026 (CHF m)	2025 (CHF m)	% change (CHF)	% change (CER)	% divisional sales 2026	% divisional sales 2025
United States	621	664	–6	+3	2.6	2.8
Europe	233	246	–5	–3	1.0	1.0
Japan	44	87	–49	–41	0.2	0.4
International	587	715	–18	–13	2.5	2.9
Total sales	**1,485**	**1,712**	**–13**	**–7**	**6.3**	**7.1**

The first biosimilar versions of Herceptin and Avastin were launched in the US from mid-2019 and the first biosimilar versions of MabThera/Rituxan in late 2019. In Europe the first biosimilar versions of MabThera/Rituxan and Herceptin were launched from mid-2017 and from mid-2018, respectively, and are now marketed in most EU countries. The first biosimilar versions of Avastin came to market in Europe from mid-2020. The first biosimilar versions of MabThera/Rituxan and Herceptin were launched in Japan in 2018 and the first biosimilar versions of Avastin in late 2019. Sales of these three products in Japan were impacted by government price cuts as well as biosimilar competition. In the International region, biosimilar versions of all three products have been launched in many countries and this, together with the impacts of regular price and volume changes, has led to the decline in sales.

Actemra/RoActemra. The Group's basic, primary patents have expired in the US and the EU. The first biosimilar versions of Actemra/RoActemra came to market in the EU in the fourth quarter of 2023 and in the US in the second quarter of 2024. Global interim sales of Actemra/RoActemra were CHF 1,074 million (2025: CHF 1,279 million).

Xolair. The Group's basic, primary patents have expired, and the formulation patent expired in the US in late 2025. Based on publicly available information, the Group currently anticipates that the first biosimilar versions could come to market in the US in the second half of 2026. Interim sales of Xolair in the US in 2026 were CHF 1,673 million.

Perjeta. The Group's basic, primary patents in the US and the EU expired in the second quarter of 2025. Based on publicly available information, the Group currently does not anticipate that the first biosimilar versions would come to market in the US before 2028 and in Europe before 2027. Interim global sales of Perjeta in 2026 were CHF 1,389 million.

Mergers and acquisitions

SAGA. On 28 May 2026 the Group acquired a 100% controlling interest in SAGA Dx, Inc. ('SAGA'), a privately owned US company based in Morrisville, North Carolina. With the acquisition, the Group obtained access to SAGA's tumour-informed molecular residual disease platform. The total consideration was USD 408 million (equivalent to CHF 321 million), of which USD 345 million was paid in cash on the acquisition date and USD 63 million arose from a contingent consideration arrangement.

Future business combinations. On 7 May 2026 the Group announced that it had entered into a definitive merger agreement to acquire a 100% controlling interest in PathAI, Inc. ('PathAI') for a cash consideration of approximately USD 750 million and additional payments of up to USD 300 million from a contingent consideration arrangement. With this acquisition, the Group will obtain access to PathAI's image management system with advanced artificial intelligence analysis and workflow capabilities for pathology laboratories and the biopharmaceutical industry. The transaction is expected to close in the third quarter of 2026 and is subject to customary closing conditions.

Further details are given in Note 6 to the Interim Financial Statements.

Alliance transactions

In the first half of 2026 in-licensing and alliance transactions resulted in intangible assets of CHF 0.4 billion (2025: CHF 1.4 billion) being recognised.

On 8 June 2026 the Group announced a collaboration with Nurix Therapeutics, Inc. ('Nurix') for the co-development and co-commercialisation rights for bexobrutideg (NX-5948), a Bruton's Tyrosine Kinase degrader therapy option for people living with B-cell malignancies. Under the terms of the agreement, the Group will make an upfront payment of USD 700 million in cash. The transaction is expected to close in the third quarter of 2026.

Global restructuring plans

During the first half of 2026 the Group continued the implementation of various global restructuring plans.

Global restructuring plans: costs incurred for the six months ended 30 June in millions of CHF

	2026	2025
Global restructuring costs		
– Employee-related costs	350	553
– Site closure and other costs related to physical assets	46	32
– Divestment of products and businesses	0	0
– Other reorganisation expenses	369	438
Total global restructuring costs	**765**	**1,023**

The Pharmaceuticals Division incurred restructuring costs of CHF 346 million, primarily for research and development optimisation initiatives and a business process transformation to simplify the systems landscape. The Diagnostics Division incurred costs of CHF 239 million for initiatives to drive organisational effectiveness. Corporate costs were CHF 180 million, notably for a business process transformation to simplify the systems landscape and reduce process complexity as well as for a restructuring in informatics. Further details are given in Note 7 to the Interim Financial Statements.

Impairment of goodwill and intangible assets

The Pharmaceuticals Division recorded impairment charges to intangible assets of CHF 1.0 billion due to decisions to stop the development of the respective compounds. These charges primarily included CHF 0.4 billion for the full impairment of the product intangible asset for selnoflast (NLRP3 inhibitor), which was acquired as part of the Inflazome acquisition, CHF 0.2 billion related to the full impairment of the product intangible asset for acmopatide (CT-868), a dual GLP-1/GIP receptor agonist, acquired as part of the Carmot acquisition, and CHF 0.2 billion related to the full impairment of the product intangible asset for the PD-1-regulated IL-2 programme, acquired as part of the Good Therapeutics acquisition. There were no impairments in the Diagnostics Division. Impairment of goodwill and intangible assets in the first half of 2025 was CHF 0.2 billion. Further details are given in Notes 8 and 9 to the Interim Financial Statements.

Legal and environmental cases

There were no significant developments in the first half of 2026. Further details are given in Note 10 to the Interim Financial Statements.

Net income and earnings per share

IFRS net income, which included higher charges for the impairment of intangible assets, decreased by 6% in CHF while net income on a core basis increased by 11% at CER (decrease of 1% in CHF). Core EPS grew by 9% at CER (decrease of 2% in CHF) to CHF 10.85. The core basis excludes non-core items such as global restructuring costs, amortisation and impairment of goodwill and intangible assets, legal and environmental cases, and mergers and acquisitions and alliance transactions. The appreciation of the Swiss franc had a significant negative impact on the growth rates expressed in CHF. The amount of net income attributable to non-controlling interests increased by 8% in CHF on an IFRS basis and by 11% in CHF on a core basis due to the improved results at Chugai, including higher sales and milestone income.

Net income

	Six months ended 30 June 2026 (CHF m)	2025 (CHF m)	% change (CHF)	% change (CER)
IFRS net income	**7,325**	**7,832**	**–6**	**+6**

Net operating assets	**57,208**	**52,489**	**+9**	**+8**
Net debt	(22,071)	(16,160)	+37	+33
Lease liabilities	(1,503)	(1,555)	–3	–5
Pensions	(2,398)	(2,159)	+11	+11
Income taxes	5,094	5,053	+1	–1
Other net non-operating assets	386	212	+82	+91
Total net assets	**36,716**	**37,880**	**–3**	**–3**

Compared to the start of the year the Swiss franc depreciated against the US dollar. This had a positive translation effect on the Group's net operating assets as reported in Swiss francs, which was partially compensated by the appreciation of the Swiss franc against the Japanese yen and the natural hedge from the Group's US dollar-denominated debt. The exchange rates used are given on page 35.

Net working capital in the Pharmaceuticals Division increased, driven by a decrease in the net liability position for other receivables (payables) mainly due to the settlement of year-end payables in relation to intangible assets as well as lower employee-related accruals. Additionally, trade receivables increased due to higher sales recorded towards the end of the first half of 2026 compared to the end of 2025, particularly in some countries in the International region where there are longer payment terms. In the Diagnostics Division, the increase in net working capital was driven by a lower net liability for other receivables (payables). Trade receivables increased due to relatively higher sales in locations with longer payment terms. The increase in inventories was driven by a higher number of instruments, notably from the latest generation of serum work area systems. The decrease in trade payables and the decrease in the net liability for other receivables (payables) both arose from the settlement of year-end positions and accruals.

The increase in net debt was due to dividend payments of CHF 8.3 billion, partially offset by the free cash flow of CHF 4.2 billion. The net pension liability was higher following an increase of the limit on asset recognition of certain Swiss pension plans which more than offset the positive impact from higher plan assets in Switzerland. The net tax assets remained broadly stable.

Free cash flow

Free cash flow

	Six months ended 30 June 2026 (CHF m)	2025 (CHF m)	% change (CHF)	% change (CER)
Pharmaceuticals	8,428	8,533	–1	+11
Diagnostics	14	(232)	–	–
Corporate	(2,178)	(2,187)	0	+2
Operating free cash flow	**6,264**	**6,114**	**+2**	**+21**
Treasury activities	(494)	(558)	–11	–5
Taxes paid	(1,573)	(2,237)	–30	–24
Free cash flow	**4,197**	**3,319**	**+26**	**+58**

See pages 80–82 for the definition of free cash flow.

The Group's operating free cash flow was CHF 6.3 billion, an increase of 21% at CER (increase of 2% in CHF). In the Pharmaceuticals Division the increased cash generation from the underlying business was partially offset by decreased payables. The improvement for the Diagnostics Division was due to the lower increase in net working capital than in the first half of 2025. The free cash flow of CHF 4.2 billion, an increase of 58% at CER (increase of 26% in CHF), was additionally impacted by lower tax payments due to US tax legislation changes and the timing of tax payments. The appreciation of the Swiss franc in the first half of 2026 relative to the first half of 2025 had a significant adverse impact on the cash flows expressed in Swiss francs.

Sales overview

Pharmaceuticals Division – Interim sales by therapeutic area

	2026 (CHF m)	2025 (CHF m)	% change (CHF)	% change (CER)	% of sales 2026	% of sales 2025
Oncology/Haematology	11,964	12,147	–2	+6	50.6	50.6
– *of which Oncology*	*7,381*	*7,827*	*–6*	*+1*	*31.2*	*32.6*
– *of which Haematology*	*4,583*	*4,320*	*+6*	*+14*	*19.4*	*18.0*
Neurology	4,970	4,872	+2	+9	21.0	20.3
Immunology	3,290	3,321	–1	+8	13.9	13.8
Ophthalmology	2,107	2,148	–2	+6	8.9	9.0
Other therapeutic areas	1,298	1,497	–13	–5	5.6	6.3
Total sales	**23,629**	**23,985**	**–1**	**+6**	**100**	**100**

Sales in the Pharmaceuticals Division were CHF 23.6 billion (2025: CHF 24.0 billion), an increase of 6% at CER (decrease of 1% in CHF, increase of 8% in USD). Xolair was the major growth driver, with Hemlibra, Ocrevus and Phesgo also significantly contributing to the growth. Sales of Vabysmo, Evrysdi and Polivy also continued to increase. This growth was partially offset by lower Perjeta sales due to the ongoing conversion of patients to Phesgo as well as the impact of biosimilar competition for Actemra/RoActemra.

Sales in the Oncology/Haematology therapeutic area increased by 6% at CER, with the growth being driven by Hemlibra, Phesgo and Polivy. In Oncology, sales of Tecentriq were CHF 1.7 billion, an increase of 6%, due to positive performance in the US and in the International region, partially offset by lower sales in Europe due to continued pressure from competition. In the HER2 franchise, sales declined by 1% to CHF 4.1 billion, primarily driven by a 7% decline in Perjeta sales, reflecting the ongoing patient conversion to Phesgo, as well as lower sales of Herceptin and Kadcyla. This decrease was partially offset by an 18% growth in Phesgo sales, which reached CHF 1.3 billion. In Haematology, Hemlibra sales increased by 11% to CHF 2.5 billion, led by growth in the US and in the International region due to increased adoption in the non-inhibitor indication. Polivy sales increased by 20% to CHF 0.8 billion, primarily in the US and in the International region, partially offset by lower sales in Europe. There were lower sales of Avastin and Herceptin due to biosimilar erosion, whereas sales of MabThera/Rituxan increased as a result of market share gains against competitors in the US.

Sales in Neurology grew by 9% at CER mainly due to Ocrevus, Evrysdi and Elevidys. Ocrevus continued as the Pharmaceuticals Division's highest-selling medicine with sales of CHF 3.5 billion, an increase of 7%, driven by growth across all regions.

In the Immunology therapeutic area sales were 8% higher at CER. Xolair sales in the US were 27% higher at CHF 1.7 billion, driven by the growth in the food allergy indication and in the chronic spontaneous urticaria indication. Actemra/RoActemra sales decreased by 9% to CHF 1.1 billion due to the increasing impact of biosimilars.

Sales in Ophthalmology increased by 6% at CER. Sales of Vabysmo were 8% higher at CHF 2.1 billion with growth in all regions, primarily in the International region.

a) Total MabThera/Rituxan sales of CHF 609 million (2025: CHF 630 million) are split between the Oncology/Haematology and Immunology therapeutic areas.
b) Mircera sales include only direct sales to customers. Other sales of Mircera, such as product supply to third parties, are reported as 'Others'. Comparative 2025 information has been restated accordingly.

Ocrevus. For relapsing forms of multiple sclerosis (RMS) and primary progressive multiple sclerosis (PPMS).

Ocrevus interim regional sales

	2026 (CHF m)	2025 (CHF m)	% change (CER)	% of sales 2026	% of sales 2025
United States	2,300	2,462	+2	66.3	70.2
Europe	758	706	+10	21.8	20.1
International	412	338	+30	11.9	9.7
Total sales	**3,470**	**3,506**	**+7**	**100**	**100**

Ocrevus sales grew in CER across all regions, driven by continuous and increasing demand from both new and existing patients. The recently launched subcutaneous formulation has driven the growth in the US and in the European markets, notably in Germany, Italy, the UK and France. In the International region, sales growth was mainly due to increased patient demand for the intravenous formulation. Ocrevus remains a market leader in the treatment of multiple sclerosis.

Hemlibra. For haemophilia A.

Hemlibra interim regional sales

	2026 (CHF m)	2025 (CHF m)	% change (CER)	% of sales 2026	% of sales 2025
United States	1,313	1,324	+9	52.7	54.7
Europe	502	493	+4	20.1	20.4
Japan	171	183	+9	6.9	7.6
International	506	421	+26	20.3	17.3
Total sales	**2,492**	**2,421**	**+11**	**100**	**100**

Hemlibra sales grew in CER across all regions, due to increased adoption in the non-inhibitor indication. The US remains the largest market for Hemlibra, with sales growing by 9% driven by higher demand from new patients. Sales also grew in Europe and in the International region, supported by an accelerated switch from factor VIII treatments.

Vabysmo. For neovascular or 'wet' age-related macular degeneration (nAMD), diabetic macular oedema (DME) and macular oedema following retinal vein occlusion (RVO).

Vabysmo interim regional sales

	2026 (CHF m)	2025 (CHF m)	% change (CER)	% of sales 2026	% of sales 2025
United States	1,333	1,450	+1	64.7	70.1
Europe	386	378	+5	18.7	18.3
Japan	75	70	+26	3.6	3.4
International	265	169	+65	13.0	8.2
Total sales	**2,059**	**2,067**	**+8**	**100**	**100**

Vabysmo continued to be a key growth driver for the Pharmaceuticals Division in the first half of 2026, with growth in CER across all regions despite a competitive pricing environment. The US remained the largest market for Vabysmo as a highly prescribed drug in nAMD and DME treatments. In Europe, growth was driven by continued uptake in key markets, notably Germany, Spain and Italy. This was partially offset by the impact of pricing adjustments based on legislative changes in countries such as the UK and Switzerland, alongside competitive pressure in France. Sales also increased in Japan and in the International region, with the latter due to growing patient share in China.

Tecentriq. For extensive-stage small cell lung cancer (SCLC), initial therapy of non-squamous non-small cell lung cancer (NSCLC), advanced lung cancer, unresectable or metastatic hepatocellular carcinoma (HCC), advanced bladder cancer and PD-L1-positive triple-negative breast cancer (TNBC).

Tecentriq interim regional sales

	2026 (CHF m)	2025 (CHF m)	% change (CER)	% of sales 2026	% of sales 2025
United States	815	819	+9	47.8	47.3
Europe	410	434	–3	24.1	25.0
Japan	146	174	–2	8.6	10.0
International	333	306	+17	19.5	17.7
Total sales	**1,704**	**1,733**	**+6**	**100**	**100**

Sales growth in CER was driven by the US and the International region. In the US, the increase was mainly due to the SCLC indication, while growth in the International region was primarily attributable to the NSCLC indication. This growth was partially offset by the decline in Europe and Japan due to competitive pressure, although in Europe the decrease was mitigated by the positive performance of the subcutaneous formulation.

HER2 franchise (Perjeta, Phesgo, Kadcyla and Herceptin). For HER2-positive breast cancer and HER2-positive metastatic (advanced) gastric cancer (Herceptin only).

Perjeta interim regional sales

	2026 (CHF m)	2025 (CHF m)	% change (CER)	% of sales 2026	% of sales 2025
United States	551	677	–11	39.7	42.0
Europe	238	282	–14	17.1	17.5
Japan	24	37	–23	1.7	2.3
International	576	617	0	41.5	38.2
Total sales	**1,389**	**1,613**	**–7**	**100**	**100**

Phesgo interim regional sales

	2026 (CHF m)	2025 (CHF m)	% change (CER)	% of sales 2026	% of sales 2025
United States	318	348	0	24.1	29.1
Europe	425	401	+9	32.2	33.5
Japan	88	90	+15	6.7	7.5
International	487	358	+47	37.0	29.9
Total sales	**1,318**	**1,197**	**+18**	**100**	**100**

Kadcyla interim regional sales

	2026 (CHF m)	2025 (CHF m)	% change (CER)	% of sales 2026	% of sales 2025
United States	310	396	–14	33.8	38.2
Europe	248	266	–4	27.1	25.7
Japan	39	45	+2	4.3	4.3
International	319	330	+3	34.8	31.8
Total sales	**916**	**1,037**	**–6**	**100**	**100**

Herceptin interim regional sales

	2026 (CHF m)	2025 (CHF m)	% change (CER)	% of sales 2026	% of sales 2025
United States	94	121	–14	20.3	21.6
Europe	136	150	–7	29.4	26.8
Japan	2	4	–36	0.4	0.7
International	230	285	–14	49.9	50.9
Total sales	**462**	**560**	**–12**	**100**	**100**

Sales in the HER2 franchise decreased by 1% in CER to CHF 4.1 billion due to the lower sales of Perjeta, Herceptin and Kadcyla, which was partly offset by the increase in Phesgo sales. Sales of Phesgo grew by 18%, driven by the International region and continued growth in Europe and Japan. In the International region, the growth was led by China, reflecting the ongoing conversion of patients to Phesgo as the preferred treatment over Perjeta and Herceptin. As a result of this conversion, there was a 7% decrease in global Perjeta sales, with a decrease in the International region offset by a sales provision release. Sales of Kadcyla decreased by 6%, reflecting early signs of increased competitive pressure. Herceptin sales were 12% lower due to biosimilar erosion and the ongoing patient conversion to Phesgo.

Xolair. For chronic spontaneous urticaria, allergic asthma and food allergies.

Xolair interim regional sales

	2026 (CHF m)	2025 (CHF m)	% change (CER)	% of sales 2026	% of sales 2025
United States	1,673	1,445	+27	100	100
Total sales	**1,673**	**1,445**	**+27**	**100**	**100**

Sales increased following growth in the food allergy indication and in the chronic spontaneous urticaria indication. Xolair is the established standard in chronic spontaneous urticaria, is the only biologic medicine approved for food allergies and remains a market leader in the larger allergic asthma indication. Based on publicly available information, the Group currently anticipates that the first biosimilar versions could come to market in the US in the second half of 2026.

Actemra/RoActemra. For rheumatoid arthritis, forms of juvenile idiopathic arthritis, giant cell arteritis, CAR-T cell-induced severe or life-threatening cytokine release syndrome and COVID-19.

Actemra/RoActemra interim regional sales

	2026 (CHF m)	2025 (CHF m)	% change (CER)	% of sales 2026	% of sales 2025
United States	515	619	–9	48.0	48.4
Europe	238	308	–21	22.2	24.1
Japan	140	152	+8	13.0	11.9
International	181	200	–3	16.8	15.6
Total sales	**1,074**	**1,279**	**–9**	**100**	**100**

Sales decreased, reflecting the impact of biosimilar erosion across all regions except Japan. Europe was the region most impacted by biosimilar competition, reflecting an advanced stage of erosion due to the earlier market entry of multiple biosimilars. The sales increase in Japan reflected the continued demand from new patients with rheumatoid arthritis.

Evrysdi. For spinal muscular atrophy (SMA).

Evrysdi interim regional sales

	2026 (CHF m)	2025 (CHF m)	% change (CER)	% of sales 2026	% of sales 2025
United States	323	309	+15	33.4	35.6
Europe	335	292	+17	34.6	33.6
Japan	39	46	–1	4.0	5.3
International	271	222	+25	28.0	25.5
Total sales	**968**	**869**	**+17**	**100**	**100**

The increase in sales was driven by continued gains in market share across most regions. The sales growth in the US was led by increasing demand and the treatment of new patients, including previously untreated adults. Sales growth continued in Europe, notably in Germany, as well as in the International region, driven by new patients and patients transitioning to Evrysdi from other treatment options, further supported by recent once-daily oral tablet launches.

Polivy. For the first-line treatment of diffuse large B-cell lymphoma (1L DLBCL).

Polivy interim regional sales

	2026 (CHF m)	2025 (CHF m)	% change (CER)	% of sales 2026	% of sales 2025
United States	381	327	+28	47.2	44.8
Europe	128	160	–18	15.8	21.9
Japan	98	99	+16	12.1	13.6
International	201	144	+47	24.9	19.7
Total sales	**808**	**730**	**+20**	**100**	**100**

Sales of Polivy increased, driven by the US and the International region. In the US, the growth was driven by continued market share gains, further solidifying the position of Polivy as the standard of care. The decrease in Europe was primarily attributable to the lower sales in Germany. The increase in the International region mainly came from China.

Alecensa. For ALK-positive non-small cell lung cancer (NSCLC) in both the metastatic and adjuvant settings.

Alecensa interim regional sales

	2026 (CHF m)	2025 (CHF m)	% change (CER)	% of sales 2026	% of sales 2025
United States	261	276	+4	32.8	34.4
Europe	126	133	–4	15.8	16.6
Japan	93	100	+8	11.7	12.5
International	315	293	+13	39.7	36.5
Total sales	**795**	**802**	**+6**	**100**	**100**

In the US, Alecensa remains the standard of care, with sales driven by new and continuing patients both in the metastatic and adjuvant segment. Growth in the International region was led by China, due to increased demand. This was partly offset by a sales decline in Europe as a result of competition.

MabThera/Rituxan. For non-Hodgkin lymphoma (NHL), chronic lymphocytic leukaemia (CLL), follicular lymphoma (FL), pemphigus vulgaris (PV), rheumatoid arthritis (RA) as well as certain types of antineutrophil cytoplasmic antibody (ANCA)-associated vasculitis.

MabThera/Rituxan interim regional sales

	2026 (CHF m)	2025 (CHF m)	% change (CER)	% of sales 2026	% of sales 2025
United States	402	387	+14	66.0	61.4
Europe	62	70	–9	10.2	11.1
Japan	6	7	–11	1.0	1.1
International	139	166	–10	22.8	26.4
Total sales	**609**	**630**	**+5**	**100**	**100**

Sales increased in the US due to market share gains against key competitors. There was a sales decline in the other regions due to the biosimilar erosion.

Activase/TNKase. For acute ischaemic stroke (AIS) and acute myocardial infarction (AMI).

Activase/TNKase interim regional sales

	2026 (CHF m)	2025 (CHF m)	% change (CER)	% of sales 2026	% of sales 2025
United States	531	527	+11	95.7	95.8
International	24	23	+12	4.3	4.2
Total sales	**555**	**550**	**+11**	**100**	**100**

Sales growth was mainly driven by the US, where there was a positive impact from adjustments to reserves for US governmental plans.

Gazyva/Gazyvaro. For chronic lymphocytic leukaemia (CLL), follicular lymphoma (FL) and lupus nephritis (LN).

Gazyva/Gazyvaro interim regional sales

	2026 (CHF m)	2025 (CHF m)	% change (CER)	% of sales 2026	% of sales 2025
United States	240	253	+4	49.1	51.6
Europe	117	121	–1	23.9	24.7
Japan	17	17	+14	3.5	3.5
International	115	99	+21	23.5	20.2
Total sales	**489**	**490**	**+7**	**100**	**100**

The sales increase in CER was driven by the International region across both the CLL and FL indications and included the new lupus nephritis indication launched in 2025. The US remained the largest market, despite the limited growth. In Europe, sales decreased primarily reflecting increasing competition in haematology indications. In the International region, the 21% increase was primarily attributable to China.

Avastin. For advanced colorectal, breast, lung, kidney, cervical and ovarian cancer, relapsed glioblastoma and liver cancer in combination with Tecentriq.

Avastin interim regional sales

	2026 (CHF m)	2025 (CHF m)	% change (CER)	% of sales 2026	% of sales 2025
United States	125	156	–12	30.2	29.9
Europe	35	26	+37	8.5	5.0
Japan	36	76	–44	8.7	14.6
International	218	264	–13	52.6	50.5
Total sales	**414**	**522**	**–15**	**100**	**100**

Sales decreased due to the continuing impact of biosimilars. In Japan, the decrease was also impacted by government price cuts.

Pharmaceuticals Division – Interim sales by region

	2026 (CHF m)	2025 (CHF m)	% change (CHF)	% change (CER)	% of sales 2026	% of sales 2025
United States	12,229	12,670	–3	+6	51.8	52.8
Europe	4,520	4,566	–1	+1	19.1	19.0
Japan	1,360	1,425	–5	+11	5.8	5.9
International	5,520	5,324	+4	+10	23.3	22.3
– *of which China*	*1,490*	*1,702*	*–12*	*–9*	*6.3*	*7.1*
Total sales	**23,629**	**23,985**	**–1**	**+6**	**100**	**100**

United States. Sales increased by 6% in CER, primarily due to Xolair, Hemlibra, Polivy and Tecentriq. This growth more than offset the lower sales of Perjeta due to the ongoing conversion of patients to Phesgo, Kadcyla reflecting early signs of an increase of competitive pressure, and a 9% decline for Actemra/RoActemra due to biosimilar erosion. Ocrevus remained the highest-selling product in the US, with sales of CHF 2.3 billion, an increase of 2% driven by the demand for the recently launched subcutaneous formulation. Xolair sales increased by 27% and reached CHF 1.7 billion. Vabysmo generated sales of CHF 1.3 billion, an increase of 1%, despite a competitive pricing environment. Hemlibra sales were 9% higher at CHF 1.3 billion due to increased demand from new patients. Sales of Tecentriq were CHF 0.8 billion, a 9% growth driven by the SCLC indication. Combined sales of Avastin, Herceptin and MabThera/Rituxan increased by 3%. This was due to the higher sales of MabThera/Rituxan reflecting market share gains against competitors.

Europe. Sales increased by 1% in CER as continued growth of Ocrevus, Evrysdi and Phesgo was partially offset by a decline in sales of Actemra/RoActemra, due to biosimilar erosion, and Perjeta, reflecting the ongoing conversion of patients to Phesgo. Ocrevus sales increased by 10%, driven by the subcutaneous formulation primarily across Germany, Italy, the UK and France. Hemlibra sales grew by 4%, mainly in Italy, the UK and Spain, due to market penetration in the non-inhibitor indication as more patients switched from factor VIII treatments. The uptake of Phesgo resulted in 9% sales growth, with Poland and Italy being the key drivers. Tecentriq sales decreased by 3%, primarily in Switzerland and Germany, mainly due to competitive pressure. Vabysmo sales increased by 5%, driven by growth in Germany, Spain and Italy, partially offset by the impact of pricing adjustments based on legislative changes in countries such as the UK and Switzerland as well as competitive pressure in France. Evrysdi sales increased by 17%, notably in Germany based on new patients and patients transitioning to Evrysdi from other treatment options, further supported by recent once-daily oral tablet launches. Sales of Perjeta were 14% lower due to the ongoing conversion of patients to Phesgo, while Actemra/RoActemra sales decreased by 21% due to biosimilar competition. There was also a combined sales decline of 3% for Avastin, Herceptin and MabThera/Rituxan.

Japan. Sales increased by 11% in CER, primarily driven by increased product supply sales of Nemluvio, the recently launched Elevidys, and the continuing sales growth of Lunsumio, Vabysmo and Hemlibra. This growth was partially offset by a sales decline for Avastin impacted by ongoing drug price revisions and biosimilar competition, lower Tamiflu sales due to increased competition and lower sales of Perjeta resulting from the conversion of patients to Phesgo.

International. Sales increased by 10% in CER, led by Phesgo, Vabysmo and Hemlibra, with Ocrevus and Polivy also contributing to growth, partially offset by lower sales of Xofluza. Sales of Phesgo increased mainly in China and Latin America. Hemlibra sales grew as more patients switched from factor VIII treatments. Ocrevus sales growth was driven by patient demand for the intravenous formulation, while sales of Tecentriq increased in the NSCLC indication. Total sales in China decreased by 9%, driven by the base effect of the high sales of Xofluza in the first half of 2025.

Operating results

Pharmaceuticals Division – Other revenue for the six months ended 30 June

	2026 (CHF m)	2025 (CHF m)	% change (CHF)	% change (CER)
Royalty income	489	404	+21	+27
Profit-share income	351	388	–10	–1
Other income from collaboration and out-licensing agreements	124	73	+70	+93
Other	1	5	–80	–74
Total – IFRS and Core basis	**965**	**870**	**+11**	**+20**

Other revenue increased by 20% at CER, driven by higher royalty income and higher other income from collaboration and out-licensing agreements. The increase in royalty income was mainly related to a settlement of royalty claims of CHF 73 million. The higher other income from collaboration and out-licensing agreements was driven by milestone income at Chugai related to Foundayo.

Pharmaceuticals Division – Cost of sales for the six months ended 30 June

	2026 (CHF m)	2025 (CHF m)	% change (CHF)	% change (CER)
Manufacturing cost of goods sold and period costs	(2,551)	(2,510)	+2	0
Royalty expenses	(853)	(884)	–4	+5
Collaboration and profit-sharing agreements	(819)	(705)	+16	+27
Amortisation of commercial software intangible assets	0	(1)	–100	–100
Impairment of property, plant and equipment and right-of-use assets	(8)	(19)	–58	–57
Cost of sales – Core basis	**(4,231)**	**(4,119)**	**+3**	**+5**
Global restructuring plans	(14)	(27)	–48	–52
Amortisation of intangible assets	(110)	(113)	–3	+2
Impairment of intangible assets	0	(104)	–100	–100
Total – IFRS basis	**(4,355)**	**(4,363)**	**0**	**+2**

Core costs increased by 5% at CER and represented 17.9% of total sales. This growth was mainly due to higher collaboration and profit-sharing agreement expenses, which grew by 27%, primarily following increased sales of Xolair in the US. Royalty expenses grew by 5% due to higher sales of certain royalty-bearing products, notably Ocrevus and Evrysdi. Manufacturing cost of goods sold and period costs were stable, as the sales volume growth was offset by mix effects, manufacturing efficiencies and lower write-offs.

The impairment of intangible assets in 2025 followed from an alliance partner's decision to stop the commercialisation of SPK-9001, which had been acquired as part of the Spark Therapeutics acquisition.

Pharmaceuticals Division – Research and development for the six months ended 30 June

	2026 (CHF m)	2025 (CHF m)	% change (CHF)	% change (CER)
Research and development – Core basis	**(4,895)**	**(5,181)**	**–6**	**+1**
Global restructuring plans	(185)	(215)	–14	–9
Amortisation of intangible assets	(211)	(150)	+41	+52
Impairment of intangible assets	(1,045)	(92)	Over +500	Over +500
Total – IFRS basis	**(6,336)**	**(5,638)**	**+12**	**+20**

Core costs increased by 1% at CER and, as a percentage of sales, decreased by 0.9 percentage points to 20.7%. Oncology continued to be the therapeutic area with the highest expenditure, primarily driven by investments in giredestrant for the treatment of certain types of breast cancer, divarasib for the treatment of specific types of solid tumours and cevostamab for the treatment of multiple myeloma. There was higher investment in cardiovascular and metabolic diseases, including pegozafermin for the treatment of metabolic dysfunction-associated steatohepatitis (MASH) which was acquired as part of the 89bio acquisition, enicepatide (CT-388) for the treatment of obesity with differentiated efficacy acquired as part of the Carmot acquisition, and zilebesiran for the treatment of patients with uncontrolled hypertension licensed from Alnylam Pharmaceuticals. There was also increased spending in neurology, due to studies of trontinemab for the treatment of Alzheimer's disease. These increases were offset by efficiency improvements realised from resource optimisation initiatives, lower costs derived from portfolio prioritisation, and the timing and phasing of employee-related costs. In research and early-stage development, continued efforts were focused on making selective, high-impact investments in capabilities such as computational biology and human model systems. The costs also reflected recent infrastructure projects at the Genentech site in South San Francisco, US.

The global restructuring plan costs decreased and were primarily due to employee-related costs and programme closure costs for efficiency and portfolio prioritisation initiatives. Amortisation of intangible assets increased primarily reflecting the utilisation of a US priority review voucher. The impairment charges for intangible assets of CHF 1.0 billion were significantly higher than the charges in the first half of 2025 and were based on decisions to stop the development of the respective compounds. Further details are given in Note 9 to the Interim Financial Statements.

Additionally, in-licensing transactions, business combinations and asset acquisitions in the Pharmaceuticals Division resulted in the recognition of intangible assets totalling CHF 0.4 billion (2025: CHF 1.7 billion). See the above sections on 'Mergers and acquisitions' and 'Alliance transactions' for further details.

Pharmaceuticals Division – Selling, general and administration for the six months ended 30 June

	2026 (CHF m)	2025 (CHF m)	% change (CHF)	% change (CER)
Marketing and distribution	(2,640)	(2,673)	–1	+6
Administration	(290)	(483)	–40	–35
Business taxes and capital taxes	(65)	(44)	+48	+67
Other general items	(36)	(42)	–14	–17
Selling, general and administration – Core basis	**(3,031)**	**(3,242)**	**–7**	**0**
Global restructuring plans	(150)	(158)	–5	+3
Amortisation of intangible assets	0	(1)	–100	–100
Total – IFRS basis	**(3,181)**	**(3,401)**	**–6**	**0**

Core costs remained stable at CER and, as a percentage of sales, decreased by 0.7 percentage points to 12.8%. Marketing and distribution costs increased by 6% reflecting continued spending to support Vabysmo, Ocrevus, Tecentriq and Xolair in the food allergy indication. Administration costs were lower following the transfer of certain legal functions from the Pharmaceuticals Division to Corporate. Business taxes and capital taxes increased mainly due to higher US excise tax. The costs for global restructuring plans included business process transformation costs to simplify the systems landscape and projects on the South San Francisco campus.

Pharmaceuticals Division – Other operating income (expense) for the six months ended 30 June

	2026 (CHF m)	2025 (CHF m)	% change (CHF)	% change (CER)
Gains (losses) on disposal of products	5	0	–	–
Gains (losses) on disposal of property, plant and equipment and right-of-use assets	(2)	0	–	–
Gains (losses) on divestment of subsidiaries	0	103	–100	–100
Other income (expense)	92	106	–13	–10
Other operating income (expense) – Core basis	**95**	**209**	**–55**	**–53**
Global restructuring plans	3	49	–94	–91
Mergers and acquisitions and alliance transactions	23	10	+130	+122
Legal and environmental cases	(5)	(89)	–94	–94
Total – IFRS basis	**116**	**179**	**–35**	**–32**

Core other operating income (expense) on a net basis decreased by 53% at CER due to the base effect of the divestment of InterMune in 2025, which included the US rights to Esbriet. Income from global restructuring plans in 2025 mainly arose from a gain from the disposal of property at Chugai, and the cost of legal and environmental cases in 2025 was mainly reflecting the development of the Avastin/Lucentis investigation in France.

Roche Pharmaceuticals and Chugai subdivisional operating results

Pharmaceuticals subdivisional interim operating results in millions of CHF

	Roche Pharmaceuticals 2026	Roche Pharmaceuticals 2025	Chugai 2026	Chugai 2025	Pharmaceuticals Division 2026	Pharmaceuticals Division 2025
Sales						
– External customers	22,269	22,560	1,360	1,425	23,629	23,985
– Within division	945	612	1,459	1,546	2,404	2,158
Core operating profit	11,128	10,869	1,641	1,475	12,532	12,522
– Margin, % of sales to external customers	50.0	48.2	120.7	103.5	53.0	52.2
Operating profit	9,477	9,968	1,598	1,486	10,838	11,632
– Margin, % of sales to external customers	42.6	44.2	117.5	104.3	45.9	48.5
Operating free cash flow	6,824	7,154	1,604	1,379	8,428	8,533
– Margin, % of sales to external customers	30.7	31.7	117.9	96.8	35.7	35.6

The Pharmaceuticals Division's total core operating profit and operating profit both include the elimination of minus CHF 237 million of unrealised intercompany gains between Roche Pharmaceuticals and Chugai (2025: plus CHF 178 million).

The appreciation of the Swiss franc in the first half of 2026 relative to the first half of 2025 against the Japanese yen had an adverse impact of approximately 27 percentage points on the Chugai core results when expressed in Swiss francs for the Group's consolidated results. At CER (as reported in Japanese yen), sales by Chugai to external customers increased by 11% due to increased product supply sales of Nemluvio, the recently launched Elevidys and the continuing sales growth of Lunsumio, Vabysmo and Hemlibra. Sales within the division increased by 10% driven by higher sales of Hemlibra to Roche Pharmaceuticals. Chugai's core operating profit increased by 38% due to higher sales to external customers, sales within the division, and higher milestone income. Operating free cash flow at Chugai increased by 45%, driven by improved underlying operating performance and timing of payments for property, plant and equipment.

Financial position

Pharmaceuticals Division – Net operating assets

	30 June 2026 (CHF m)	31 Dec. 2025 (CHF m)	% change (CHF)	% change (CER)	Movement: Transactions (CHF m)	Movement: CTA and other (CHF m)
Trade receivables	9,952	8,701	+14	+13	1,132	119
Inventories	4,849	4,483	+8	+7	342	24
Trade payables	(2,468)	(2,476)	0	–1	29	(21)
Net trade working capital	**12,333**	**10,708**	**+15**	**+14**	**1,503**	**122**
Other receivables (payables)	(6,785)	(8,090)	–16	–17	1,359	(54)
Net working capital	**5,548**	**2,618**	**+112**	**+103**	**2,862**	**68**
Property, plant and equipment	13,929	13,658	+2	+2	214	57
Right-of-use assets	586	611	–4	–5	(31)	6
Goodwill and intangible assets	20,653	20,797	–1	–2	(460)	316
Provisions	(1,963)	(1,968)	0	–1	25	(20)
Other assets (liabilities)	739	595	+24	+24	144	–
Other net operating assets	**33,944**	**33,693**	**+1**	**0**	**(108)**	**359**
Net operating assets	**39,492**	**36,311**	**+9**	**+8**	**2,754**	**427**

The absolute amount of the movement between the 30 June 2026 and 31 December 2025 consolidated balances reported in Swiss francs is split between actual 2026 transactions (translated at average rates for 2025) and the currency translation adjustment (CTA) that arises on consolidation. The 2026 transactions include non-cash movements and therefore the movements in this table are not the same as the amounts shown in the operating free cash flow (which only includes the cash movements).
A full consolidated balance sheet is given on page 48 of the Interim Financial Statements, and a reconciliation between that balance sheet and the information given above is on page 83.

Currency translation effects on balance sheet amounts. Compared to the start of the year the Swiss franc depreciated against the US dollar, resulting in a positive translation impact on the net operating assets of the Pharmaceuticals Division, notably the goodwill and intangible assets. The exchange rates used are given on page 35.

Net working capital. The increase was driven by a reduction in other payables and accrued liabilities, and an increase in trade receivables. The net liability position for other receivables (payables) decreased, driven by the settlement of year-end payables for intangible assets as well as lower employee-related accruals. The increase in trade receivables was mainly driven by higher sales recorded towards the end of the first half of 2026 compared to the end of 2025, particularly in some countries in the International region where there are longer payment terms. In the US, this was mostly due to higher sales of Xolair. Inventories increased, driven by the rebuilding of safety stocks, the phasing of incoming contract manufacturing organisation supply and preparations to support anticipated sales growth.

Other net operating assets. Property, plant and equipment increased due to additions in manufacturing facilities in the US, Japan and Switzerland, as well as site developments mainly related to research and development facilities and infrastructure maintenance in Switzerland and the US. Goodwill and intangible assets decreased as impairment and amortisation charges as previously mentioned in the ‘Group results’ section more than offset additions.

Free cash flow

Pharmaceuticals Division – Operating free cash flow for the six months ended 30 June

	2026 (CHF m)	2025 (CHF m)	% change (CHF)	% change (CER)
Operating profit	**10,838**	**11,632**	**–7**	**+3**
Depreciation, amortisation and impairment	1,996	1,127	+77	+88
Provisions	(42)	11	–	–
Equity compensation plans	275	274	0	+9
Other	113	51	+122	+144
Operating profit cash adjustments	**2,342**	**1,463**	**+60**	**+71**
Operating profit, net of operating cash adjustments	**13,180**	**13,095**	**+1**	**+11**
(Increase) decrease in net working capital	(2,676)	(2,129)	+26	+35
Investments in property, plant and equipment	(698)	(873)	–20	–14
Principal portion of lease liabilities paid	(97)	(110)	–12	–4
Investments in intangible assets	(1,281)	(1,450)	–12	–9
Operating free cash flow	**8,428**	**8,533**	**–1**	**+11**
– as % of sales	35.7	35.6	+0.1	+1.6

See pages 80–82 for the definition of free cash flow and a detailed breakdown.

The Pharmaceuticals Division's operating free cash flow increased by 11% at CER (decrease of 1% in CHF) to CHF 8.4 billion. The cash generation of the business, measured by the operating profit, net of operating cash adjustments, increased by 11%. This was in line with the 10% increase in core operating profit. Net working capital absorbed an additional CHF 2.7 billion of cash driven by the reasons described above in the 'Financial position' section, notably the decrease in other payables and accrued liabilities and the increase in trade receivables. Capital expenditure was lower, driven by the phasing of payments for manufacturing site investments in Japan. Investments in intangible assets decreased due to the base effect of the CHF 1.2 billion paid to Zealand Pharma in 2025. Cash outflows for mergers and acquisitions are not included in the definition of free cash flow.

Sales overview

The Diagnostics Division reported sales of CHF 6.7 billion, an increase of 3% at CER (decline of 3% in CHF, increase of 6% in USD) driven by growth in demand for immunodiagnostic and clinical chemistry products, as well as pathology and molecular solutions. There was a continuing negative impact from healthcare pricing reforms in China.

Diagnostics Division – Interim sales by customer area

	2026 (CHF m)	2025 (CHF m)	% change (CHF)	% change (CER)	% of sales 2026	% of sales 2025
Core Lab	3,756	3,839	–2	+4	55.8	55.2
Molecular Lab	1,196	1,250	–4	+3	17.7	18.0
Near Patient Care	909	1,018	–11	–5	13.5	14.6
Pathology Lab	874	852	+3	+11	13.0	12.2
Total sales	**6,735**	**6,959**	**–3**	**+3**	**100**	**100**

Core Lab. This customer area focuses on central labs and provides diagnostic solutions in the areas of immunoassays, clinical chemistry and custom biotech. Sales grew by 4% at CER due to increased demand for immunodiagnostic and clinical chemistry products, notably in infectious diseases and bone health. This growth more than offset the decline in China due to healthcare pricing reforms for immunodiagnostic products.

Molecular Lab. This customer area focuses on molecular labs and provides diagnostic solutions for the detection and monitoring of pathogens, donor screening, sexual health and genomics and includes the Foundation Medicine business. Sales increased by 3% at CER due to growth in the infectious disease and sequencing businesses.

Near Patient Care. This customer area provides diagnostic solutions in decentralised settings such as in emergency rooms, general practitioners' practices and directly with patients, and includes integrated personalised diabetes management solutions. The main drivers of the 5% sales decrease at CER were reduced respiratory illness-related sales in the molecular point-of-care segment, due to a shorter season with lower respiratory disease prevalence at the beginning of 2026. The decline was partially offset by an increase in demand for blood glucose monitoring products.

Pathology Lab. This customer area focuses on pathology labs and provides diagnostic solutions for tissue biopsies and companion diagnostics. These are targeted diagnostics to aid in the choice of specific therapies for each patient. Sales increased by 11% at CER due to growth in demand for advanced staining, companion diagnostics and primary staining.

Diagnostics Division – Interim sales by region

	2026 (CHF m)	2025 (CHF m)	% change (CHF)	% change (CER)	% of sales 2026	% of sales 2025
Europe, Middle East and Africa (EMEA)	2,466	2,485	–1	+3	36.6	35.7
North America	2,211	2,235	–1	+8	32.8	32.1
– *of which US*	*1,923*	*1,959*	*–2*	*+8*	*28.6*	*28.2*
Asia-Pacific	1,522	1,729	–12	–5	22.6	24.9
– *of which China*	*749*	*914*	*–18*	*–15*	*11.1*	*13.1*
Latin America	536	510	+5	+10	8.0	7.3
Total sales	**6,735**	**6,959**	**–3**	**+3**	**100**	**100**

Sales in the Europe, Middle East and Africa (EMEA) region increased by 3% at CER, driven by higher sales of immunodiagnostic products, the clinical chemistry portfolio and molecular solutions. This was partly offset by the continued contraction of the blood glucose monitoring market. In North America the sales growth of 8% at CER was driven by the Core Lab and Pathology Lab customer areas and was partially offset by lower respiratory illness-related sales. In the Asia-Pacific region sales decreased by 5% at CER, mainly due to the impact of healthcare pricing reforms in China, which was partially offset by growth in demand for immunodiagnostic and clinical chemistry products across the rest of the region. Sales in Latin America increased by 10% at CER, driven by growth in demand across all customer areas.

Operating results

Diagnostics Division – Other revenue for the six months ended 30 June

	2026 (CHF m)	2025 (CHF m)	% change (CHF)	% change (CER)
Royalty income	73	2	Over +500	Over +500
Profit-share income	0	0	–	–
Other income from collaboration and out-licensing agreements	46	29	+59	+60
Other	4	4	0	+7
Total – IFRS and Core basis	**123**	**35**	**+251**	**+256**

Other revenue included income from a cross-licensing agreement totalling CHF 126 million, concerning patient monitoring technology. This amount was allocated between royalty income (CHF 70 million) and other income from collaboration and out-licensing agreements (CHF 56 million). This was partially offset by an accrual related to an ongoing royalty reimbursement dispute.

Diagnostics Division – Cost of sales for the six months ended 30 June

	2026 (CHF m)	2025 (CHF m)	% change (CHF)	% change (CER)
Manufacturing cost of goods sold and period costs	(3,381)	(3,376)	0	+5
Royalty expenses	(53)	(66)	–20	–19
Collaboration and profit-sharing agreements	0	0	–	–
Amortisation of commercial software intangible assets	(8)	(1)	Over +500	+437

Amortisation of intangible assets	(68)	(74)	–8	–4
Total – IFRS basis	**(3,626)**	**(3,643)**	**0**	**+5**

Core cost of sales increased by 5% at CER. Globally, the increasing number of installed instruments at customers led to higher depreciation and technical servicing costs. In addition, there were further costs related to new products, notably the Accu-Chek SmartGuide continuous glucose monitoring solution, and for mass spectrometry solutions. US tariffs also contributed to the increase in the cost of sales. Global restructuring plan costs for business efficiency measures and manufacturing and supply chain optimisations mainly consisted of employee-related and site closure costs. As a percentage of sales, the core cost of sales ratio increased by 1.6 percentage points to 51.1%.

Diagnostics Division – Research and development for the six months ended 30 June

	2026 (CHF m)	2025 (CHF m)	% change (CHF)	% change (CER)
Research and development – Core basis	**(870)**	**(893)**	**–3**	**+3**
Global restructuring plans	(31)	(143)	–78	–78
Amortisation of intangible assets	0	(2)	–100	–100
Total – IFRS basis	**(901)**	**(1,038)**	**–13**	**–8**

Core research and development costs increased by 3% at CER. The main areas of activity included the development of high medical value assays, sequencing, continuous glucose monitoring and automation workflow solutions. As a percentage of sales, research and development core costs increased to 12.9% from 12.8% in 2025. Global restructuring costs from measures to drive divisional efficiency decreased and were primarily incurred for programme and site closure costs and to a lesser extent for employee-related matters.

Diagnostics Division – Selling, general and administration for the six months ended 30 June

	2026 (CHF m)	2025 (CHF m)	% change (CHF)	% change (CER)
Marketing and distribution	(1,190)	(1,209)	–2	+4

Amortisation of intangible assets	(2)	(8)	–75	–79
Total – IFRS basis	**(1,481)**	**(1,576)**	**–6**	**–1**

Marketing and distribution costs increased by 4% at CER, including increased distribution costs and higher campaign and commercial investments to support the global launch of new solutions. Administration costs decreased by 7% due to the transfer of certain legal functions from the Diagnostics Division to Corporate. On a core basis, selling, general and administration costs as a percentage of sales increased from 20.5% to 20.6% in 2026. Costs for global restructuring plans consisted of business process transformation initiatives for system landscape simplification as well as organisational efficiency initiatives and were incurred for employee-related matters and programme costs.

Diagnostics Division – Other operating income (expense) for the six months ended 30 June

The absolute amount of the movement between the 30 June 2026 and 31 December 2025 consolidated balances reported in Swiss francs is split between actual 2026 transactions (translated at average rates for 2025) and the currency translation adjustment (CTA) that arises on consolidation. The 2026 transactions include non-cash movements and therefore the movements in this table are not the same as the amounts shown in the operating free cash flow (which only includes the cash movements).
A full consolidated balance sheet is given on page 48 of the Interim Financial Statements, and a reconciliation between that balance sheet and the information given above is on page 83.

Currency translation effects on balance sheet amounts. Compared to the start of the year the Swiss franc depreciated against the US dollar, which was partly offset by the appreciation of the Swiss franc against the euro. This resulted in a positive net translation impact on the net operating assets of the Diagnostics Division. The Diagnostics Division does not have a significant net asset position in Japanese yen and so the appreciation of the Swiss franc against the Japanese yen had only a minor impact. The exchange rates used are given on page 35.

Net working capital. The increase in net working capital was driven by a lower net liability for other receivables (payables). Trade receivables increased due to relatively higher sales in locations with longer payment terms. The increase in inventories was driven by a higher number of instruments, notably from the latest generation of serum work area systems. The decrease in trade payables and the decrease in the net liability for other receivables (payables) both arose from the settlement of year-end positions and accruals.

Other net operating assets. Property, plant and equipment increased due to higher instrument placements as well as site investments in Germany for production and research and development facilities. Provisions were higher following an increase in restructuring provisions. Goodwill and intangible assets increased due to the SAGA acquisition.

Free cash flow

Diagnostics Division – Operating free cash flow for the six months ended 30 June

	2026 (CHF m)	2025 (CHF m)	% change (CHF)	% change (CER)

Investments in intangible assets	(20)	(26)	–23	–23
Operating free cash flow	**14**	**(232)**	**–**	**–**
– as % of sales	0.2	–3.3	+3.5	+4.8

See pages 80–82 for the definition of free cash flow and a detailed breakdown.

The operating free cash flow of the Diagnostics Division was a net inflow of CHF 14 million. The cash generation of the business, measured by the operating profit, net of operating cash adjustments, increased by 10% at CER, broadly in line with the 6% increase in the core operating profit. Net working capital absorbed an additional CHF 0.8 billion of cash in the first half of 2026 which was primarily attributable to the settlement of year-end payables and accruals, and due to increased inventory levels, as described above in the 'Financial position' section. The increase in capital expenditure included higher instrument placements as well as site investments in Germany.

Corporate operating results

Corporate – Selling, general and administration for the six months ended 30 June

	2026 (CHF m)	2025 (CHF m)	% change (CHF)	% change (CER)
Administration	(1,931)	(1,822)	+6	+9
Business taxes and capital taxes	(20)	(15)	+33	+39
Selling, general and administration – Core basis	**(1,951)**	**(1,837)**	**+6**	**+9**
Global restructuring plans	(180)	(264)	–32	–31
Total – IFRS basis	**(2,131)**	**(2,101)**	**+1**	**+4**

Selling, general and administration costs increased by 9% at CER on a core basis. Administration expenses increased as a result of the transfer of certain legal functions previously embedded in the Pharmaceuticals and Diagnostics Divisions to Corporate, as well as increased informatics costs from cloud-based solutions and projects in artificial intelligence, which were partially offset by the timing and phasing of employee-related costs. Total costs on an IFRS basis increased by 1% in CHF reflecting lower restructuring activities related to a business process transformation to simplify the systems landscape and reduce process complexity.

Corporate – Other operating income (expense) for the six months ended 30 June

	2026 (CHF m)	2025 (CHF m)	% change (CHF)	% change (CER)
Other operating income (expense) – Core basis	**95**	**75**	**+27**	**+27**
Mergers and acquisitions and alliance transactions	(4)	0	–	–
Legal and environmental cases	3	7	–57	–51
Total – IFRS basis	**94**	**82**	**+15**	**+16**

Other operating income (expense) on a core basis included governmental grants. The income from legal and environmental cases was due to a release of provisions.

Corporate – Interim financial position and free cash flow

	2026 (CHF m)	2025 (CHF m)	% change (CHF)	% change (CER)
Financial position				
Net working capital	(492)	(653)	–25	–25
Other net operating assets	101	58	+74	+66
Net operating assets	**(391)**	**(595)**	**–34**	**–34**
Free cash flow				
Operating free cash flow	(2,178)	(2,187)	0	+2

The change in net working capital resulted from an increase in other receivables for prepaid software licences, as well as decreased accruals due to settlement of outstanding amounts. Other net operating assets increased due to higher utilisation of restructuring provisions. The operating free cash flow includes costs of global functions such as informatics, human resources, legal and compliance, finance and procurement as well as restructuring costs for business process transformation. There was an increased cash outflow of 2% at CER mainly due to the increase in administration costs attributed to the organisational changes in legal functions, partially offset by reduced restructuring costs for business process transformation.

Foreign exchange impact on operating results

The Group's exposure to movements in foreign currencies affecting its operating results, as expressed in Swiss francs, is summarised by the following key figures and comments.

Growth (reported in Swiss francs and at CER) for the six months ended 30 June 2026

	% change (CHF)	% change (CER)
Pharmaceuticals Division		
Sales	–1	+6
Core operating profit	0	+10
Operating free cash flow	–1	+11
Diagnostics Division		
Sales	–3	+3
Core operating profit	–6	+6
Operating free cash flow	–	–
Group		
Sales	–2	+6
Core operating profit	–1	+10
Operating free cash flow	+2	+21

Exchange rates against the Swiss franc

	30 June 2026	Average to 30 June 2026	31 December 2025	Average to 30 June 2025
1 USD	0.81	0.79	0.79	0.86
1 EUR	0.92	0.92	0.93	0.94
100 JPY	0.50	0.50	0.51	0.58

The results expressed in Swiss francs were negatively impacted by the appreciation of the Swiss franc against many currencies, notably the US dollar, in the first half of 2026 relative to the first half of 2025. The sensitivity of Group sales and core operating profit to a 1% change in average foreign currency exchange rates against the Swiss franc during the first half of 2026 is shown in the table below.

Currency sensitivities for the six months ended 30 June 2026

Impact of 1% increase in average exchange rate versus the Swiss franc	Sales (CHF m)	Core operating profit (CHF m)
US dollar	148	52
Euro	46	16
Japanese yen	15	14

Financing costs

In the first half of 2026 core financing costs remained stable at CER at CHF 0.6 billion compared to 2025. A full analysis of financing costs is given in Note 4 to the Interim Financial Statements.

Other financial income (expense)

Core other financial income (expense) was a net expense of CHF 56 million compared to a net expense of CHF 49 million in 2025. The net income from equity investments, which reflected the fair value changes in the Roche Venture Fund investments as well as gains or losses realised upon sale of those investments, was a gain of CHF 33 million compared to a loss of CHF 63 million in 2025. This change was due to the base effect of the significant prior-year losses arising from market volatility. Interest income from debt and fund investments and debt securities was CHF 99 million (2025: CHF 114 million). The net foreign exchange results, which reflect hedging costs and gains and losses on unhedged positions, were net losses of CHF 140 million (2025: net losses of CHF 93 million). Losses on the net monetary positions in hyperinflationary economies were CHF 28 million (2025: losses of CHF 31 million) for the Group's affiliates in Argentina in 2026 and 2025 and Türkiye in 2025. A full analysis of other financial income (expense) is given in Note 4 to the Interim Financial Statements.

Income taxes

The Group's effective core tax rate was 17.5% in the first half of 2026 compared to 17.4% in the first half of 2025.

The effective tax rate on an IFRS basis increased to 18.4% compared to 18.3% in the first half of 2025. The higher non-deductible impairment of intangible assets and the deferred tax impact from equity compensation plans in the first half of 2026 were largely offset by the transitional effect of the Swiss tax reform recognised in the first half of 2025. Changes to the tax laws in the canton of Basel-Stadt in Switzerland were enacted in 2025, which resulted in the remeasurement of certain deferred tax positions and a transitional deferred tax expense of CHF 114 million recognised in the first half of 2025.

Further details of the Group's income tax expenses are given in Note 5 to the Interim Financial Statements.

Analysis of the Group's effective tax rate for the six months ended 30 June

	2026			2025		
	Profit before tax (CHF m)	Income taxes (CHF m)	Tax rate (%)	Profit before tax (CHF m)	Income taxes (CHF m)	Tax rate (%)

Group's effective tax rate – IFRS basis	**8,973**	**(1,648)**	**18.4**	**9,588**	**(1,756)**	**18.3**

Financial position

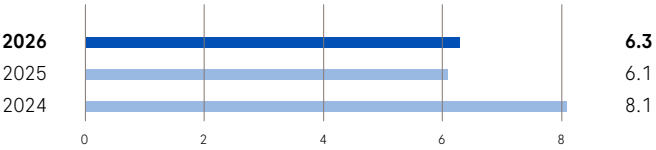

The increase in net debt was due to dividend payments of CHF 8.3 billion, partially offset by the free cash flow of CHF 4.2 billion. The net pension liability was 11% higher at CER following an increase of the limit on asset recognition of certain Swiss pension plans which more than offset the positive impact from higher plan assets in Switzerland. The net tax assets remained broadly stable. As at 30 June 2026 the Group held equity, debt and fund investments with a market value of CHF 0.5 billion, which consisted mostly of holdings in biotechnology and other pharmaceutical companies which were acquired as part of licensing transactions and scientific collaborations or as investments of the Roche Venture Fund. The net derivative liabilities decreased to CHF 0.3 billion as a result of interest rate and exchange rate movements.

Free cash flow

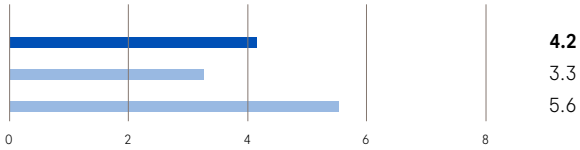

The net cash outflow from treasury activities was CHF 0.5 billion compared to an outflow of CHF 0.6 billion in the first half of 2025. This was mainly due to inflows from the sale of financial long-term investments. Total taxes paid in the first half of 2026 were CHF 1.6 billion, compared to CHF 2.2 billion in the first half of 2025. The decrease was mainly due to changes in US tax legislation and the timing of tax payments.

Cash flows and net debt

Taxes paid				(2,237)
Free cash flow				**3,319**

See pages 80–82 for the definition of free cash flow and a detailed breakdown.

The free cash flows expressed in Swiss francs were heavily impacted by the appreciation of the Swiss franc in the first half of 2026 relative to the first half of 2025 against many currencies, notably the US dollar. The Pharmaceuticals Division reported a higher cash generation from the underlying business, which was offset by net working capital increasing more than in the prior half year, mainly due to the decreased payables. The improved operating free cash flow for the Diagnostics Division was due to the lower increase in net working capital than in the first half of 2025. Cash outflows for treasury activities included inflows from the sale of financial long-term investments. Tax payments decreased due to the US tax legislation changes and the timing of tax payments.

Net debt in millions of CHF

Net debt – Currency profile in millions of CHF

	Cash and marketable securities		Debt	
	30 June 2026	31 December 2025	30 June 2026	31 December 2025
US dollar	1,861	2,390	(22,194)	(21,517)
Euro	1,249	2,770	(3,908)	(3,947)
Swiss franc	1,552	4,947	(5,164)	(5,589)
Japanese yen	4,278	4,560	0	0
Other	794	809	(539)	(583)
Total	**9,734**	**15,476**	**(31,805)**	**(31,636)**

The net debt position at 30 June 2026 was CHF 22.1 billion, an increase of CHF 5.9 billion from 31 December 2025. The increase was primarily due to the dividend payments of CHF 8.3 billion, partly offset by the free cash flow of CHF 4.2 billion. The CHF 0.6 billion for transactions in own equity instruments were purchases in connection with the Group's equity compensation plans.

Pensions and other post-employment benefits

Funding status and balance sheet position in millions of CHF

	30 June 2026	31 December 2025
Funded plans		
– Fair value of plan assets	20,714	19,818
– Defined benefit obligation	(16,259)	(16,418)
Over (under) funding	**4,455**	**3,400**
Unfunded plans		
– Defined benefit obligation	(3,652)	(3,625)
Total funding status	**803**	**(225)**
Limit on asset recognition	(3,234)	(1,966)
Reimbursement rights	33	32
Net recognised asset (liability)	**(2,398)**	**(2,159)**

The funding status on an IFRS basis of the Group's funded defined benefit plans increased to 127% compared to 121% at the start of the year. This came from an increase in the fair value of plan assets in Switzerland and an increase in discount rates in most regions compared to the end of 2025. The limit on asset recognition was higher compared to the start of the year due to a larger portion of the surplus of certain Swiss pension plans being not recognisable under IFRS. The funding status of the pension funds is monitored by the local pension fund governance bodies as well as being closely reviewed at a Group level.

The unfunded plans are mainly those in the Group's German affiliates, where the fully reserved pension obligations are invested in the local affiliates' operations.

Full details of the Group's pensions and other post-employment benefits are given in Note 26 to the 2025 Annual Financial Statements.

Debt

Issuance of new debt

During the first half of 2026 the Group did not undertake any debt offerings.

Redemption of debt

During the first half of 2026 the Group redeemed the following debt at the due date:
- 5 March 2026: fixed rate notes with an outstanding amount of USD 650 million and an effective interest rate of 1.03%.
- 15 May 2026: fixed rate notes with an outstanding amount of USD 1 billion and an effective interest rate of 2.78%.
- 23 June 2026: fixed rate bonds with an outstanding amount of CHF 425 million and an effective interest rate of 1.48%.

The combined cash outflow was CHF 1.7 billion and there was no gain or loss recorded on these redemptions.

Debt maturity

The maturity schedule of the Group's bonds and notes outstanding at 30 June 2026 is shown in the table below.

Bonds and notes: nominal amounts at 30 June 2026 by contractual maturity

	US dollar (USD m)	Euro (EUR m)	Swiss franc (CHF m)	Total[a] (USD m)	Total[a] (CHF m)
2026	1,400	0	0	1,400	1,130
2027	2,100	600	825	3,807	3,074
2028	3,900	0	140	4,073	3,289

2030	1,750	650	735	3,403	2,747
2031–2035	8,288	500	1,865	11,169	9,018
2036 and beyond	5,366	1,750	990	8,592	6,937
Total	**24,579**	**4,250**	**5,155**	**35,819**	**28,920**

a) Total translated at 30 June 2026 exchange rates.

The Group plans to meet its debt obligations using existing liquid funds as well as cash generated from business operations. In the full year 2025 the free cash flow was CHF 11.8 billion, which included the cash generated from operations as well as the payment of interest and taxes. In the first half of 2026 the free cash flow was CHF 4.2 billion.

For short-term financing requirements, the Group has a commercial paper program in the US under which it can issue up to USD 7.5 billion of unsecured commercial paper notes and has a committed credit line of USD 7.5 billion available as a back-stop line. Commercial paper notes totalling USD 3.0 billion were outstanding as at 30 June 2026 (31 December 2025: USD 1.0 billion). For longer-term financing the Group maintains high long-term investment-grade credit ratings of AA by Standard & Poor's, Aa2 by Moody's and AA by Fitch which should facilitate efficient access to international capital markets.

Further information on the Group's debt is given in Note 11 to the Interim Financial Statements and Note 21 to the 2025 Annual Financial Statements.

Financial risks

At 30 June 2026 the Group had a net debt position of CHF 22.1 billion (31 December 2025: CHF 16.2 billion). The financial assets of the Group are managed in a conservative way with the objective to meet the Group's financial obligations at all times.

Asset allocation. Liquid funds are either held as cash or are invested in high-quality, investment-grade fixed-income securities with an investment horizon to meet those liquidity requirements.

Cash and marketable securities

	30 June 2026		31 December 2025	
	(CHF m)	(% of total)	(CHF m)	(% of total)
Cash and cash equivalents	5,448	56	5,582	36
Money market instruments and time accounts over three months	3,851	40	9,365	61
Debt securities	435	4	529	3
Equity securities	0	0	0	0
Total cash and marketable securities	**9,734**	**100**	**15,476**	**100**

Credit risk. Credit risk arises from the possibility that counterparties to transactions may default on their obligations causing financial losses for the Group. The rating profile of the Group's CHF 9.7 billion of cash and fixed-income marketable securities remained high with 92% being invested in the A–AAA range. The Group has signed netting and collateral agreements with the counterparties in order to mitigate counterparty risk on derivative positions. Bad debt expenses and overdue receivables remained at a relatively low level.

Liquidity risk. Liquidity risk arises through a surplus of financial obligations over available financial assets due at any point in time. The Group's approach to liquidity risk is to maintain sufficient readily available reserves in order to meet its liquidity requirements at any point in time. In addition to the current liquidity position, the Group has high cash generation ability. Those future cash flows will be used to repay debt instruments in the coming years. Free cash flow was CHF 4.2 billion as compared to CHF 3.3 billion in the first half of 2025.

The Roche Group continues to enjoy high long-term investment-grade credit ratings of AA by Standard & Poor's, Aa2 by Moody's and AA by Fitch. At the same time Roche is rated at the highest available short-term ratings by those agencies. In the event of financing requirements, the credit ratings of the Roche Group should permit efficient access to international capital markets, including the commercial paper market. The Group has committed credit lines with various financial institutions totalling USD 7.5 billion available as back-stop lines for the commercial paper program. As at 30 June 2026 no debt has been drawn under these credit lines.

Market risk. Market risk arises from changing market prices of the Group's financial assets or financial liabilities. The exposures are predominantly related to changes in interest rates, foreign exchange rates and equity prices. The Group uses Value-at-Risk (VaR) to assess the impact of market risk on its financial instruments. VaR data indicates the value range within which a given financial instrument will fluctuate with a preset probability as a result of movements in market prices. The Group's VaR has decreased since 31 December 2025.

Interest rate risk. Interest rate risk arises from movements in interest rates which could affect the Group's financial result or the value of the Group's equity. The Group may use interest rate derivatives to manage its interest rate-related exposure and financial result.

Further information on financial risk management and financial risks and the VaR methodology is included in Note 31 to the 2025 Annual Financial Statements.

International Financial Reporting Standards

The Roche Group has been using International Financial Reporting Standards (IFRS Accounting Standards) to report its consolidated results since 1990.

New and revised standards applied in 2026

In 2026 the Group implemented various minor amendments to existing accounting standards and interpretations which have no material impact on the Group's overall results and financial position.

IFRS 18 'Presentation and Disclosure in Financial Statements'

The Group will implement this new IFRS Accounting Standard effective 1 January 2027. IFRS 18 replaces IAS 1 'Presentation of Financial Statements'. IFRS 18 requires companies to classify income and expenses into operating, investing and financing categories in the income statement (which are not the same as the categories in the statement of cash flows), in addition to the income taxes and discontinued operations categories, and to present two newly defined subtotals, operating profit and profit before financing and income taxes. The new IFRS Accounting Standard also requires disclosures about management-defined performance measures ('MPMs') in the interim and annual financial statements, including reconciliations between those measures and subtotals listed in IFRS 18 or totals or subtotals required by IFRS Accounting Standards.

See Note 1 to the Interim Financial Statements for further details.

Roche Group Interim Consolidated Financial Statements

The Interim Consolidated Financial Statements have been reviewed by the Group's auditor and their review report is presented on page 76.

Roche Group consolidated income statement for the six months ended 30 June 2026 in millions of CHF

Notes to the Roche Group Interim Consolidated Financial Statements

1. General accounting principles

Basis of preparation

These financial statements are the unaudited condensed interim consolidated financial statements (hereafter 'the Interim Financial Statements') of Roche Holding Ltd, a company registered in Switzerland, and its subsidiaries (hereafter 'the Group') for the six months ended 30 June 2026 (hereafter 'the interim period'). These Interim Financial Statements should be read in conjunction with the consolidated financial statements for the year ended 31 December 2025 (hereafter 'the Annual Financial Statements'), as they provide an update of previously reported information. They were approved for issue by the Board of Directors on 21 July 2026.

Statement of compliance

The Interim Financial Statements have been prepared in accordance with IAS 34 'Interim Financial Reporting'. They do not include all of the information required for a complete set of financial statements prepared in accordance with IFRS Accounting Standards. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Group since the Annual Financial Statements.

Management judgements and estimates

The preparation of the Interim Financial Statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of revenues, expenses, assets, liabilities and related disclosures. If in the future such estimates and assumptions, which are based on management's best judgement at the date of the Interim Financial Statements, deviate from the actual circumstances, the original estimates and assumptions will be modified as appropriate in the period in which the circumstances change. The significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty are the same as those applied in the Annual Financial Statements.

Seasonality

The Group operates in industries where significant seasonal or cyclical variations in total sales are not experienced during the financial year.

Accounting policies

Except as described below, the accounting policies applied in these Interim Financial Statements are the same as those applied in the Annual Financial Statements. Changes in accounting policies will also be reflected in the Group's Consolidated Financial Statements for the year ending 31 December 2026.

Changes in accounting policies

In 2026 the Group has implemented various minor amendments to existing accounting standards and interpretations, which have no material impact on the Group's overall results and financial position.

Future new and revised accounting standards

The Group is currently assessing the potential impacts of the various new and revised accounting standards and interpretations that will be mandatory from 1 January 2027 and which the Group has not yet applied. Based on the analysis to date, the Group does not anticipate that these will have a material impact on the Group's overall results and financial position. The Group is also assessing other new and revised accounting standards which are not mandatory until after 2027.

IFRS 18 'Presentation and Disclosure in Financial Statements'

The Group will implement this new IFRS Accounting Standard effective 1 January 2027. IFRS 18 replaces IAS 1 'Presentation of Financial Statements'. Requirements in IAS 1 that are unchanged are transferred to IFRS 18 and other IFRS Accounting Standards. IFRS 18 introduces several new presentation and disclosure requirements and will increase the disclosure information.

IFRS 18 requires companies to classify income and expenses into operating, investing and financing categories in the income statement (which are not the same as the categories in the statement of cash flows), in addition to the income taxes and discontinued operations categories, and to present two newly defined subtotals, operating profit and profit before financing and income taxes. The new IFRS Accounting Standard also requires disclosures about management-defined performance measures ('MPMs') in the interim and annual financial statements, including reconciliations between those measures and subtotals listed in IFRS 18 or totals or subtotals required by IFRS Accounting Standards. MPMs are subtotals of income and expenses used in public communications to communicate management's view of an aspect of the financial performance for a company as a whole. Other changes introduced by IFRS 18 include limited changes to the statement of cash flows, as defined in IAS 7 'Statement of Cash Flows' effective 1 January 2027, which requires companies to use the operating profit subtotal as the starting point for reporting cash flows from operating activities using the indirect method.

Presentational changes to the income statement. Upon adoption of IFRS 18, the Group will make a number of presentational changes to the income statement which include the introduction of the investing and financing categories and one newly defined subtotal, profit before financing and income taxes. These presentational changes have no impact on sales, net income and earnings per share of the Group in total, but will change the operating profit of the Pharmaceuticals Division, the Diagnostics Division and Corporate. The amounts stated below are based on preliminary impact assessments for the first six months ended 30 June 2026 and are subject to finalisation as part of the adoption of IFRS 18 in 2027.

For the operating category, which already existed prior to IFRS 18, the key changes are mainly reclassifications of income and expenses related to other operating income (expense):

- The impairment of goodwill, which is currently classified in other operating income (expense) (see Note 8), will be presented as a separate line item.
- Foreign exchange gains (losses) and gains (losses) on the net monetary position in hyperinflationary economies of CHF 174 million net losses, which are currently reported within other financial income (expense) (see Note 4), will be reclassified into the operating results of Corporate and included in other operating income (expense).
- Expenses of CHF 7 million relating to the discount unwind related to contingent consideration liabilities, which are currently reported in financing costs (see Note 4), will be reclassified into the operating results of the Pharmaceuticals Division and included in other operating income (expense).

For the investing category, this will comprise the income and expense of CHF 118 million net income currently included in other financial income (expense) (see Note 4), which mainly relates to the net income from equity investments of CHF 33 million, the net interest income and income from debt investments/securities and fund investments of CHF 99 million, the share of losses in associates of CHF 9 million and the related foreign exchange gains (losses) of CHF 6 million net gain.

For the financing category, this will comprise expenses of CHF 635 million currently included in financing costs (see Note 4).

New disclosures. For the new disclosure requirements on MPMs, the existing financial information on the 'Core results' related to the income statement in the 'Alternative Performance Measures' section reported outside the interim and annual financial statements, including the core results reconciliations and core earnings per share information, will be included in the interim and annual financial statements. The Group does not foresee a change to its core results concept. In addition, expanded or disaggregated disclosures of certain items will be provided in the notes to the income statement.

Transition. The Group will apply the full retrospective method for the transition. This means that the comparative 2026 results will be restated when the new standard is applied in 2027.

2. Operating segment information

The Group has two divisions, Pharmaceuticals and Diagnostics. Revenues are primarily generated from the sale of prescription pharmaceutical products and diagnostic instruments, reagents and consumables, respectively. Both divisions also derive revenues from the sale or licensing of products or technology to third parties. Residual operating activities from divested businesses and certain global activities are reported as 'Corporate'. These include the Corporate Executive Committee and global Group functions for informatics, communications, human resources, finance (including treasury and taxation), legal, safety and environmental services. Subdivisional information is also presented for the Roche Pharmaceuticals and Chugai operating segments within the Pharmaceuticals Division.

In 2026 certain legal functions previously embedded in the Pharmaceuticals and Diagnostics Divisions have been transferred to Corporate. The impact to the results of Corporate for the six months ended 30 June 2026 was an additional expense of CHF 127 million reported in selling, general and administration, thereof CHF 104 million from the Pharmaceuticals Division and CHF 23 million from the Diagnostics Division. Comparative information for the 2025 interim period was not restated.

Total	**30,418**	**1,034**	**31,452**	**30,879**	**970**	**31,849**

Revenue from other sources primarily relates to lease revenue in the Diagnostics Division and revenue from collaborations in which the counterparty is not considered a customer, such as certain royalty income from collaboration partners and income from profit-sharing agreements with collaboration partners in the Pharmaceuticals Division.

Gross-to-net sales reconciliation for the Pharmaceuticals Division

The gross-to-net sales reconciliation for the Pharmaceuticals Division is shown in the table below. The companies in the Diagnostics Division have similar reconciling items, but at much lower amounts.

Pharmaceuticals Division sales gross-to-net reconciliation in millions of CHF

	Six months ended 30 June	
	2026	2025
Gross sales	30,922	31,065
Government and regulatory mandatory price reductions	(3,430)	(3,533)
Contractual price reductions	(3,060)	(2,858)
Cash discounts	(147)	(158)
Customer returns reserves	(114)	(161)
Others	(542)	(370)
Net sales	**23,629**	**23,985**

Government and regulatory mandatory price reductions. These consist of mandatory price reductions. The major elements are the 340B Drug Discount Program, Medicaid and other plans in the US, which totalled USD 3.3 billion, equivalent to CHF 2.6 billion (six months ended 30 June 2025: USD 3.2 billion, equivalent to CHF 2.8 billion).

Contractual price reductions. These include rebates and chargebacks that are the result of contractual agreements that are primarily volume-based and performance-based.

Cash discounts. These include credits offered to wholesalers for remitting payment on their purchases within contractually defined incentive periods.

Customer returns reserves. These are allowances established for expected product returns.

Sales reductions that are expected to be withheld by the customer upon settlement, such as contractual price reductions and cash discounts, are recorded in the balance sheet as a deduction from trade receivables. Sales reductions that are separately payable to customers, governmental health authorities or healthcare regulatory authorities are recorded in the balance sheet as accrued liabilities. Provisions for sales returns are recorded in the balance sheet as other provisions.

4. Net financial expense

Net other financial income (expense)	(11)	7
Associates		
– Share of profits (losses) in associates	(12)	(13)
– Gains (losses) on disposal of investment in associate	3	30
Total other financial income (expense)	**(56)**	**(49)**

Net financial expense in millions of CHF

	Six months ended 30 June 2026	2025
Financing costs	(642)	(693)
Other financial income (expense)	(56)	(49)
Net financial expense	**(698)**	**(742)**
Financial result from treasury management	(624)	(690)
Financial result from pension management	(65)	(69)
Associates	(9)	17
Net financial expense	**(698)**	**(742)**

Hyperinflationary economies. Losses on the net monetary position in hyperinflationary economies were CHF 28 million in the 2026 interim period (2025 interim period: losses of CHF 31 million) for the Group's affiliates in Argentina in 2026 and 2025 and those in Türkiye in 2025.

5. Income taxes

Income tax expenses are recognised based upon management's best estimate of the weighted average annual income tax rate expected for the full financial year multiplied by the pre-tax income for the six months ended 30 June 2026.

Income tax expenses in millions of CHF

	Six months ended 30 June 2026	2025
Current income taxes and Pillar Two income taxes	(1,935)	(2,234)
– *of which current income taxes*	*(1,912)*	*(2,034)*
– *of which Pillar Two income taxes*	*(23)*	*(200)*
Deferred taxes	287	478
Total income tax (expense)	**(1,648)**	**(1,756)**

The Group's effective tax rate for the six months ended 30 June 2026 increased to 18.4% (six months ended 30 June 2025: 18.3%) mainly due to higher non-deductible impairment of intangible assets and the deferred tax impact from equity compensation plans in the 2026 interim period. These impacts were largely offset by the impact of the Swiss tax reform which resulted in a transitional deferred tax expense of CHF 114 million recognised in the 2025 interim period.

6. Mergers and acquisitions

Business combinations – 2026

SAGA Dx, Inc. On 28 May 2026 the Group acquired a 100% controlling interest in SAGA Dx, Inc. ('SAGA'), a privately owned US company based in Morrisville, North Carolina. With the acquisition, the Group obtained access to SAGA's tumour-informed molecular residual disease ('MRD') platform called Pathlight. SAGA is reported in the Diagnostics Division. The total consideration was USD 408 million, of which USD 345 million was paid in cash on the acquisition date and USD 63 million arose from a contingent consideration arrangement. The contingent payments are based on the achievement of performance-related milestones, and the range of undiscounted outcomes is between zero and USD 255 million.

The identifiable assets acquired and liabilities assumed are set out in the table below. The amounts are provisional based on preliminary information and valuations of the assets and liabilities and are subject to adjustment during the second half of 2026.

Business combinations – 2026: net assets acquired in millions of CHF

	SAGA
Property, plant and equipment	4
Right-of-use assets	3
Intangible assets	
– Product intangibles: in use [9]	181
Deferred tax assets	5
Cash and cash equivalents	3
Lease liabilities	(3)
Deferred tax liabilities	(43)
Other net assets (liabilities)	0
Net identifiable assets	**150**
Goodwill [8]	171
Total consideration	**321**
Cash	271
Contingent consideration [16]	50
Total consideration	**321**

The fair values of the intangible assets were determined using an income approach that is based on management forecasts and observable market data for discount rates, tax rates and foreign exchange rates. The present value was calculated using a risk-adjusted discount rate of 15.8%. The valuations were performed by an independent valuer.

Goodwill represents a control premium, the acquired workforce, and the synergies that can be expected from integrating the acquired company into the Group's existing diagnostics solutions, including commercialisation opportunities outside of the US. The cash-generating unit for the goodwill is the Diagnostics customer areas. None of the goodwill is expected to be deductible for income tax purposes.

Directly attributable transaction costs of CHF 2 million were reported in Corporate within other operating income (expense).

The impact of the acquisition on the results reported for the six months ended 30 June 2026 for the Diagnostics Division and the Group were not material. If the acquisition had occurred on 1 January 2026, management estimates that SAGA would have contributed no material revenue and a net loss (including amortisation of product intangible assets in use and after tax) of CHF 18 million in the six months ended 30 June 2026. This information is provided for illustrative purposes only and is not necessarily indicative of the results of the Group that would have occurred had SAGA actually been acquired at the beginning of the year, or indicative of the future results of the Group.

Business combinations – 2025

Poseida Therapeutics, Inc. On 8 January 2025 the Group acquired a 100% controlling interest in Poseida Therapeutics, Inc. ('Poseida'), a publicly owned US company based in San Diego, California, that had been listed on Nasdaq. Poseida is reported in the Pharmaceuticals Division. The total consideration was USD 1,132 million, of which USD 891 million was paid in cash on the acquisition date, USD 99 million was deferred consideration paid in cash on 17 January 2025 which related to the settlement of Poseida's own equity compensation plans, and USD 142 million arose from a contingent consideration arrangement. The contingent payments are based on the achievement of predetermined performance-related milestones, and the range of undiscounted outcomes is between zero and USD 472 million.

Cash flows from business combinations

Contingent payments related to previous acquisitions	(116)	0	(116)	0	0	0
Total net cash outflows	**(134)**	**0**	**(134)**	**(5)**	**0**	**(5)**

During the six months ended 30 June 2026 the Group recorded additions to product intangible assets not available for use of CHF 106 million (six months ended 30 June 2025: none) for the achievement of performance-related milestones for asset acquisitions previously closed, thereof paid CHF 36 million. Furthermore, the Group made contingent payments of CHF 80 million in the 2026 interim period in relation to product intangible assets not available for use that had already been recognised as at 31 December 2025.

Future business combinations

PathAI, Inc. On 7 May 2026 the Group announced that it had entered into a definitive merger agreement to acquire a 100% controlling interest in PathAI, Inc. ('PathAI'), a privately owned US company based in Boston, Massachusetts. With the acquisition, the Group will gain access to PathAI's image management system with advanced artificial intelligence ('AI') analysis and workflow capabilities for pathology laboratories and the biopharmaceutical industry. This acquisition builds on the existing partnership between the Group and PathAI, which included the development of AI-enabled companion diagnostic algorithms. PathAI will be reported in the Diagnostics Division. The purchase consideration is approximately USD 750 million to be paid in cash at the acquisition date and up to USD 300 million from a contingent consideration arrangement. The closing of the transaction is subject to customary closing conditions, including antitrust and regulatory approvals and is currently expected in the third quarter of 2026.

7. Global restructuring plans

During the six months ended 30 June 2026 the Group continued the implementation of various global restructuring plans.

Global restructuring plans: costs incurred in millions of CHF

	Six months ended 30 June 2026	2025
Global restructuring costs		
– Employee-related costs	350	553
– Site closure and other costs related to physical assets	46	32
– Divestment of products and businesses	0	0
– Other reorganisation expenses	369	438
Total global restructuring costs	**765**	**1,023**

The Pharmaceuticals Division incurred restructuring costs of CHF 346 million (six months ended 30 June 2025: CHF 351 million), primarily for research and development optimisation initiatives and a business process transformation to simplify the systems landscape. The Diagnostics Division incurred costs of CHF 239 million (six months ended 30 June 2025: CHF 408 million) for initiatives to drive organisational effectiveness. Corporate costs were CHF 180 million (six months ended 30 June 2025: CHF 264 million), notably for a business process transformation to simplify the systems landscape and reduce process complexity as well as for a restructuring in informatics.

Global restructuring plans: summary of costs incurred in millions of CHF

Total	**(399)**	**(350)**	**(1,045)**	**(190)**

Impairment charges – 2026

Pharmaceuticals Division. Impairment charges totalling CHF 1,045 million were recorded during the six months ended 30 June 2026, which related to:

- A charge of CHF 371 million for the product intangible asset for selnoflast (NLRP3 inhibitor), which was acquired as part of the Inflazome acquisition, due to the decision to stop the development of the compound in certain indications. The asset concerned, which was not yet being amortised, was fully written down.
- A charge of CHF 256 million for three separate product intangible assets following the decisions to stop the development of these compounds with the respective alliance partners. The assets concerned, which were not yet being amortised, were fully written down.
- A charge of CHF 226 million for the product intangible asset for acmopatide (CT-868), a dual GLP-1/GIP receptor agonist, acquired as part of the Carmot acquisition, due to the decision to stop the development of the compound. The asset concerned, which was not yet being amortised, was fully written down.
- A charge of CHF 192 million for the product intangible asset for the PD-1-regulated IL-2 programme, acquired as part of the Good Therapeutics acquisition, due to the decision to stop the development of the respective compound. The asset concerned, which was not yet being amortised, was fully written down.

Diagnostics Division. There were no impairments during the six months ended 30 June 2026.

Impairment charges – 2025

Pharmaceuticals Division. Impairment charges totalling CHF 190 million were recorded during the six months ended 30 June 2025. The major items related to:

- A charge of CHF 104 million for the product intangible asset for SPK-9001, acquired as part of the Spark Therapeutics acquisition, due to the decision to stop the commercialisation by the alliance partner. The asset concerned, which was being amortised, was fully written down.
- A charge of CHF 43 million following the decision to terminate the development of a compound and the collaboration with an alliance partner. The asset concerned, which was not yet being amortised, was fully written down.
- A charge of CHF 36 million following the decision to stop the development of a compound with an alliance partner. The asset concerned, which was not yet being amortised, was fully written down.

Diagnostics Division. There were no impairments during the six months ended 30 June 2025.

10. Provisions and contingent liabilities

Provisions in millions of CHF

	30 June 2026	31 December 2025
Legal provisions	166	217
Environmental provisions	251	279
Restructuring provisions	873	866
Contingent consideration provisions [16]	344	304
Other provisions	1,153	1,132
Total provisions	**2,787**	**2,798**
Current	1,630	1,743
Non-current	1,157	1,055
Total provisions	**2,787**	**2,798**

During the six months ended 30 June 2026 CHF 529 million of provisions were utilised (six months ended 30 June 2025: CHF 748 million), which are included in the cash flows from operating activities and mainly related to the utilisation of restructuring and other provisions (six months ended 30 June 2025: CHF 658 million). During the six months ended 30 June 2025 CHF 90 million were also included in the cash flows from investing activities in relation to payments for deferred consideration in business combinations (see Note 6).

As part of the regular review of litigation matters, management has reassessed the provisions recorded for certain litigation matters. Based on the development of the various litigations, there was a net expense of CHF 8 million during the six months ended 30 June 2026.

Other than as described below, no significant changes in the Group's contingent liabilities for legal cases have occurred since the approval of the Annual Financial Statements by the Board of Directors.

Iraqi Ministry of Health. The litigation related to the Iraqi Ministry of Health is described in Note 20 to the Annual Financial Statements. On 23 January 2026 the US Court of Appeals for the District of Columbia Circuit reaffirmed its prior decision dated 4 January 2022 and remanded the case for further proceedings. The defendants filed a petition for en banc review, which was denied on 23 April 2026. Defendants are considering whether to file a petition for certiorari to the US Supreme Court. The Group is vigorously defending itself in this matter. The outcome of this matter cannot be determined at this time.

Italian Competition Authority investigation. On 30 April 2026 the Italian Competition Authority ('ICA') issued a Statement of Objections against Genentech, Inc. ('Genentech') and other companies, alleging anti-competitive practices aimed at delaying the entry of a biosimilar into the Italian market. Genentech filed its response on 17 July 2026. A hearing is planned for 28 July 2026. The Group is vigorously defending itself in this matter. The outcome of this matter cannot be determined at this time.

There have been certain procedural developments in the significant litigation matters described in Note 20 to the Annual Financial Statements. These do not significantly affect the assessment of the Group's management concerning the adequacy of the total provisions recorded for legal matters.

11. Debt

Debt: movements in carrying value of recognised liabilities in millions of CHF

Six months ended 30 June 2026

Total debt	**31,805**
Long-term debt	25,222
Short-term debt	6,583
Total debt	**31,805**

Unamortised discount included in the carrying value of bonds and notes at 30 June 2026 was CHF 49 million (30 June 2025: CHF 52 million).

Issuance of bonds and notes

The Group did not undertake any debt offerings during either the six months ended 30 June 2026 or the six months ended 30 June 2025.

Redemption and repurchase of bonds and notes – 2026

On the due date of 5 March 2026 the Group redeemed the 0.991% fixed rate notes with a principal amount of USD 0.65 billion. The cash outflow was CHF 506 million, plus accrued interest. The effective interest rate of these notes was 1.03%.

On the due date of 15 May 2026 the Group redeemed the 2.625% fixed rate notes with a principal amount of USD 1.0 billion. The cash outflow was CHF 784 million, plus accrued interest. The effective interest rate of these notes was 2.78%.

On the due date of 23 June 2026 the Group redeemed the 1.5% fixed rate bonds with a principal amount of CHF 0.425 billion. The cash outflow was CHF 425 million, plus accrued interest. The effective interest rate of these bonds was 1.48%.

Redemption and repurchase of bonds and notes – 2025

On the due date of 25 February 2025 the Group redeemed the 0.875% fixed rate notes with a principal amount of EUR 1.0 billion. The cash outflow was CHF 939 million, plus accrued interest. The effective interest rate of these notes was 0.93%.

On the due date of 10 March 2025 the Group redeemed the 2.132% fixed rate notes with a principal amount of USD 1.0 billion. The cash outflow was CHF 880 million, plus accrued interest. The effective interest rate of these notes was 2.19%.

Also on the due date of 10 March 2025 the Group redeemed floating rate notes with a principal amount of USD 0.75 billion. The cash outflow was CHF 660 million, plus accrued interest. The effective interest rate of these notes was 4.87%.

Commercial paper

Roche Holdings, Inc. commercial paper program. Roche Holdings, Inc. has an established commercial paper program under which it can issue up to USD 7.5 billion of unsecured commercial paper notes guaranteed by Roche Holding Ltd. The maturity of the notes under the program cannot exceed 365 days from the date of issuance. At 30 June 2026 unsecured commercial paper notes with a principal amount of USD 3.0 billion and an average interest rate of 3.69% were outstanding.

The committed credit line that is available as a back-stop supporting the commercial paper program is USD 7.5 billion at 30 June 2026. On 6 March 2026 the previously existing committed credit line was refinanced by one new committed credit line with an initial maturity of five years and two annual extension options.

Movements in commercial paper obligations in millions of CHF

Net cash proceeds (payments)	1,553
Currency translation effects	56
At 30 June 2026	**2,392**

12. Equity attributable to Roche shareholders

Changes to the Group's capital structure

On 10 March 2026 the Annual General Meeting of Roche shareholders approved changes to the Group's capital structure. These changes included the exchange of the previously existing non-voting equity securities (*Genussscheine*), which had no nominal value, for participation certificates with a nominal value of CHF 0.001, thereby creating a new paid-up participation capital of CHF 702,562.70 from converting freely available equity (in the form of available earnings). Participation certificates are economically equivalent to the previously existing non-voting equity securities. After the exchange, the participation certificates replacing the non-voting equity securities became listed on the SIX Swiss Exchange on 17 March 2026. These have the same dividend entitlement as well as the same entitlement to any liquidation proceeds as the bearer shares. To ensure equal treatment of the participation certificates with the bearer shares in accordance with the articles of incorporation of Roche Holding Ltd, the Annual General Meeting of Roche shareholders approved a reduction of the nominal value of the bearer shares from CHF 1.00 to CHF 0.001 per share. Holders of bearer shares received, by way of a repayment of nominal value, an entitlement of CHF 0.999 in cash per bearer share, resulting in an aggregate repayment amount of CHF 106,584,309 and a corresponding share capital reduction from CHF 106,691,000 to CHF 106,691. The share capital reduction and the participation capital creation became effective with the entry in the commercial register of the Canton Basel-Stadt on 11 March 2026.

Share and participation capital

Following the changes to the Group's capital structure described above, at 30 June 2026 the issued share capital of Roche Holding Ltd, which is the Group's parent company, amounted to CHF 0.1 million (31 December 2025: CHF 106.7 million) and consisted of 106,691,000 shares with a nominal value of CHF 0.001 each (31 December 2025: 106,691,000 shares with a nominal value of CHF 1.00 each).

Following the issuance of 702,562,700 participation certificates with a nominal value of CHF 0.001 in exchange for the previously existing non-voting equity securities (*Genussscheine*), which had no nominal value, at 30 June 2026 the issued participation capital was CHF 0.7 million (31 December 2025: none). Participation certificates confer no voting rights. These have the same dividend entitlement as well as the same entitlement to any liquidation proceeds as the bearer shares.

The weighted average number of shares and participation certificates / non-voting equity securities in issue during the six months ended 30 June 2026 was 796 million (weighted average number of shares and non-voting equity securities in issue during the six months ended 30 June 2025: 796 million).

Dividends

On 10 March 2026 the shareholders approved the distribution of a dividend of CHF 9.80 per share and non-voting equity security (2025: CHF 9.70) in respect of the 2025 business year. The distribution to holders of outstanding shares and non-voting equity securities totalled CHF 7,802 million (2025: CHF 7,731 million), which was recorded against retained earnings in the six months ended 30 June 2026.

Own equity instruments

Holdings of own equity instruments in number of shares, participation certificates and non-voting equity securities

	30 June 2026 (millions)	31 December 2025 (millions)
Shares	0.4	0.5
Participation certificates	12.1	–
Non-voting equity securities	–	13.1
Total	**12.5**	**13.6**

Own equity instruments are held for the Group's potential conversion obligations that may arise from the Group's equity compensation plans (described in Note 27 to the Annual Financial Statements).

Retained earnings

In addition to net income attributable to Roche shareholders of CHF 6,871 million (six months ended 30 June 2025: CHF 7,410 million) and the dividend payments described above, retained earnings also include net losses on remeasurements of defined benefit plans of CHF 209 million, after tax (six months ended 30 June 2025: net losses of CHF 470 million, after tax). These were based on updated actuarial calculations for major plans. There were gains mainly due to a positive performance of plan assets in Switzerland and the US and a lower defined benefit obligation from higher discount rates for plans in Switzerland, the US and the United Kingdom compared to the start of the interim period. These gains were more than offset by an increase in the limit on asset recognition on the surplus in certain defined benefit plans in Switzerland. This resulted in overall net losses on remeasurements of defined benefit plans recorded in the six months ended 30 June 2026.

13. Subsidiaries and associates

Chugai

Chugai is a fully consolidated subsidiary of the Group and at 30 June 2026 the Group's interest in Chugai was 61.1% (31 December 2025: 61.1%). The common stock of Chugai is publicly traded and is listed on the Tokyo Stock Exchange under the stock code 'TSE:4519'. Chugai prepares financial statements in accordance with IFRS Accounting Standards that are filed on a quarterly basis with the Tokyo Stock Exchange.

The dividends distributed to third parties holding Chugai shares during the six months ended 30 June 2026 totalled CHF 468 million (six months ended 30 June 2025: CHF 212 million) and were recorded against non-controlling interests. Dividends paid by Chugai to Roche are eliminated on consolidation as intercompany items.

Total	**(8,273)**	**(7,943)**

16. Financial risk management

The Group's financial risk management objectives and policies are consistent with those disclosed in Note 31 to the Annual Financial Statements.

Fair value hierarchy

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- Level 1 – quoted prices (unadjusted) in active markets for identical assets and liabilities.
- Level 2 – observable inputs other than quoted prices in active markets for identical assets and liabilities.
- Level 3 – unobservable inputs.

Fair value hierarchy of financial instruments in millions of CHF

	Level 1	Level 2	Level 3	Total
At 30 June 2026				
Marketable securities:				
– Debt securities at fair value through OCI	331	102	–	433
– Debt securities at fair value through profit or loss	0	2	–	2
– Money market instruments at fair value through OCI	0	3,739	–	3,739
Derivative financial instruments	–	118	–	118
Equity investments at fair value through OCI	30	45	–	75
Equity investments at fair value through profit or loss	77	187	–	264
Debt investments at fair value through profit or loss	0	5	–	5
Fund investments at fair value through profit or loss	0	119	80	199
Financial assets recognised at fair value	**438**	**4,317**	**80**	**4,835**
Derivative financial instruments	–	(399)	–	(399)
Contingent consideration	–	–	(344)	(344)
Financial liabilities recognised at fair value	**–**	**(399)**	**(344)**	**(743)**

At 30 June 2026 Level 1 financial assets consisted of bonds and quoted shares. Level 2 financial assets consisted primarily of certificates of deposit and commercial paper.

The Group determines Level 2 fair values using the following valuation techniques:

- Marketable securities and derivative financial instruments are based on valuation models that use observable market data for interest rates, yield curves, foreign exchange rates and implied volatilities for similar instruments at the measurement date.
- Equity, debt and fund investments at fair value through OCI and at fair value through profit or loss are based on a valuation model that uses the most recently published observable market data.

The Group recognises transfers between levels of the fair value hierarchy as at the end of the reporting period during which the transfer occurred. There were no significant transfers between Level 1 and Level 2 and no transfers from or to Level 3 during the six months ended 30 June 2026.

Level 3 fair values

Details of the determination of Level 3 fair value measurements are set out below.

Contingent consideration arrangements in millions of CHF

Six months ended 30 June 2026	
At 1 January 2026	(304)
Arising from business combinations [6]	(50)
Utilised for settlements [6]	0
Total gains and losses included in the income statement	
– Unused amounts reversed – recorded within other operating income (expense)	25
– Additional amounts created – recorded within other operating income (expense)	0
– Discount unwind included in financing costs	(7)
Total gains and losses included in other comprehensive income	
– Currency translation effects	(8)
At 30 June 2026	**(344)**

Contingent consideration arrangements. The Group is party to certain contingent consideration arrangements, including those from business combinations. The fair values of contingent consideration from business combinations are determined considering the expected payments and, where payments are expected to be made beyond the next 12 months, discounted to a risk-adjusted present value using a discount rate of 5.2% at 30 June 2026 (31 December 2025: 5.2%). The expected payments are determined by considering the possible scenarios of forecast sales and other performance criteria, the amount to be paid under each scenario and the probability of each scenario. The significant unobservable inputs are the forecast sales, other performance criteria and the discount rate. The estimated fair value would increase if the forecast sales or other performance criteria were higher or the discount rate was lower. At 30 June 2026 the total potential payments under contingent consideration arrangements arising from business combinations could be up to CHF 0.9 billion (31 December 2025: CHF 0.7 billion).

Other financial instruments with Level 3 fair value measurement. Other assets included in the Level 3 fair value hierarchy are various fund investments, for which significant inputs are unobservable.

Level 3 fund investments in millions of CHF

Six months ended 30 June 2026	
At 1 January 2026	71
Fair value gains and losses – recorded within other financial income (expense)	4
Purchases	6
Disposals	0
Currency translation effects	(1)
At 30 June 2026	**80**

Carrying value and fair value

At 30 June 2026 the carrying value of bonds and notes was CHF 28.9 billion compared to a fair value of CHF 28.1 billion, and the carrying value of total debt was CHF 31.8 billion compared to a fair value of CHF 31.0 billion. The carrying values of financial assets are a reasonable approximation of the fair values at 30 June 2026.

Independent Auditor's Report on the Review of Interim Consolidated Financial Statements

to the Board of Directors of Roche Holding Ltd, Basel

Introduction

We have been engaged to review the accompanying consolidated income statement and consolidated statement of comprehensive income of Roche Holding Ltd for the six-month period ended 30 June 2026, the related consolidated balance sheet as at 30 June 2026, the consolidated statements of cash flows and changes in equity for the six-month period then ended, and selected explanatory notes (the interim consolidated financial statements) on pages 45–75. The Board of Directors is responsible for the preparation and presentation of these interim consolidated financial statements in accordance with International Accounting Standard 34 *Interim Financial Reporting*. Our responsibility is to express a conclusion on these interim consolidated financial statements based on our review.

Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements 2410, *Review of Interim Financial Information Performed by the Independent Auditor of the Entity*. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim consolidated financial statements as at 30 June 2026 are not prepared, in all material respects, in accordance with International Accounting Standard 34 *Interim Financial Reporting*.

Supplementary Information

Alternative Performance Measures

The financial information included in the Financial Review includes certain Alternative Performance Measures ('APMs') which are not accounting measures as defined by IFRS Accounting Standards, in particular the core results, net working capital, net operating assets, free cash flow and constant exchange rates. These APMs should not be used instead of, or considered as alternatives to, the Group's consolidated interim financial results based on IFRS Accounting Standards. These APMs may not be comparable to similarly titled measures disclosed by other companies. All APMs presented in the Financial Review relate to the performance of the current reported period and comparative periods.

Core results

Core results allow for an assessment of both the Group's actual results as defined by IFRS Accounting Standards and the underlying performance of the business. The core results concept, which is used in the internal management of the business, is based on the IFRS results, with the following adjustments:

- Global restructuring plans (see Note 7) are excluded.
- Amortisation and impairment of intangible assets (see Note 9), with the exception of commercial software intangible assets, and impairment of goodwill (see Note 8) are excluded.
- Acquisition accounting and other impacts from the accounting for mergers and acquisitions (M&A) and alliance transactions (see Financial Review) are excluded.
- Discontinued operations (currently none) are excluded.
- Legal and environmental cases (see Financial Review) are excluded.
- Global issues outside the healthcare sector beyond the Group's control are excluded.
- Material treasury items such as major debt restructurings (currently none) are excluded.
- Pension plan settlements are excluded.
- The tax benefit recorded under IFRS Accounting Standards in respect of equity compensation plans (ECPs), which varies according to the price of the underlying equity, is replaced by a normalised tax benefit, being the IFRS 2 expense multiplied by the applicable tax rate.

The Group's IFRS results, including the divisional breakdown, are reconciled to the core results in the tables below. The calculation of Core EPS is also given in the tables below. Additional commentary to the adjustment items is given in the Financial Review.

Free cash flow

Free cash flow is used to assess the Group's ability to generate the cash required to conduct and maintain its operations. It also indicates the Group's ability to generate cash to finance dividend payments, repay debt and undertake merger and acquisition activities. The free cash flow concept is used in the internal management of the business.

Operating free cash flow is calculated based on the IFRS operating profit and adjusted for certain non-cash items, movements in net working capital and capital expenditures (investments in property, plant and equipment and intangible assets as well as the principal portion of lease liabilities paid for leased assets). Operating free cash flow is different from cash flows from operating activities as defined by IAS 7 in that it includes capital expenditures (which are within the responsibility of divisional management) and excludes income taxes paid (which are not within the responsibility of divisional management). Cash outflows from defined benefit plans are allocated to the operating free cash flow based on the current service cost with the residual allocated to treasury activities.

Free cash flow is calculated as the operating free cash flow adjusted for treasury activities and taxes paid. Free cash flow is different from total cash flows as defined by IAS 7 in that it excludes dividend payments, cash inflows/outflows from financing activities such as issuance/repayment of debt, purchase/sale of marketable securities and cash inflows/outflows from mergers, acquisitions and divestments.

Operating free cash flow and free cash flow are calculated as shown in the tables below. Additional commentary to the adjustment items is given in the Financial Review.

Operating free cash flow reconciliation in millions of CHF

	Six months ended 30 June 2026	2025
Cash flows from operating activities (IFRS basis in accordance with IAS 7)	**7,635**	**7,100**

EBITDA

The Group does not use Earnings Before Interest, Tax, Depreciation and Amortisation (EBITDA) in either its internal management reporting or its external communications. In the opinion of the Group's management, operating free cash flow gives a more useful and consistent measurement of 'cash earnings' than EBITDA, which includes many non-cash items such as provisions, allowances for trade receivables and inventories, and certain non-cash entries arising from acquisition accounting and pension accounting. Operating free cash flow also includes the cash used for investments in property, plant and equipment, leased assets and intangible assets, whereas EBITDA excludes all costs and cash outflows for these items.

For the convenience of those readers who do use EBITDA, this is provided in the table below. As the starting point this uses the core results, which already exclude the amortisation and impairment of goodwill and intangible assets.

EBITDA (using core results) in millions of CHF

Six months ended 30 June	Pharmaceuticals 2026	Pharmaceuticals 2025	Diagnostics 2026	Diagnostics 2025	Corporate 2026	Corporate 2025	Group 2026	Group 2025

– Margin, % of sales	55.7	55.0	27.6	27.4	–	–	43.4	43.2

Net operating assets

Net operating assets allow for an assessment of the Group's operating performance of the business independently from financing and tax activities. Net operating assets are calculated as property, plant and equipment, leased assets ('right-of-use assets'), goodwill, intangible assets, net working capital and other operating assets (liabilities) minus provisions.

The calculation of the net operating assets disclosed in Note 2 is shown in the table below.

Net operating assets reconciliation – 30 June 2026 in millions of CHF

	Pharmaceuticals	Diagnostics	Corporate	Treasury and taxation	Group
Property, plant and equipment	13,929	8,241	287	–	22,457
Right-of-use assets	586	340	26	–	952
Goodwill	3,112	4,657	–	–	7,769
Intangible assets	17,541	1,779	–	–	19,320
Inventories	4,849	3,245	–	–	8,094
Provisions	(1,963)	(598)	(226)	–	(2,787)
Current income tax net liabilities	–	–	–	(2,803)	(2,803)
Deferred tax net assets	–	–	–	7,897	7,897
Defined benefit plan net liabilities	–	–	–	(2,398)	(2,398)
Lease liabilities	–	–	–	(1,503)	(1,503)
Marketable securities	–	–	–	4,286	4,286
Cash and cash equivalents	–	–	–	5,448	5,448
Debt	–	–	–	(31,805)	(31,805)
Other net assets (liabilities)					
– Net working capital	699	536	(492)	–	743
– Other operating assets (liabilities)	739	(93)	14	–	660
– Other assets (liabilities)	–	–	–	386	386
Total net assets	**39,492**	**18,107**	**(391)**	**(20,492)**	**36,716**

Net debt

Net debt is used to monitor the Group's overall short-term and long-term liquidity. Net debt is calculated as the sum of total long-term and short-term debt less marketable securities, cash and cash equivalents.

Net debt calculations, including details of movements during the current reported period, are shown in the table on page 40 in the Financial Review.

Net working capital

Net working capital is used to assess the Group's efficiency in utilising assets and short-term liquidity. Net trade working capital is calculated as trade receivables and inventories minus trade payables. Net working capital is calculated as net trade working capital adjusted for other receivables and other payables.

Net working capital and net trade working capital calculations are shown in the tables on page 26 (Pharmaceuticals Division), page 32 (Diagnostics Division) and page 34 (Corporate) in the Financial Review.

Constant exchange rates

Certain percentage changes in the Financial Review have been calculated using constant exchange rates (CER) which allow for an assessment of the Group's financial performance with the effects of exchange rate fluctuations eliminated. The percentage changes at constant exchange rates are calculated using simulations by reconsolidating both the current reported period and the prior period numbers at constant currency exchange rates, equalling the average exchange rates for the prior year. For example, a CER change between a 2026 line item and its 2025 equivalent is calculated using the average exchange rate for the year ended 31 December 2025 for both the 2026 line item and the 2025 line item and subsequently calculating the percentage change with respect to the two recalculated numbers.

Foreign exchange gains and losses and the gains (losses) on the net monetary positions in hyperinflationary economies are excluded from the calculation of CER growth rates. In countries where there is a significant devaluation in the local currency in the current reported period, the simulations use the average exchange rate of the current reported period instead of the prior period to avoid that CER growth rates are artificially inflated.

Period end	265,844	261,865	207,532

a) Each participation certificate confers the same rights as any of the shares to participate in the available earnings and any remaining proceeds from liquidation following repayment of the nominal value of the shares and the participation certificate capital (if any). Shares and participation certificates are listed on the SIX Swiss Exchange. Roche Holding Ltd has no restrictions as to ownership of its shares or participation certificates.
b) All stock price data reflect daily closing prices.

On 10 March 2026 the Annual General Meeting of Roche shareholders approved changes to the Group's capital structure. These changes included the exchange of the previously existing non-voting equity securities (*Genussscheine*), which had no nominal value, for participation certificates with a nominal value of CHF 0.001, thereby creating a new paid-up participation capital of CHF 702,562.70 from converting freely available equity (in the form of available earnings). After the exchange, the participation certificates replacing the non-voting equity securities became listed on the SIX Swiss Exchange on 17 March 2026. The last trading date of the non-voting equity securities (*Genussscheine*) on the SIX Swiss Exchange was on 16 March 2026.

Cautionary statement regarding forward-looking statements

This Half-Year Report contains certain forward-looking statements. These forward-looking statements may be identified by words such as 'believes', 'expects', 'anticipates', 'projects', 'intends', 'should', 'seeks', 'estimates', 'future' or similar expressions or by discussion of, among other things, strategy, goals, plans or intentions. Various factors may cause actual results to differ materially in the future from those reflected in forward-looking statements contained in this report, among others: (1) pricing and product initiatives of competitors; (2) legislative and regulatory developments and economic conditions; (3) delay or inability in obtaining regulatory approvals or bringing products to market; (4) fluctuations in currency exchange rates and general financial market conditions; (5) uncertainties in the discovery, development or marketing of new products or new uses of existing products, including without limitation negative results of clinical trials or research projects, unexpected side effects of pipeline or marketed products; (6) increased government pricing pressures; (7) interruptions in production; (8) loss of or inability to obtain adequate protection for intellectual property rights; (9) litigation; (10) loss of key executives or other employees; and (11) adverse publicity and news coverage.

The statement regarding earnings per share growth is not a profit forecast and should not be interpreted to mean that Roche's earnings or earnings per share for 2026 or any subsequent period will necessarily match or exceed the historical published earnings or earnings per share of Roche.
